F.3 510 Pandora Avenue: Application for a Structural Change to Increase Occupant Load for Swans Pub, Liquor Primary License (Downtown)

Committee received a report dated January 11, 2021 from the Director of Sustainable Planning and Community Development regarding the proposal by Swans Pub located at 510 Pandora Avenue for a structural change to increase the occupant load of their existing liquor primary licence.

Moved By Mayor Helps
Seconded By Councillor Young

That Council direct staff to provide the following response to the Liquor and Cannabis Regulation Branch,

1. That Council, after conducting a review with respect to noise and community impacts, does support the application of Swans Pub located at 510 Pandora Avenue to increase the occupant load from 171 to 282 people with no change to hours of operation which are 9:00 am to 2:00 am daily.

Providing the following comments on the prescribed considerations:

- a. The impact of noise on the community in the vicinity of the establishment has been considered in relation to the request, and assumptions are that the noise impacts would be negligible as the increased occupant load affects interior space only, and the establishment has a reputation of responsible operation. The requested hours of operation in conjunction with the proposed occupant load are not expected to result in negative impacts to the community.
- b. If the application is approved, the impact on the community is expected to be positive economically as the approval supports the business plan and long-term viability of the establishment.
- c. The views of residents were solicited via a mail-out which included 1313 letters to neighbouring property owners and occupiers within 100 metres of the licensed location and a notice was posted at the property. In response to the notification, a total of ten written responses were received, of which seven expressed opposition including one from the Downtown Residents Association, and three expressed support.
- d. Council recommends that the license be approved.
