Subject: Social Services Centre Zoning Amendment Bylaw, No. 24-052

To: The Mayor and City Councillors. I strongly disagree with this proposed amendment. What it is basically doing is giving city council the misguided opportunity to open mini-crime centres all over the city. Look no further than the experiences of homeowners and residents of Russell st. and homeowners and residents of the area around Tiny Town on Caledonia. Both areas were beset by theft , petty crime, threatening behavior, late night screaming and arguing, public defecation and illegal drug use, with the attendant danger of improperly disposed needles etc. I further strongly disagree with council making any decision on locating these centres without public input. This council has repeatedly gone against their own staff recommendations and continues to accept and approve projects that the tax paying public does not want. Please realize that any crime or property damage resulting from these centres will be your responsibility and your legacy to the city. May I suggest that you reserve naming rights for these centres in your honour. ie. the Alto centre, the Dell Centre etc
Thanks
