Dear Sir/Madam

I would like to place my objections to this proposals, i live in this neighborhood and i feel we already have far to many of these establishments in the area and as this is also very close to daycare's and schools/collage just very close buy we should be looking at closing these places down in the area rather than allowing expansion.

There has been a considerable increase in rather sketchy people hanging around these places and with such a family orientated area i feel its not in line of the feel of the neighborhood to allow more cannabis sales. The young people in the area are already subject to alot of these stores and the over use of cannabis is regrettably leading to a less motivated youth.

I hope you consider my points and not allow any further cannabis sales in this area along with any expansions etc, it would be useful to perhaps put more constructive activities into the area rather destructive drugs sales.

thnx
