Subject: VIC West community plan

Hi there, I would like to provide some feedback on the community plan. First of all I would like to say that I am very supportive of the plan and all that it looks to accomplish in Vic West. My feedback is really centred around implementation. I would like to urge that implementation start with the smaller projects, like for example the revitalization of the small parks along the Gorge waterway. My experience is that there is a tendency for the big flashy things to proceed first as it is good for politics. If though, the goal is truly to take a long term vision and see the plan through; then start with the small things, build momentum and prove to the community that our support is warranted. Then when the big funding decisions have to be made there will be community inertia to help get the tough decisions over the line.

Thank you
Jason Young
