Hey, Calvin!

My client confirmed the following:

- (a) confirm if the images be stationary or moving  
The sign has the capability for stationary or moving imagery, but stationary is fine if this makes the process faster or more likely to be approved.
- (b) number of different images that will be displayed on the EMC  
Anywhere from 5 – 15 images would be in rotation at any given time.
- (c) time frame between each image on the EMC  
We will set the duration in accordance to city planning preference.
- (d) hours of operation of the illumination  
The sign will be operational constantly, but has an auto dimming feature built in. It's also possible to set the sign on a timer to match the business hours of operation.

Thank you!

Best regards,

East Office: 331 Parkdale Avenue N. Hamilton, ON, L8H 5Y1  
West Office: 205 - 810 Quayside Drive, New Westminster, BC, V3M 6B9

I'll reach out to the sign manufacturer to confirm this as soon as possible.

Thank you, Calvin!

Hi Jason

Can you comment on

- (a) confirm if the images be stationary or moving
- (b) number of different images that will be displayed on the EMC
- (c) time frame between each image on the EMC
- (d) hours of operation of the illumination
