## LIGHT. LOCK. REPORT.

Thefts of motorcycles, scooters and electric scooters are on the rise.

**LIGHT**

Thieves lurk in the dark and are targeting vehicles and parts of vehicles left in dark places. When parking your motorcycle, scooter or electric scooter at your residence, make sure it is in a well-lit area. When parking it on the street, try to park where it will be well-lit. Well-lit is well-protected.

**LOCK**

While motorcycles, scooters and electric scooters all come with steering and engine locks, thieves are defeating them, stealing parts like batteries, or simply taking the entire bike. A visible battery lock protects this valuable piece of your ride from disappearing, while a heavy duty lock will deter the majority of thieves. Well-locked is well-secured.

**REPORT**

Many of owners of the stolen motorcycles, scooters and electric scooters reported that they saw suspicious people in the area or on their property before the theft. Join a VicPD Block Watch and help keep your neighbours informed and vice versa. Well-informed is well-armed.
