

Appendix B – Victoria Police Department Comments

Given the information provided it is very difficult to provide an opinion on anything other than the location, which is appropriately in the downtown business district. Generally, properly licenced cannabis retail stores do not have an impact on police call load. However, this area of downtown has high incidents of property theft. I would recommend that this be taken into consideration when assessing the business security plan prior to approving this licence.

With respect to the applicant, VicPD would reply upon the existing fit and proper results through the licensing authority.
