

Attachment A: Victoria Police Department Comments

This area is across from the Royal Jubilee Hospital. It is mostly residential with some commercial and medical buildings. The Victoria Police Department does not have any site-specific comments with respect to this application. We would rely upon the existing fit and proper results through the LCRB and their background checks through the RCMP, and the community consultation process through the City of Victoria, Sustainable Planning and Community Development. The Victoria Police Department will not be conducting any further background investigation on the application, partly due to the lack of information in the application.
