Dear Honourable John Horgan:

Re: Letter of Support – City of Victoria’s Resolutions B171 and B172

On behalf of the Alberni-Clayoquot Regional District Board of Directors, please accept this letter supporting the City of Victoria’s resolutions, (B71) Safer Drug Supply to Save Lives and (B172) Observed Inhalation Sites for Overdose Prevention, which were submitted at the 2019 UBCM Convention.

Unfortunately, the above resolutions did not make it on the floor at the 2019 Convention as the resolution’s session ran out of time.

Considering the fact that there is an opioid crisis across the Province, the Alberni-Clayoquot Regional District Board of Directors request the Provincial Government give favorable consideration to the City of Victoria’s resolutions, requesting that the Province of BC fund and work through local communities, Health Authorities across the Province, the Ministry of Mental Health and Addictions and the Ministry of Health to provide these services as part of a holistic response to the public-health emergency, including prevention, treatment and recovery.

Sincerely,

John Jack, Chair
Alberni-Clayoquot Regional District

City of Victoria, Mayor Helps
MLA, Scott Fraser
Minister of Mental Health and Addictions
Minister of Health

November 12, 2019

Dear UBCM Member Local Governments,

I am writing on behalf of Victoria City Council, requesting favourable consideration of these resolutions and that you share this support with the Provincial Government for the following resolutions. Unfortunately, despite the fact that we are have an opioid crisis across the Province, these resolutions did not make it onto the floor of the UBCM at this year's convention as the resolutions session ran out of time.

(B171) Safer Drug Supply to Save Lives

Whereas It has been two years since BC declared a public-health emergency due to increased overdoses, yet the death toll for those consuming substances continues to rise due to an unpredictable and highly-toxic drug supply;

And whereas people with opioid use disorder, a chronic relapsing medical condition, are at high risk of overdose- related harms including death and an estimated 42,200 people inject toxic substances in British Columbia, it is not possible for the treatment system to rapidly increase services fast enough to manage this number of people as "patients" within a medical treatment model given the many challenges in achieving and retaining the people on opioid use disorder treatment, people at risk of overdose in British Columbia do not have access to a safer alternative to the unpredictable, highly-toxic drug supply:

Therefore be it resolved that in an effort to save lives and reduce harm due to an unpredictable and highly-toxic drug supply, and as part of a holistic response to the public-health emergency, including prevention, treatment, and recovery, that the Province of British Columbia work with local communities, Health Authorities across the Province, the Ministry of Mental Health and Addictions, and the Ministry of Health ensure that people at risk of overdose harm have access to safer alternatives.

(B172) Observed Inhalation Sites for Overdose Prevention

Whereas British Columbia is currently experiencing an unprecedented public health emergency due to an unpredictable and highly-toxic drug supply, and smoking or inhalation is the second most common mode of consumption among all people who have died from a suspected illicit drug overdose and the most common mode of consumption among men and those between the ages of 15 and 29;

And whereas observed consumption services (i.e. supervised consumption services and overdose prevention services) are evidence-based harm reduction approaches shown to reduce overdose-related harm, and there is not adequate access to observed consumption services that provide space for inhalation where communities are facing crisis:

Therefore be it resolved that to ensure that people at risk of overdose across BC have access to observed consumption services that provide space for inhalation, that the Province of British Columbia fund and work through local communities, Health Authorities across the Province, the Ministry of Mental Health and Addictions and the Ministry of Health to provide these services as part of a holistic response to the public-health emergency, including prevention, treatment, and recovery.

We eagerly look forward to your support on this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lisa Helps', written over the printed name and title.
