

## GONZALES HILL'S OLD TREES AND MAGNIFICENT HARDEST ROCK

Edge of Fairfield Place with markers showing entry to driveway. Less habitat and cover will be left when driveway constructed.

Driveway location over "fortress of rock" - How much blasting required just for the wide driveway?

The flattest part of the building site for the house. A garden suite would be on more irregular terrain.

Garry Oak trees manage to grow in between the layers of rock.

Site is composed of the hardest igneous rock.

The rock types

Site has terraces of hard rock.
