

## PENTRELEW'S OLD AND MAGNIFICENT TREES

Large lungs of the earth - How much carbon dioxide do they absorb and how much oxygen do these produce?

Trees as tall as high-rises - How many trees needed to absorb carbon dioxide emissions from the residents of this 4-storey building?

Variety of trees - Do deciduous trees absorb carbon dioxide and produce oxygen when they have no leaves? Is that job done by coniferous trees in winter?

Two early attorney-generals, planted exotic trees, e.g., Sequoias, from the 1860s on.

Tree border - Help to absorb emissions from traffic and residents. How old are the bigger trees? How

"The Wait Is Over - Live Fully Now" - Ironical considering it will result in the demise of 31 mature trees. So "Bellewood" is actually "Less Woods".
