Attention: Leanne Taylor, Senior Planner

Dear Leanne,

This letter is to confirm that TapBike Solutions has formed a partnership with Victoria Cool Aid Society to provide two bicycles as part of a bike share program at their proposed development at 210 Gorge Road East. These bikes will be made available to both residents of the building and the public to support alternative modes of transportation in the City.

The bikes will be equipped with our Bluetooth wheel-locking system which is controlled by our TapBike bike sharing app. Our app allows for the renter to choose from multiple billing options, including monthly and annual membership plans. The membership plan purchases will allow for a pre-determined amount of free use of the bikes per day, promoting the use of the alternative transportation mode to the community.

We are pleased to be working with Cool Aid in support of this new development which will provide 82 units of much needed affordable rental housing in our community.

Best Regards

Sean Elliott, Founder
TapBike Solutions Inc.
