

BYLAWS

4. Bylaws for Proposed Burnside Gorge Neighbourhood Plan and Official Community Plan Amendments

Motion:

It was moved by Councillor Young, seconded by Councillor Coleman, that the following bylaw **be given first and second reading:**

1. *Official Community Plan Bylaw, 2012, Amendment Bylaw (No. 19) No. 17-071*

Carried Unanimously

Motion:

It was moved by Councillor Young, seconded by Councillor Alto, that the following bylaw **be given first and second reading:**

1. *Official Community Plan Bylaw, 2012, Amendment Bylaw (No. 20) No. 17-072*

Carried Unanimously

Council Report

For the Meeting of June 22, 2017

To: Council **Date:** June 9, 2017
From: Jonathan Tinney, Sustainable Planning and Community Development
Subject: Proposed Burnside Gorge Neighbourhood Plan and OCP Amendments

RECOMMENDATION

1. That Council give first and second readings of Official Community Plan Amendment Bylaw (Bylaw No. 17-071) concerning Urban Place Designations in the Burnside Neighbourhood;
2. That Council give first and second readings of Official Community Plan Amendment Bylaw (Bylaw No. 17-072) concerning Development Permit Areas in the Burnside Neighbourhood;
3. That Bylaw Nos. 17-071 and 17-072 be considered at a Public Hearing;
4. That Council consider approval of the Burnside Gorge Neighbourhood Plan, 2017, at the same Council meeting at which the above Bylaws are considered and allow public comment.

BACKGROUND

The draft Burnside Gorge Neighbourhood Plan, content of proposed Official Community Plan (OCP) amendment bylaws and proposed consultation came before Council on March 9, 2017 where the following resolutions were approved:

1. Direct staff to prepare *Official Community Plan* (OCP) amendment bylaws to adjust urban place designations, expand development permit area boundaries and introduce new guidelines, and create a new heritage conservation area in accordance with the draft Burnside Gorge Neighbourhood Plan.
2. Consider consultation under Section 475(1) and 475(2) of the *Local Government Act* and direct staff to undertake consultation with those affected by the proposed amendments to the OCP as outlined in this report, prior to finalization of the amendment bylaws and the Public Hearing.
3. Consider consultation under Section 475(2)(b) of the *Local Government Act* and direct staff:
 - a. to refer the proposed amendments to the OCP to the Songhees Nation, the Esquimalt Nation, the School District Board, the Island Health Board of Directors and the District of Saanich; and
 - b. that no referrals are necessary to the Capital Regional District Board, the Councils of Oak Bay or Esquimalt, or the provincial or federal governments.
4. Refer the proposed development permit area boundary adjustments and new guidelines to the Advisory Design Panel for review and comment.
5. Refer the proposed heritage conservation area and statement of significance to the Heritage Advisory Panel for review and comment.

5. Refer the proposed heritage conservation area and statement of significance to the Heritage Advisory Panel for review and comment.
6. Refer the proposed Burnside Gorge Neighbourhood Plan to the meeting of Council at which the above OCP amendments will be considered, for consideration of final approval.

PUBLIC FEEDBACK

Staff sought input on these changes per Council direction. In addition, staff attended a meeting between Chief Thomas of Esquimalt Nation and Mayor Helps on May 9, and held a meeting for owners of properties in the proposed Manchester-Dunedin Heritage Conservation Area (HCA) on June 6. A summary of the engagement is attached, and engagement results can be found at www.victoria.ca/burnside.

CHANGES AND CONSIDERATIONS

Staff have made minor changes to the proposed OCP amendments which were first presented to Council on March 9, 2017, along with accompanying changes to the Draft Burnside Gorge Neighbourhood Plan. Further, staff do not recommend proceeding with the Manchester-Dunedin Heritage Conservation Area (HCA) at this time. These changes, and their rationale, follow:

1. In response to comments on the proposed Revitalization Guidelines for Corridors, Villages and Town Centres, staff have made adjustments to the guideline regarding treatment of corner buildings, emphasizing architectural features that turn the corner, rather than prescribing corner entries. Staff have also made some adjustments to remove redundancy and provide clarity.
2. In response to feedback that the proposed Industrial-Employment designation on the south side of Dunedin Street is not a compatible transition to the residential neighbourhood to the north, the proposed amendments were adjusted to leave this block in its current designation, General Employment. This change is reflected in the proposed neighbourhood plan.
3. In response to feedback that the proposed Manchester-Dunedin HCA did not provide a comprehensive approach to conservation of character in the Cecelia-Sumas area and was not supported in its current form by the owners, staff recommend not bringing this bylaw forward at this time. Rather, it is recommended that further consideration take place regarding the boundaries of a potential HCA as an implementation action of the neighbourhood plan, in order to identify a desired strategy to protect character in the Cecelia-Sumas and Gorge residential areas. This change is also reflected in the proposed neighbourhood plan. This is consistent with advice received from the Heritage Advisory Panel which recommended consideration of different HCA boundaries.
4. Further feedback was also received on the proposed Burnside Gorge Neighbourhood Plan policies. As a result, several small adjustments were made to these policies in order to:
 - a) clarify that flexibility is desired in planning for the lands south of Rock Bay, and that further planning is expected as Esquimalt Nation and Songhees Nation will be considering their aspirations for these lands;
 - b) clarify that along Gorge Road, multi-unit development should be compatible with adjacent lower-density development, that it would generally not be supported on one smaller existing lot, and that redevelopment should avoid the creation of "orphan" low-density properties in between higher-density properties.

- c) indicate that five-storey development may be supported on Gorge Road between Balfour Avenue and Washington Street if this development provides neighbourhood-serving commercial spaces at grade and if it can be designed to sensitively transition to lower density areas
- d) indicate support for the inclusion of 3-bedroom units in multi-unit development where this is appropriate.

CONCLUSIONS

Consideration of the proposed OCP amendments concurrent with approval of the Burnside Gorge Neighbourhood Plan will ensure the two documents are in alignment immediately, which will provide more clarity for the public, landowners and developers seeking to submit development proposals to the City, and for staff in providing development advice to applicants.

Respectfully submitted,

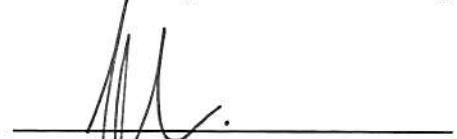

Marc Cittone
Senior Planner, Community Planning

A BYLAW OF THE CITY OF VICTORIA

The purpose of this Bylaw is to amend the Official Community Plan to make changes to Urban Place Designations in order to implement the future land use directions identified in the Burnside Gorge Neighbourhood Plan.

Under its statutory powers, including section 472 of the *Local Government Act*, the Council of the Corporation of the City of Victoria, in public meeting, enacts as follows:

Title

- 1 This Bylaw may be cited as “OFFICIAL COMMUNITY PLAN BYLAW, 2012, AMENDMENT BYLAW (No. 19)”.

Official Community Plan Bylaw

- 2 Bylaw No. 12-013, the Official Community Plan Bylaw, 2012, is amended in the Table of Contents, List of Maps, by replacing the text, “Map 19: Burnside Strategic Directions” with the text “Map 19: Burnside Neighbourhood”.
- 3 Bylaw No. 12-013, the Official Community Plan Bylaw, 2012, is amended in section 6: Land Management and Development, as follows:
 - a) By repealing Map 2: Urban Place Designations and replacing it with the Map 2: Urban Place Designations, which is attached to this Bylaw in Exhibit 1.
 - b) By deleting section 6.1.11 and replacing it with the following:

“6.1.11 **Industrial Employment** consists of light industrial areas where a range of manufacturing, processing, warehousing, distribution and repair activities occur. Ground floors include spaces appropriate for light to medium industry along with ancillary offices and retail sales. Upper floors may contain a range of light industrial or commercial uses, creating a mix of uses without displacing valuable space for industries.”
 - c) By adding the following sections immediately after section 6.1.13:

“6.1.14 **Employment-Residential** consists of a range of employment-generating uses, with a limited amount of residential uses generally on upper floors. This designation is considered appropriate in transitional areas where the potential for general employment space should be retained but where residential uses may be introduced. Employment-generating uses may include commercial uses, such as office, as well as light industrial uses where appropriate.

6.1.15 **Industrial Employment-Residential** consists of light industrial uses at ground level in order to preserve the City’s stock of lands for light industrial businesses. Upper levels may include commercial or residential uses. This designation is appropriate in transitional areas close to residential neighbourhoods, but not in the heart of the City’s industrial employment areas, as the types of light industrial uses which are compatible with residential uses are limited.”

- 4 The Official Community Plan Bylaw, 2012, is amended in section 6: Land Management and Development, Figure 8: Urban Place Guidelines as follows:

a) By deleting the row with the Designation “Town Centre” immediately after “Large Urban Village” and replacing it with the following:

Town Centre	<p>Low-rise, mid-rise and high-rise multi-unit buildings up to approximately 10 storeys including row-houses, apartments, freestanding commercial and mixed-use buildings.</p> <p>In Mayfair Town Centre, buildings up to approximately 12 storeys in the western half of the Mayfair Shopping Centre site, and along the west side of Douglas Street south of Speed Street.</p>	<p>Ground-oriented commercial and community services reinforce the sidewalk. Three to five storey building facades define the street wall. Regularly spaced street tree planting, wide sidewalks, and central public green space or square. Parking underground, at the rear or otherwise screened.</p>	<p>Low, mid and high-rise multi-unit residential and mixed-use. Commercial, including office, destination retail, and visitor accommodation. Live/work. Home occupations.</p>	<p>Total floor space ratios generally up to 2:1.</p> <p>Notwithstanding the above, for Mayfair Town Centre, total floor space ratios generally up to 1.5:1.</p> <p>Increased density up to a total of approximately 3:1 may be considered for the advancement of plan objectives.</p>
--------------------	--	---	---	---

b) By deleting the row with the Designation “Core Employment” immediately after “Core Business” and replacing it with the following:

Core Employment	<p>West of Douglas Street: Buildings up to approximately five storeys designed to accommodate light industrial uses on the ground floor and commercial or light industrial</p>	<p>Buildings set close to the street, wide sidewalks, regularly spaced tree planting and active uses at grade where appropriate. Green infrastructure.</p>	<p>Mix of predominantly industrial, light industrial, high technology, marine industrial, research and development, commercial, office and</p>	<p>Total floor space ratios up to approximately 3:1.</p> <p>Total floor space ratios ranging from a base of 3:1 to a maximum of 5:1 for the area south of</p>
------------------------	--	--	--	---

	<p>uses above. Building forms with at-grade spaces accommodating limited retail uses fronting onto Government Street south of Pembroke Street, and onto Store Street.</p> <p>Buildings from eight to approximately 15 storeys in height between Douglas Street and Blanshard Street.</p>	<p>Large parcels / lots.</p> <p>Institutional and industrial buildings with common courtyard open grounds internal to the site.</p> <p>Landscape screening for service and parking areas.</p>	<p>complimentary retail.</p> <p>Residential uses on upper floors in buildings containing light industrial and commercial uses are supported in the half-block on the north side of Chatham Street between Store Street and Government Street.</p> <p>Residential mixed-use, work/live, and commercial, including office, hotels and other visitor accommodation, located between Douglas Street and Blanshard Street.</p>	<p>Queens Avenue between Douglas Street and Blanshard Street.</p> <p>(Maximum residential floor space ratio of 3:1)</p>
--	--	---	---	---

c) By deleting the row with the Designation “Industrial” immediately after “Core Employment” and replacing it with the following:

Industrial Employment	<p>Light industrial or mixed-use buildings ranging from one storey to approximately four storeys, designed to support light industrial uses on the ground floor (e.g. with sufficient floor-to-ceiling</p>	<p>Ground-oriented buildings set close to the sidewalk with active uses at grade where appropriate.</p> <p>Sidewalks with regularly spaced tree planting.</p> <p>Off-street parking to the</p>	<p>Predominantly light industrial uses including manufacturing, processing, warehousing, distribution, and repair, as well as accessory retail or office uses, on the ground floor.</p> <p>Commercial (including limited retail) or light</p>	<p>Total floor space ratios up to 3:1 in the Burnside Gorge neighbourhood west of Bridge Street.</p> <p>Total floor space ratios ranging up to approximately 2:1 elsewhere.</p>
------------------------------	--	--	---	---

	heights, and loading bays).	rear or side-yard. Landscape screening for service and parking areas.	industrial uses on upper floors.	Of total floor space, upper-floor commercial uses may comprise up to 1.5:1 floor space ratio.
--	-----------------------------	--	----------------------------------	---

d) By inserting the following new row after the row with the Designation “Industrial Employment” and before “Marine Industrial”:

Industrial Employment-Residential	Buildings up to approximately five storeys, with ground floor designed to support light industrial uses (e.g. with sufficient floor-to-ceiling heights, and loading bays).	Ground-oriented buildings set close to the sidewalk. Off-street parking to the rear or side-yard. Landscape screening for service and parking areas.	Light industrial uses, as well as ancillary retail or office uses, on the ground floor. Residential, commercial or light industrial uses on upper floors. Industrial work/live uses. Along Cecelia Road, uses which activate the street or provide local services, including food services, may be supported, within buildings which are designed to accommodate light industrial tenants.	Total floor space ratio up to approximately 2.0 FSR. Of the total floor space, residential uses may comprise up to 1.5:1 floor space ratio.
--	--	--	---	--

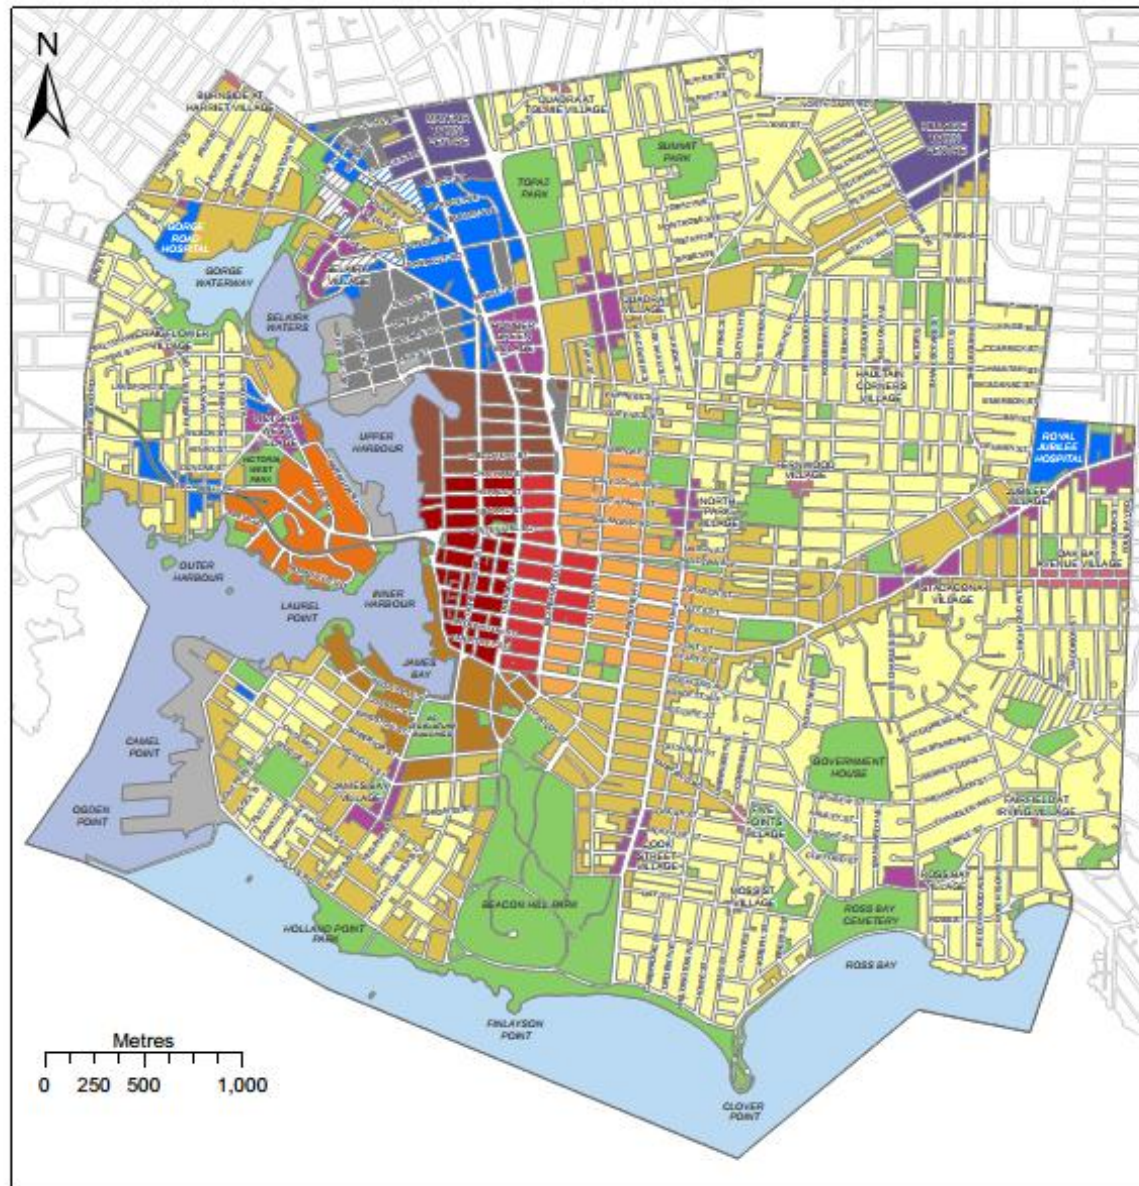

e) By deleting the row with the Designation “General Employment” immediately after “Marine Industrial” and replacing it with the following:

General Employment	<p>Large floor-plate buildings from one storey up to approximately four storeys.</p> <p>Buildings up to approximately six storeys in the following locations: adjacent to the Douglas-Hillside-Gorge-Government intersection; along the west side of Douglas Street north of Burnside Road; and along the east side of Douglas Street north of Spruce Avenue.</p> <p>Buildings up to 9 storeys or 10 storeys in select interior locations at Royal Jubilee Hospital.</p>	<p>Ground-oriented buildings set close to the sidewalk.</p> <p>Large lots with on-site outdoor circulation, storage, and materials handling space.</p> <p>Institutional and industrial buildings defining open grounds.</p> <p>Off-street parking to the rear or side-yard.</p> <p>Landscape screening for service and parking areas.</p>	<p>Commercial, including office and retail.</p> <p>Light industrial.</p> <p>Industrial work/live.</p> <p>Education, research and development, health services.</p>	<p>Total floor space ratios up to approximately 2:1.</p>
---------------------------	--	---	--	--

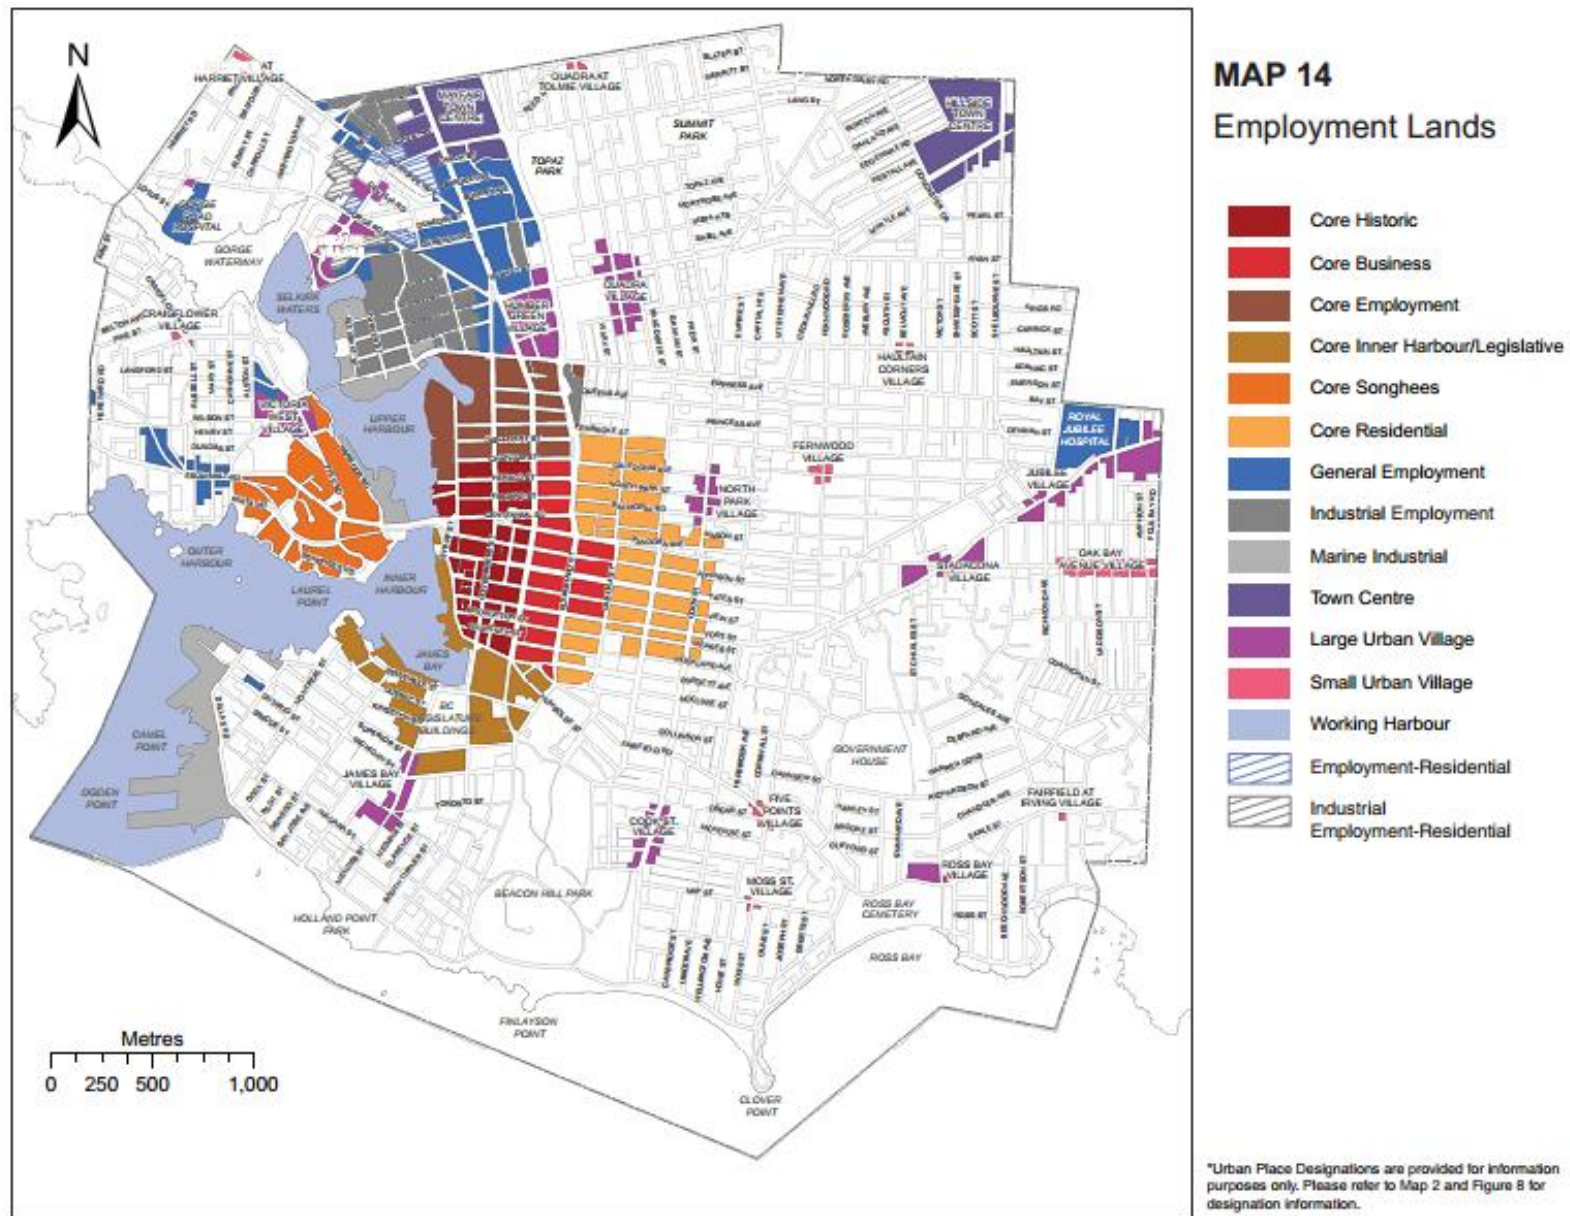

f) By inserting the following new row in Figure 8 after the row with the Designation “General Employment”:

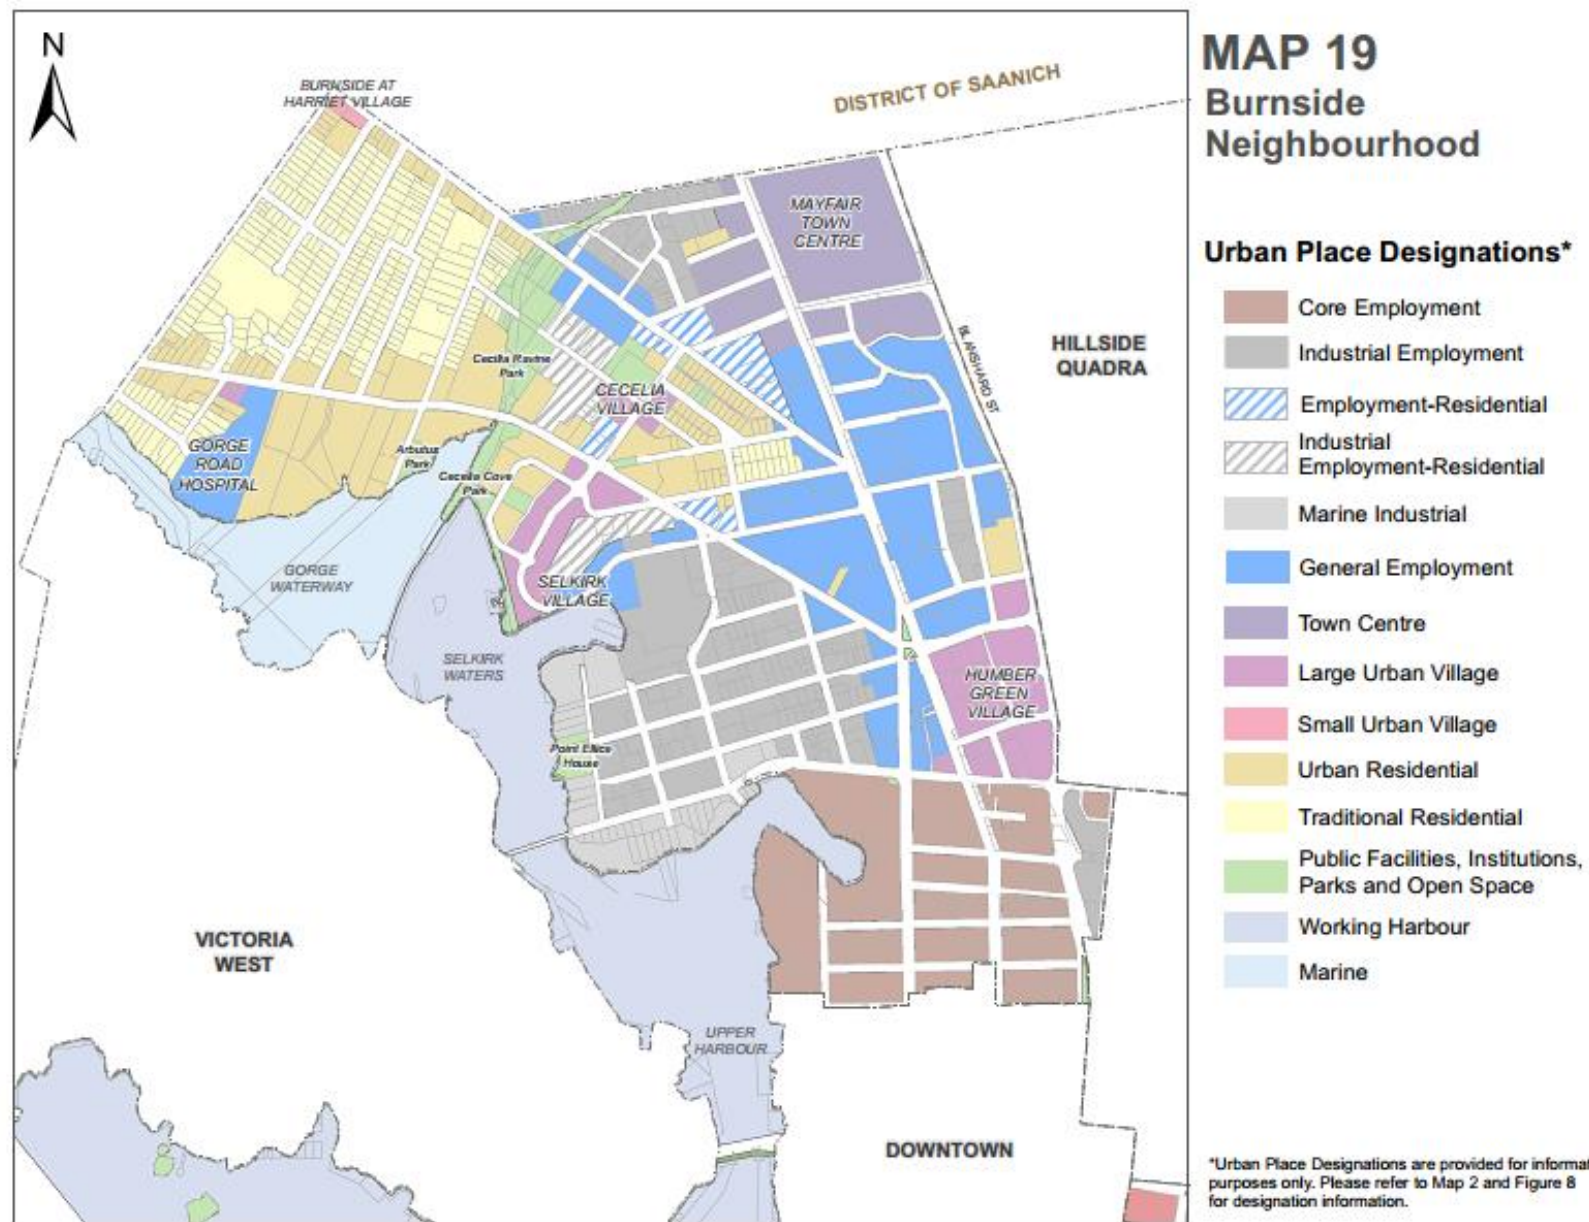

Employment-Residential	<p>Commercial, light industrial or mixed-use buildings up to approximately five storeys in height.</p>	<p>Ground-oriented buildings set close to the sidewalk.</p> <p>Off-street parking to the rear or side-yard.</p> <p>Landscape screening for</p>	<p>Commercial, including office and retail.</p> <p>Light industrial on the ground floor.</p> <p>Work-live.</p> <p>Residential uses on upper floors where commercial or</p>	<p>Total floor space ratios up to approximately 2.5:1.</p> <p>Of total floor space, upper-floor residential uses may comprise up to 1.5:1 floor space ratio.</p>
-------------------------------	--	--	--	--

MAP 2 Urban Place Designations

Urban Place Designations extend to the centerlines of adjacent streets.

A BYLAW OF THE CITY OF VICTORIA

The purpose of this Bylaw is to amend the Official Community Plan to make changes to Development Permit Area Boundaries and Designations in order to implement the directions identified in the Burnside Gorge Neighbourhood Plan.

Under its statutory powers, including section 472 of the *Local Government Act*, the Council of the Corporation of the City of Victoria, in an open meeting assembled, enacts the following provisions:

Title

- 1 This Bylaw may be cited as “OFFICIAL COMMUNITY PLAN BYLAW, 2012, AMENDMENT BYLAW (No. 20)”.

Official Community Plan Bylaw

- 2 Bylaw No. 12-013, the Official Community Plan Bylaw, 2012, is amended in the Table of Contents, List of Maps, as follows:
 - a) By inserting the text “Map 40A: DPA 5: Large Urban Villages – Cecelia” immediately after “Map 40: DPA 5: Large Urban Villages – Selkirk”.
 - b) By replacing the text “Map 46: DPA 5: Large Urban Villages – Humber Green Village” with the text “Map 46: DPA 5: Large Urban Villages – Gorge at Irma”.
 - c) By inserting the following text immediately after “Map 48: DPA 6A: Small Urban Villages”:

“Map 48A: DPA 6A: Small Urban Villages – Oak Bay Avenue Village
Map 48B: DPA 6A: Small Urban Villages – Burnside at Harriet”.
- 3 Bylaw No. 12-013, the Official Community Plan Bylaw, 2012, is amended in Appendix A: Development Permit Areas and Heritage Conservation Areas:
 - a) By repealing Map 32: Composite Map of Development Permit Areas and Heritage Conservation Areas and replacing it with Map 32: Composite Map of Development Permit Areas and Heritage Conservation Areas, which is attached to this Bylaw in Exhibit 2.
3. The Official Community Plan Bylaw, 2012, is amended in Appendix A: Development Permit Areas and Heritage Conservation Areas, DPA 4: Town Centres, as follows:
 - a) In section 5(b), by adding the following after section 5(b)(i)(1)(b):

“(ii) Mayfair Town Centre:

- (1) Design Guidelines for: Multi-Unit Residential, Commercial and Industrial (2012).
 - (2) Revitalization Guidelines for Corridors, Villages and Town Centres (2017)."
- b) By repealing Map 36: DPA 4: Town Centres and replacing it with Map 36: DPA 4: Town Centres, which is attached to this Bylaw in Exhibit 2.
- c) By repealing Map 37: DPA 4: Town Centre - Mayfair and replacing it with Map 37: DPA 4: Town Centre - Mayfair, which is attached to this Bylaw in Exhibit 2.
- 4. The Official Community Plan Bylaw, 2012, is amended in Appendix A: Development Permit Areas and Heritage Conservation Areas, DPA 5: Large Urban Villages, as follows:
 - a) In section 1, by inserting "40A," immediately after "40,".
 - b) By repealing Map 39: DPA 5: Large Urban Villages, and replacing it with Map 39: DPA 5: Large Urban Villages, which is attached to this Bylaw in Exhibit 2.
 - c) By repealing section 3(d) and replacing it with the following:

"(d) Cecelia Village is a mixed commercial, light industrial and residential area proximate to the Galloping Goose regional trail and the Selkirk Waterfront. It includes unique opportunities for mingling future light industrial spaces with commercial and residential uses to define a unique place and a destination for the neighbourhood. Over time, this part of Jutland Road is envisioned to evolve into a high street supported by quality urban design and public spaces. Revitalization is needed to realize this vision."
 - d) By inserting a new section 3(e) immediately after section 3(d):

"(e) Gorge at Irma Village has been identified as a desired location for transformation from single detached homes into a mixed-use urban village serving the surrounding neighbourhood, adjacent to employment uses and at the convergence of existing and planned pedestrian routes."
 - e) By renumbering subsequent sections 3(e) through 3(j) as new sections 3(f) through 3(k).
 - f) By inserting the following new section 5(b)(i):

"(i) Cecelia Village:

 - Design Guidelines for: Multi-Unit Residential, Commercial and Industrial (2012).
 - Revitalization Guidelines for Corridors, Villages and Town Centres (2017)."
 - g) By renumbering subsequent section 5(b)(i) as new section 5(b)(ii).
 - h) By adding the following new section 5(b)(iii) after new section 5(b)(ii):

"(iii) Gorge at Irma Village:

- › Design Guidelines for: Multi-Unit Residential, Commercial and Industrial (2012).
 - › Revitalization Guidelines for Corridors, Villages and Town Centres (2017).”
 - i) By renumbering subsequent sections 5(b)(iii) through 5(b)(vi) as new sections 5(b)(iv) through 5(b)(viii).
 - j) By repealing Map 40: DPA 5: Large Urban Villages – Selkirk and replacing it with Map 40: DPA 5: Large Urban Villages – Selkirk, which is attached to this Bylaw in Exhibit 2.
 - k) By adding Map 40A: DPA 5: Large Urban Villages – Cecelia, which is attached to this Bylaw in Exhibit 2, immediately after Map 40.
 - l) By repealing Map 46: DPA 5: Large Urban Villages – Humber Green Village and replacing it with Map 46: DPA 5: Large Urban Villages – Gorge at Irma, which is attached to this Bylaw in Exhibit 2.
5. The Official Community Plan Bylaw, 2012, is amended in Appendix A, DPA 6A: Small Urban Villages, as follows:
- a) In section 1, by deleting “Map 48” and replacing it with “Maps 48A and 48B”.
 - b) By adding the following subsection immediately after section 5(b)(i):
 - “(ii) to Burnside at Harriet Village:
 - › Design Guidelines for: Multi-Unit Residential, Commercial and Industrial (2012).
 - › Revitalization Guidelines for Corridors, Villages and Town Centres (2017).”
 - c) By deleting the name of Map 48, renaming it “Map 48A: DPA 6A: Small Urban Villages – Oak Bay Avenue Village”.
 - d) By moving Map 48A: DPA 6A: Small Urban Villages – Oak Bay Avenue Village from its current location to a new location immediately after section 5.
 - e) Immediately before section 1, by inserting a new Map 48: Small Urban Villages, which is attached to this Bylaw in Exhibit 2.
 - f) Immediately after Map 48A, by inserting a new map 48B: Small Urban Villages – Burnside at Harriet, which is attached to this Bylaw in Exhibit 2.
6. The Official Community Plan Bylaw, 2012, is amended in Appendix A, DPA 7A: Corridors, as follows:
- a) By repealing section 5(b)(i) and replacing it with the following:
 - “(i) Burnside Road East corridor:
 - › Design Guidelines for: Multi-Unit Residential, Commercial and Industrial (2012).
 - › Revitalization Guidelines for Corridors, Villages and Town Centres (2017).”
 - b) by repealing section 5(b)(ii) and replacing it with the following:

“(ii) Douglas-Blanshard Street corridor:

(a) For areas within this DPA located south of Bay Street, the following guidelines from the Downtown Core Area Plan (2011) apply:

➤ Section Three: Districts – with special attention to the following policies:

➤➤ 3.48 to 3.49;

➤➤ 3.57;

➤➤ 3.59;

➤➤ 3.61;

➤➤ 3.63.

➤ Section Five: Transportation and Mobility – with special attention to the following policies:

➤➤ 5.27 to 5.30;

➤ Section Six: Urban Design – with special attention to the following policies:

➤➤ 6.1 to 6.6;

➤➤ 6.18 to 6.24;

➤➤ 6.29;

➤➤ 6.36 to 6.55.6;

➤➤ 6.65 to 6.73;

➤➤ 6.139 to 6.140;

➤➤ 6.142 to 6.144;

➤➤ 6.164 to 6.171;

➤➤ 6.176 to 6.186.6.

➤ Section Seven: Heritage – with special attention to the following policies:

➤➤ 7.22.

(b) For areas within this DPA located north of Bay Street, the following guidelines apply:

➤ Design Guidelines for: Multi-Unit Residential, Commercial and Industrial (2012).

➤ Revitalization Guidelines for Corridors, Villages and Town Centres (2017).”

c) by repealing section 5(b)(iii) and replacing it with the following:

“(iii) Gorge Road East corridor:

➤ Design Guidelines for: Multi-Unit Residential, Commercial and Industrial (2012).

➤ Revitalization Guidelines for Corridors, Villages and Town Centres (2017).”

d) By repealing Map 50: DPA 7A: Corridors, and replacing it with Map 50: DPA 7A: Corridors, which is attached to this Bylaw in Exhibit 2.

e) By repealing Map 53: DPA 7A: Corridors – Douglas Street and Blanshard Street, and replacing it with Map 53: DPA 7A: Corridors – Douglas Street and Blanshard Street, which is attached in Exhibit 2.

- f) By repealing Map 54: DPA 7A: Corridors – Gorge Road East and replacing it with Map 54: DPA 7A: Corridors – Gorge Road East, which is attached to this Bylaw in Exhibit 2.
- g) By repealing Map 55: DPA 7A: Corridors – Burnside Road and replacing it Map 55: DPA 7A: Corridors – Burnside Road, which is attached to this Bylaw in Exhibit 2.

Revitalization Guidelines for Corridors, Villages and Town Centres

Revitalization Guidelines for Corridors, Villages and Town Centres

Preamble:

These guidelines apply to designated Corridors, Villages and Town Centres and are intended to supplement the *Design Guidelines For: Multi-Unit Residential, Commercial and Industrial, July 2012* which address form and character of developments across the city.

It is intended that both guideline documents will be considered together in conjunction with other applicable guidelines noted in each designated development permit area as detailed in the *Official Community Plan*. Collectively, the guidelines are intended to guide applicants in achieving new development and additions to existing buildings that result in design excellence, livability, and high-quality pedestrian environments. This is intended to contribute to sense of place and urbanism that is responsive to Victoria's context, while enabling flexibility and fostering creativity.

All visuals in this document are provided for illustrative purposes only to support description of the guidelines.

General Guidelines

1) Context and Streetscapes:

- a. Buildings flanking streets should create a sense of enclosure and human scale. To achieve this, buildings fronting streets should provide a "street wall" that is at a height approximately 1/2 to 1/3 the width of the flanking street. This can be expressed as a street-wall-to-street-width ratio range of approximately 1:2 to 1:3. For buildings located on corner sites, this principle should be applied to the facades facing both streets where possible.

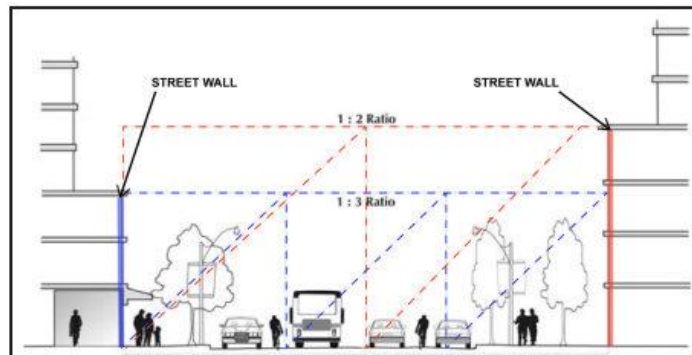

Figure 1: A building height-to-street-width ratio of between approximately 1:3 and 1:2 is recommended to frame streets and provide human scale. Portions of buildings above the street wall are encouraged to step back.

- b. To mitigate the visual impact of building height and to maximize sunlight exposure to the street, the upper portions of buildings above the street wall should be set back by at least two metres.
- c. Where an established pedestrian-friendly street wall exists, the front facade of new buildings should be generally aligned with adjacent buildings to create visual continuity along the streetscape.
- d. Buildings with commercial uses at grade should generally be built up to the sidewalk. Portions of the front facade may be set back from the front property line to accommodate features such as patios, courtyards or seating areas.
- e. Buildings should create "eyes on the street" and public spaces by orienting doorways, windows and balconies to overlook sidewalks, walkways, parks and other open spaces.
- f. Consider unique rooflines for taller buildings that have a visually prominent location (e.g. at corners, or at terminating vistas of streets) in order to create a distinct landmark.

2) Building Design:

- a. Building facades, especially those facing streets, should be well-designed and articulated with human-scale architectural features that create visual interest for pedestrians. Facade designs should consider the rhythm and pattern of existing building facades and architectural elements in the surrounding context, such as building articulation, rooflines, window placement, entryways, canopies and cornice lines.
- b. Large expanses of blank walls should be avoided. Where this is not possible, design treatments such as vertical plant materials, landscaping, art (e.g. mosaic, mural or relief) or the use of other building materials and building elements are encouraged to add visual interest.
- c. Weather protection for pedestrians should be provided in the following manner:
 - a) Individual canopies or awnings of sufficient depth should be provided to protect pedestrians from inclement weather, especially at building entrances.
 - b) The underside of canopies should be illuminated.
 - c) Canopies with translucent or frosted glazing are encouraged to maximize winter sunlight, particularly for north-facing facades.
- d. For buildings located on a corner, the corner design should include an architectural feature that addresses and emphasizes the corner. Strategies to achieve this include but are not limited to a chamfered or setback corner, prominent glazing, or a primary building entrance oriented to the corner.
- e. The first storey of a mixed-use or commercial building should be designed with a minimum floor-to-ceiling height of at least 4m and a minimum depth of approximately 10 metres to accommodate a range of commercial uses.
- f. Buildings with commercial uses at grade should be designed with a series of modulated storefronts and entrances, with transparent glazing. This design strategy is encouraged even where the building has a single tenant or use.

Figure 2: Modulated, transparent storefronts create interest for pedestrians and encourage activity along the street.

- g. Buildings that extend along sloping sites should be designed to follow and respond to the natural topography while maintaining a strong relationship of facades and building entrances to the street. Where retaining walls are unavoidable, they should be designed to ensure that they do not negatively impact the pedestrian experience along adjacent sidewalks.

3) Parking:

- a. Parking should be located underground or to the rear of buildings to provide human scale pedestrian environments. Where rear yard surface parking is proposed, building designs and landscaping interventions should be employed so that parking is integrated into sites in a manner that results in an attractive and safe environment.

4) Livability:

- a. Where two or more buildings are located on a single site, or where a single structure contains two or more building elements above a common base or podium, a comfortable separation space should be provided for residential units, with consideration for window placement, sunlight penetration to residential units, and adequate spaces for landscaping.

Figure 3: Comfortable separation space allows for sunlight access to individual units and outdoor spaces.

- b. Multi-unit buildings should be designed to provide a sensitive transition in scale to adjacent, smaller developments through considerations for massing and other design features. Strategies to achieve this may include but are not limited to setting upper storeys back, varying roof lines, siting or scaling buildings to reduce shading, etc.
- c. Residential building designs are strongly encouraged to include common outdoor space such as landscaped courtyards or rooftops, where possible.
- d. Buildings with residential use should be designed so that units receive daylight and natural ventilation from at least two sides of the building, or from one side and a roof. Where possible, provide dwelling units with a choice of aspect: front and back, or on two sides (for corner units).
- e. Residential buildings located along busy arterial streets should incorporate design features that minimize noise and pollution impacts (e.g. triple-pane glazing, residential units oriented towards courtyards, design of residential units with multiple orientations or side orientations, and building air intakes located away from the road).
- f. As a means to improve privacy between adjacent buildings, consider design solutions such as window size, window height, window placement and orientation, exterior landscaping, privacy screens or the use of frosted glazing on balconies.
- g. Pedestrian walkways that connect the primary entrance of multi-unit residential or commercial buildings with the adjacent public sidewalk should be a minimum of 2m wide and distinguishable from driving surfaces by using varied paving treatments.

5) Materials and Finishes:

- a. Exterior materials that are high quality, durable and capable of withstanding a range of environmental conditions throughout the year are strongly encouraged, particularly on lower portions of buildings that are more closely experienced by pedestrians. High quality building materials include but are not limited to:
 - Natural wood
 - Composite materials
 - Brick masonry
 - Glazed tile
 - Stone
 - Concrete
 - Flat profile "slate" concrete tiles
 - Glass and wood for window assemblies
 - Standing seam metal roofing
- b. Light-coloured, heat reflective and permeable paving materials are encouraged for hard surfaces such as parking areas, walkways, patios and courtyards as a means to reduce storm water run-off and reduce heat-island effects. Light-coloured or heat reflective materials are also encouraged for rooftops to reduce heat island effects.

6) Landscaping and Open Space:

- a. Buildings that include residential units should include private open space (e.g. balconies, porches) or easily accessed shared open space in the form of courtyards, green spaces, terraces, yards, play areas or rooftop gardens.
- b. The rear yard of multi-unit or mixed-use buildings adjacent to lower scale residential development should provide landscaping and trees that mitigate the appearance of massing and contribute to a transition in scale.
- c. Landscape design should consider the local climate and water efficiency through species selection, including selection of draught-tolerant species, efficient irrigation systems or design of unirrigated landscapes, use of run-off for irrigation, presence of rain gardens and other approaches.
- d. Consider features in landscaping or open space that add to sociability, such as shared areas to sit, garden plots, play areas, balconies fronting courts, etc.

Area-Specific Guidelines:

In addition to the General Guidelines, the following guidelines apply to each specific designated area.

1) Mayfair Town Centre:

- a. Taller buildings should generally be focused in the western part of the site, near Douglas Street.
- b. Design taller buildings to have a clear architectural distinction between the base (podium or street wall portion), middle and upper portion of the building.
- c. The podium base or street wall portion of buildings are encouraged to be three to five storeys (approximately 10-15m) in height.
- d. Major redevelopment of the Mayfair Shopping Centre should incorporate an internal network of pedestrian-friendly streets and connections between Speed Street, Nanaimo Street and Oak Street in order to create a structure of city blocks and to support permeability for pedestrians, cyclists and vehicles.

Figure 5: Major redevelopment of the Mayfair Shopping Centre site should establish an internal block structure connecting to adjacent streets.

- e. Building design should emphasize Douglas Street as the primary retail street of the Mayfair Town Centre. However, building designs should not “turn their back” on adjacent streets. Instead, provide facades that address all street frontages and are consistent with the General Guidelines for Building Designs (section 2).
- f. Building design that results in a landmark expression is encouraged at the intersection of Douglas and Finlayson Streets.
- g. The tower portions of buildings above six storeys in height should generally be sited and designed to maintain access to sunlight, with a sufficient face-to-face separation distance between towers on the same site, and a sufficient clear distance to lot lines abutting other developable parcels. A desired face-to-face separation distance for towers at the Mayfair Shopping Centre site (the area bounded by Douglas Street, Nanaimo Street, Blanshard Street and Tolmie Avenue) is 25 metres.

2) Gorge at Irma Village:

- a. Development within this village should create multiple smaller storefronts facing Gorge Road and turning the corner onto Irma Street to support a variety of neighbourhood-oriented commercial uses.

3) Douglas-Blanshard Corridor:

- a. In the Humber Green area between Douglas and Blanshard Streets, residential units are encouraged to be oriented to inner courtyards or quieter interior streets to mitigate noise impacts from adjacent arterial traffic. However, building designs should not “turn their backs” to Douglas and Blanshard Streets. Instead, provide facades that address all street frontages and are consistent with the General Guidelines for Building Designs (SECTION 2).

4) Gorge Road East Corridor

- a. Redevelopment along Gorge Road East should consider site planning and building massing to preserve and enhance view corridors looking south from Balfour Street and Carroll Street toward the Olympic Mountains.

Engagement Summary: Burnside Gorge Neighbourhood Plan

Proposed Changes to the Official Community Plan

May 2017

Background

The Draft Burnside Gorge Neighbourhood Plan is intended to help guide growth and future development over the next 25 years. The plan provides guidance land use, transportation, parks and open spaces and more. The changes to land use require amending the Official Community Plan. These changes include:

- New Urban Place Designations to support the development of new housing and urban villages
- Changes to boundaries and guidelines for development permit areas to support new development that is sensitive to the existing neighbourhood
- The establishment of a Heritage Conservation Area in the Manchester-Dunedin block to protect this unique historic area

These proposed changes were presented to the community at a public open house on Wednesday April 5, attended by approximately 30 people, and through an online survey, 22 responses received. The survey report and written feedback from the open house are attached.

Engagement Summary

The survey and open house feedback demonstrated a high level of support for the urban place designations and the revitalization guidelines.

Burnside Gorge neighbours provided the following additional recommendations:

- Find ways to improve transition areas:
 - Industrial to residential uses on Dunedin Avenue
 - Higher density to lower density development on Gorge Road
- Encourage more 3-bedroom units in the urban residential and village areas
- Consider limiting storey heights north of Gorge Road adjacent to existing lower-density homes
- Consider supporting taller (5 storey) buildings on the north side of Gorge Road if neighbourhood-serving commercial uses are included
- Consider the importance of Jutland Road and Burnside Road for truck traffic serving businesses in the Rock Bay area
- Focus on architectural design for corner entries and blank walls. Proposed design guidelines are too restrictive
- Protect mature trees and sunlight for neighbours

For the proposed Heritage Conservation Area, survey respondents and open house participants were mostly neutral. Many felt it should be up to the homeowners to determine. A workshop was held with the homeowners in the area. There were nine participants at the meeting representing six homes of the 18 in the proposed area. We heard that while the homeowners are very appreciative of the heritage architecture and the history of the area, they have significant concerns about isolating their block for a Heritage Conservation Area, without creating a larger plan for the preservation of neighbourhood heritage. They would like to see a vision for the neighbourhood that includes a broader plan for heritage

conservation, including investments from the City such as signage, and a commitment to improving some of the challenges the neighbourhood faces. The City also received a letter from a homeowner in the area who supported of the establishment of a Heritage Conservation Area.

Referrals

Staff referred the proposed changes to the following entities: Esquimalt Nation, Songhees Nation, Island Health, the District of Saanich, and the Greater Victoria School District.

May 11, 2017

City of Victoria
1 Centennial Square
Victoria, BC V8W 1P6

Attn: Marc Cittone, Community Planning

Dear Mr. Cittone:

Re: Burnside Gorge Neighbourhood Plan • OCP Amendment Referral
File: 2330-30

Thank you for providing the District of Saanich with a copy of the proposed OCP amendments and summary. Saanich Planning staff have reviewed the proposed amendments and offer the following comments for your consideration:

Proposed OCP Amendments to Urban Place Designations

1. Buildings of up to approximately 12 storeys on the Mayfair Mall "Town Centre" site, specifically on "the western half of the Mayfair Shopping Centre site, and along the west side of Douglas Street south of Speed Street" are generally consistent with the preliminary direction of the Uptown – Douglas Corridor Plan that the District is currently developing.
2. The proposed changes on Burnside Road and Harriet Road would generally be compatible with the surrounding neighbourhood in Saanich.

Revitalization Guidelines for Corridors, Villages and Town Centres

3. There are some specific guidelines identified for the Mayfair Town Centre that note that "taller buildings should be focused on the western part of the site near Douglas Street" and that "building design that results in landmark expression" at Douglas Street and Finlayson Street as well as emphasizing that "Douglas street is the primary retail street of the Mayfair Town Centre".

From a staff perspective, there is no concern with this direction, however specific guidelines for frontage treatments on the Mayfair site along Tolmie Avenue (facing north and directly adjacent to the District of Saanich boundary) are notably absent. The concern is that the emphasis on design requirements for both Douglas Street and Finlayson Street frontages could result in developments that treat the Tolmie Avenue and Blanshard Street frontages as the "rear" of the building/ development site by default.

The following guidelines address this concern to a certain extent, however further language could help to ensure the Tolmie Avenue and Blanshard Street frontages are well addressed:

- Section 2.a – notes that building facades facing streets should be well designed and articulated; and

- Section 2.b – that “large expanses of blank walls should be avoided. Where not possible, such as the back of buildings, design treatments such as vertical plant material, landscaping...should be added...”

This treatment of the Tolmie Avenue and Blanshard Street frontages as the “rear” of the site is not consistent with the direction of the Uptown – Douglas Corridor Plan or the overall objectives for Tolmie Avenue and Oak Street. Planning staff recommend including a policy and/or design guidelines that ensures these important frontages do not do not end up become loading areas or areas that function as the “rear” of the site.

Thank you for the opportunity to comment on the proposed Official Community Plan Amendments. If you have any questions, I can be reached by telephone at 250-475-7115 or by email at cameron.scott@saanich.ca.

Sincerely,

Cameron Scott
Manager of Community Planning

6. Proposed HCA 1 - Manchester-Dunedin

Marc Cittone, Senior Planner, Community Planning, provided a brief overview of the process in drafting the updated Burnside-Gorge Neighbourhood Plan and the proposed Heritage Conservation Area 1 - Manchester-Dunedin. The proposed HCA consists of single family dwellings constructed in 1913 or earlier (one in 1893).

Panel Questions and Comments

- Members are surprised that these houses have survived and are pleased that they will be part of an HCA.
- Are any of the houses owned by John Howard Society? Marc does not know.
- Marc: In the neighbourhood plan, a policy statement will encourage designation as a condition of rezoning and/or an increase in density.
- Has there been consultation with the owners in the HCA? If so, what will they be told about the purpose of the HCA? Adrian: There will be consultation owner by owner. The purpose is simply to preserve heritage characteristics. Owners will be asked why they value the area and if they support preserving it for future generations.
- Are the houses in the proposed HCA occupied by owners? Marc: We do not know right now, but we will generate a mailing list. Panel: For buy in, it is best if the houses are owner occupied and are not businesses. There is evidence that property values increase in an HCA as it creates a sense of community. HCAs may be viewed by owners as more favourable than placement on the Heritage Register. Could the City provide small grants to owners in HCAs?
- The HCA should include both sides of the street to increase the neighbourhood ambience and encourage the design and upkeep of all buildings in the HCA.

Moved

Seconded

That the Panel support proposed Heritage Conservation Area 1 - Manchester-Dunedin.

Carried (unanimous)

7. Business Arising from the February 14, 2017 Minutes - nil

8. New Business

- First Shaughnessy Heritage Conservation Area - to be discussed at a future meeting.

9. Adjournment - 1:25 pm

**MINUTES OF THE
ADVISORY DESIGN PANEL MEETING
HELD WEDNESDAY APRIL 26, 2017 AT 12:00 P.M.**

3. APPLICATIONS

**3.2 Burnside Gorge Neighbourhood Plan Implementation:
Proposed Development Permit Areas and Guidelines**

Mr. Batallas provided the Panel with a brief introduction of the Neighbourhood Plan and the areas that Council is seeking advice on, including the following:

- new or Revised Development Permit Area Boundaries
- application of the existing *Guidelines for: Multi-Unit Residential, Commercial and Industrial* to the proposed Development Permit Areas
- application of a new set of *Revitalization Guidelines for Corridors, Villages and Centres* to the proposed Development Permit Areas

Questions of clarification were asked by the Panel on the following:

- Burnside Gorge is defined by heavy traffic and difficult connection to downtown. How does that integrate with bikes and cars, etc.?
 - it was one of the biggest items of developing the plan, which has some very specific proposed uses of multi-use roads and bike paths for downtown, cross walks for pedestrians, and connections to the water. Lots of captured items for walking, cycling, and road use
- Rock Bay neighbourhood has no residential component, is there any consideration to that?
 - yes, in the plan there is extensive talk about creating a more central village and changing the uses so that they can create residential closer to these industrial areas that need to be protected
- do these Guidelines help address some of the issues that the Panel had with Mayfair mall when it was presented to the ADP? Specifically looking at connectivity to street and entranceways on corners
 - this comment may be too fine-grained for a policy document
 - the Guidelines talk of incorporation of an internal network and increased connections along specific streets for pedestrians, cyclists and vehicles

The panel endorses the direction of the Proposed Development Permit Areas and Guidelines, and does not have any specific recommendations for the Guidelines.

Burnside Local Area Plan Timeline

1. Introduction

The Burnside Gorge Neighbourhood Plan provides detailed policies to guide future development and change in the Burnside Gorge community over the next 25 years. It identifies potential public and private sector investments and initiatives that support the community's vision for the future.

Community members, including residents, business owners, employees, and community groups, were very involved in the Burnside Gorge neighbourhood planning process, which took place in two phases in 2015-2016.

Beginning in the spring of 2015, more than 1,500 people provided input through a number of events held in the community, including both City and citizen-led workshops, meetings with key stakeholder groups, and an online survey. Engagement focused on identifying community values, local issues, and opportunities specific to the Burnside Gorge area. This included more than 40 events, more than 300 surveys and 2,300 interactions on social media.

In the second phase of engagement, the community was presented with multiple options for future change and growth based around five theme areas that emerged from feedback collected in Phase 1:

- Transportation & Mobility
- Parks, Recreation & Trails
- Urban Villages
- Housing
- Employment Lands: Commercial and Industrial

This was followed by three collaborative design workshops (charrettes) which brought together stakeholders representing residents, businesses and landowners in February 2016 to refine the vision for the residential areas and urban villages; the Rock Bay area; and the Douglas Street Corridor.

Key issues and opportunities that were identified throughout the planning process informed the contents of this plan, which is organized by the themes covered throughout the planning process.

The sections of the plan include:

- A summary of the “Big Moves” for the neighbourhood
- Land Use and Urban Design
- Heritage
- Transportation and Mobility
- Infrastructure and Environment
- Parks, Trails, and Open Space
- Business Vitality
- Arts and Culture
- Public Benefits Priorities
- Implementation Strategy

1.1 How to Use this Plan

The neighbourhood plan serves as a guide for future development within the Burnside Gorge Neighbourhood. It also provides guidance to consider programs, projects and partnerships that help achieve the vision of the plan.

What is a Neighbourhood Plan?

Neighbourhood plans outline how a particular area should grow and change over time. They provide detailed, block-by-block guidance on the location and types of housing, shops, offices and other types of development that are envisioned for the area. They also provide guidance on what the buildings and private and public spaces look like (urban design). In addition to addressing land use and urban design, neighbourhood plans often provide details on future transportation, parks and community facilities, as well as other topics that are important to the people who live, work and visit in the area.

The neighbourhood plan helps guide future development by refining the Official Community Plan (OCP) direction for appropriate density, form and design of new development and adjacent streetscapes. The OCP remains the City's guiding bylaw for considering new development, and where conflicts arise, the OCP takes precedence. The OCP defines Development Permit Areas which include guidelines for the form and character of new development. The OCP will be reviewed so that the two documents are in alignment when the plan is presented to Council.

Purpose of the Neighbourhood Plan

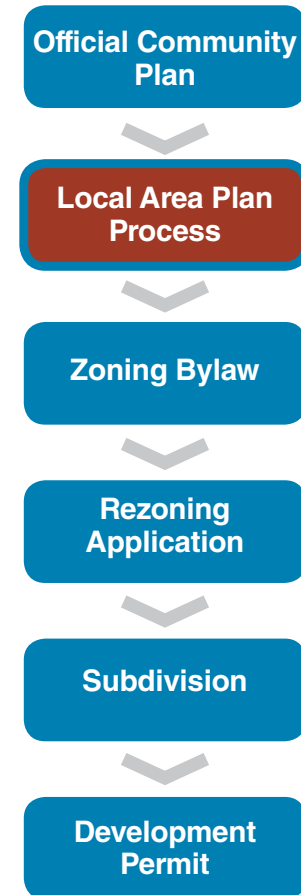

The purpose of the Burnside Gorge Neighbourhood Plan is to create a vision for the neighbourhood and provide a detailed policy guidance and an implementation strategy. The Plan is future-oriented

and illustrates how the area is to be developed over a long period through a series of public and private sector initiatives. The Plan will be implemented over a 20-30 year time frame, although regular monitoring will take place throughout the life of the plan.

The main elements that the Burnside Gorge Neighbourhood Plan addresses are:

- A vision, guiding principles and goals to guide development and improvement
- Translation of strategic policies from the OCP to the local area level
- Establishment of urban design and land use policies to achieve the vision
- Identification of key pedestrian and bicycling connections in the neighbourhood
- Creation of an interconnected, well-distributed system of high quality public spaces and community parks
- A clear urban design approach for new development, which will guide decision makers, including Council, on Rezoning and Development Permit applications

The neighbourhood plan also guides future projects or programs which can be considered for inclusion in the City's capital plan or general operations which can be funded in whole or in part as amenities resulting from development; or which might be achieved through partnerships with the community.

How the Local Area Plan fits into the planning process

2. Project Context

2.1 Neighbourhood Context

The Burnside Gorge neighbourhood is a diverse area unique in its mix of residential, commercial, and industrial areas. It is located in the northwest corner of the City of Victoria and is crossed by several major roads, including Douglas Street, Burnside Road East, and Gorge Road East. In 2011, it was home to nearly 6,000 residents in 2,800 households. Approximately 75% of housing units were apartment units, with the remainder being ground-oriented homes such as detached homes, suites, duplexes or townhomes. The neighbourhood is also home to over 1,400 private and public sector employers that provide jobs for more than 14,500 people.

The neighbourhood is comprised of four sub-areas:

- Gorge Sub-Area:** The largely residential neighbourhood west of Cecelia Ravine, characterized by primarily ground-oriented housing with multi-unit housing along Burnside Corridor, and a mix of multi-unit housing and tourist accommodations along Gorge Road, the former Island Highway.
- Selkirk and Cecelia Village:** A mixed use area including Selkirk Urban Village and the residential and employment areas around Cecelia and Jutland Roads.
- Rock Bay:** A largely industrial area spanning from the downtown to Selkirk and Cecelia Village. This area is the City's primary industrial land area.
- Douglas Corridor:** A mixed employment area along Douglas Street, stretching east to Blanshard Street.

Map 1: overview map of the Burnside Gorge Neighbourhood

2.2 Historical Context

History of Burnside Gorge Neighbourhood

Burnside Gorge neighbourhood was an area of early coastal settlement for First Nations peoples. For thousands of years before the arrival of the Hudson's Bay Company, the Songhees and Esquimalt Nations – part of the Coast Salish people – used the shores of the Upper Harbour and the Gorge where they lived in large cedar houses, in extended self-governing family groups. Each household group claimed specific areas for living, hunting, fishing, and plant collection. The Gorge, known as Camossung, is a very significant First Nations site.

In 1843 the Hudson's Bay Company (HBC) built Fort Victoria and became the administrative authority on the Coast. HBC was charged by the Colonial Office in London with promoting colonization and land sales. Much of the land, which is now Burnside Gorge neighbourhood, was sold to Company employees and retirees; Roderick Finlayson, John Work, and James Yates all created pioneer farms on vast acreages in the Burnside Gorge area.

Initially the only means of access was by water, but once land-transportation routes were established, these holdings were settled as some of Victoria's first suburbs, beginning in 1861. The City's wealthy businessmen, politicians, and professionals built grand mansions such as 'Ashnola' and 'The Dingle'. Many of these old mansions have disappeared in the wake of neighbourhood redevelopment, particularly after Gorge Road became the Island Highway, connecting Victoria to the rest of Vancouver Island.

By the 1860s, Douglas Street had been extended northwards and bridges were built at Point Ellice and Rock Bay, as well as across some of the streams draining into the Gorge. With the advent of streetcars, a car barn was built on Pembroke Street. Despite the collapse of the Point Ellice Bridge – caused by overloading and the worst streetcar accident in Canadian history – they continued to be the City's predominant form of local transit until 1946 when the Garbally bus yard was established on Gorge Road. Other rail lines passed through the area, connecting Victoria with the Saanich peninsula and several ports to the north. The Canadian Northern Pacific Railway constructed the Selkirk Trestle over the Gorge, which

allowed logs from Vancouver Island's forests to be brought to the sawmills in the Upper Harbour.

Over the years industrial activity spread northwards onto reclaimed land between Bridge and Garbally Streets, and in this area small industry still survives while the heavy industry in the Upper Harbour has been significantly reduced. Along with industry came power generation; the Victoria Gas Company, founded in 1860, provided the city's first generating station, for domestic as well as industrial use. In 1928, the Burnside Gorge neighbourhood became home to the British Columbia Electric Power & Gas Company's Bay Street Sub-Station.

Burnside Gorge has also contributed greatly in the draw of visitors to the city. The Gorge waterway has been a place of recreation and sport since the early days of the Royal Navy holding regattas in the nearby Esquimalt harbour, frequently accompanied by First Nation canoes. The rise in tourism was reflected in the increase of motels on Gorge Road after it became the Island Highway in 1915. Today, dragon boats, recreational kayaks, and canoes based in Selkirk Village also use the waterway.

2.3 Neighbourhood Issues and Analysis

Future Housing and Housing Diversity

Neighbourhood stakeholders have expressed a strong interest in supporting additional housing choices, including housing attractive to families with children, to accommodate new residents, revitalize the neighbourhood, and support local retail, services, and amenities. With the majority of the land base already developed, opportunities for new housing exist primarily along arterial street corridors and in urban villages. Further opportunities exist to add ground-oriented housing such as attached and detached townhomes which fit the character of the neighbourhood and can attract more families with children. This will build on the current pattern of development and add to the limited residential base (approx. 350 units) at Selkirk Village while respecting lower-density residential areas.

Local Gathering Places

The lack of local shops, entertainment and gathering places within comfortable walking distance of residents and employees is a key challenge. Businesses in Selkirk Village currently serve the daytime office population and largely close outside of business hours, while the Village itself is not easily accessible on foot. A nearby retail village on Burnside Road in Saanich suffers from lack of investment in new businesses, buildings and public realm. Enhancing the role of existing villages and locating (a) new urban village(s) were identified as key planning goals. To be successful, villages will need to be easily accessible by residents and workers.

Pedestrian and Bicycle Environment

Burnside Gorge neighbourhood is a gateway to Victoria, with over 100,000 person trips and freight movements daily. While important to the economy, this impacts the neighbourhood which is divided by busy arterial streets designed in an era when pedestrian, cycling and transit were not high priorities. Unlike

other city neighbourhoods, the block pattern in Burnside Gorge does not easily facilitate pedestrian access to the Galloping Goose, urban villages and parks. Not surprisingly, residents of Burnside Gorge depend on the automobile more than other Victoria neighbourhoods. Neighbourhood cohesion – and connecting to the rest of the City – are key concerns. With 42% of trips being local and the remainder being regional this means supporting all modes including walking, cycling and transit.

Access to the Waterfront

Burnside Gorge is a shoreline neighbourhood and the Gorge waterway is an important place for the Coast Salish people. Before its industrial use, it was also a place for recreation for Victorians. However, almost all of the shoreline is privately owned west of Selkirk Village, or in industrial use east of Selkirk Village. Public access to the shoreline, particularly west of Selkirk Village where the City holds several easements, is among the highest priorities for the neighbourhood.

Access to Greenspace

Access to quality recreational and open spaces is a key to quality of life. Most Burnside Gorge residents live within 400 metres of at least one park, but the neighbourhood overall lacks a broad variety of easily accessible, quality green spaces. With 75% of housing units in multi-family buildings, access to a variety of open space and activities is essential. A 2016 land acquisition will expand Cecelia Ravine Park.

Industry and Employment

The industrial and general employment land in the Rock Bay area is Victoria's primary reserve of land for businesses engaged in the production, distribution and repair of goods and equipment. It contains 20% of the City's jobs and constitutes 12.5% of the City's (and 80% of Burnside Gorge's) tax base. This land will be increasingly in short supply in our region, according to projections from the Capital Regional District.

This district comprises two distinct uses: heavier industries dependent on access to the Upper Harbour, and a diverse district of small businesses related to sectors such as design, artisan production, service, high tech, food and beverage production including breweries, and construction. A variety of businesses are drawn to the areas affordable rents and eclectic character. Central to workforce, customers and work sites and adjacent to downtown, it is an ideal location for companies that cluster here. These businesses provide often well-paying jobs outside of the tourism, government and professional services sectors found downtown, while supporting the broader economy. Protecting and enhancing these lands is a key concern. At the same time, many of the area's buildings do not meet the needs of new businesses, and reinvestment is needed for to attract and retain businesses.

In 2009, the CRD estimated that our region will need an additional 156 acres of industrial land within the core municipalities of Victoria, Saanich, Esquimalt and Oak Bay, providing space for an additional 2,893 employees. Translated into floor area, this equals approximately 1,560,000 sq. feet of floor area developed at 0.23 Floor Space Ratio (FSR).

Douglas Corridor

The Douglas Corridor is the future Rapid Transit spine of the region - currently 46% of person-trips on Douglas Street are by bus. However, this area has evolved as a largely automobile-oriented commercial and employment area characterized by a mix of retail and services, auto sales, accommodations, and offices. Pockets of housing and heritage buildings are also found, particularly in the Humber Green (Five Points) area. The Corridor is now evolving, with an opportunity to create several strong transit oriented development nodes. Two areas have been identified by BC Transit for future Rapid Transit stations: Mayfair Town Centre and Humber Green. These areas provide the opportunity for new investment.

- 1 maker of fishing reels and tackle
- 1 developer of environmentally friendly food packaging
- 1 kombucha brewery
- 1 asphalt manufacturer

2.5 Policy Context

The proposed changes in this plan have been informed by community feedback, as well as Citywide plans and policies.

Official Community Plan

The Official Community Plan (OCP, 2012) establishes high-level policies that guide and coordinate land use and investment in the community towards a common future vision. The OCP vision for Victoria integrates sustainability principles and an innovative land management approach that seeks to build a healthy, vibrant and thriving community. Shaped by input from more than 6,000 citizens, the OCP reflects the community's desire for walkable neighbourhoods, a vibrant Downtown core, and areas of unique character and sense of place.

The OCP calls for accommodating 20,000 new residents, half downtown and half in Victoria's neighbourhoods, by 2042. Growth and development in the Burnside neighbourhood must support these goals. The land use and urban design guidance in this plan supplements and refines the Official Community Plan, and is used to evaluate development applications, to guide rezoning projects, and to create development guidelines. The OCP remains the City's guiding bylaw for considering new development, and where conflicts arise, the OCP takes precedence.

Transit Future Plan (2011)

BC Transit's Transit Future Plan (2010) identifies key corridors for Rapid, Frequent and Local transit options. The transportation improvements in this plan support these priorities through roadway design and through enhancements that allow pedestrians easy and comfortable access to transit stops.

Bicycle Master Plan (2016)

The City's Bicycle Master Plan identifies a primary and a secondary network for bicycle improvements. The Primary Network is meant to include routes which are safe and comfortable for all ages and abilities, including protected bicycle lanes, bicycle routes on quiet or traffic-calmed streets, and trails. The secondary network should include a broader range of bicycle improvements.

The Bicycle Master Plan also sets priorities for investment, including the Gorge Road-Government Street bicycle route and the Haultain-Kings Road bicycle route. This plan builds on the Bicycle Master Plan by detailing interim and future improvements on key Bicycle Master Plan Primary and Secondary routes, and identifying additional local improvements to make cycling and walking easier.

Greenways Plan (2003)

The improvements contained in this plan incorporate and update the Greenways network. The Greenways network is meant to provide a "superb, human-scaled, people-friendly environment" along routes identified for pedestrians and cyclists, which may incorporate streets as well pathways.

Pedestrian Master Plan (2008)

This plan identifies a number of priority improvements to the local pedestrian network, including new or enhanced sidewalks and crossings. These improvements will be considered, together with the Pedestrian Master Plan and existing conditions, in prioritizing investments, in prioritizing investments across the city.

Parks Master Plan (underway, 2017)

The City is currently undertaking a Parks Master Plan, that will identify current and future parks needs throughout the City of Victoria.

Throughout the Burnside Gorge Neighbourhood Planning process, community members were asked about what kinds of activities they would like to be able to do in their parks. This feedback informed the parks, open space, and trails strategy in this plan, and also provided a first input into the Parks Master Plan process.

Arts and Culture Master Plan (underway, 2017)

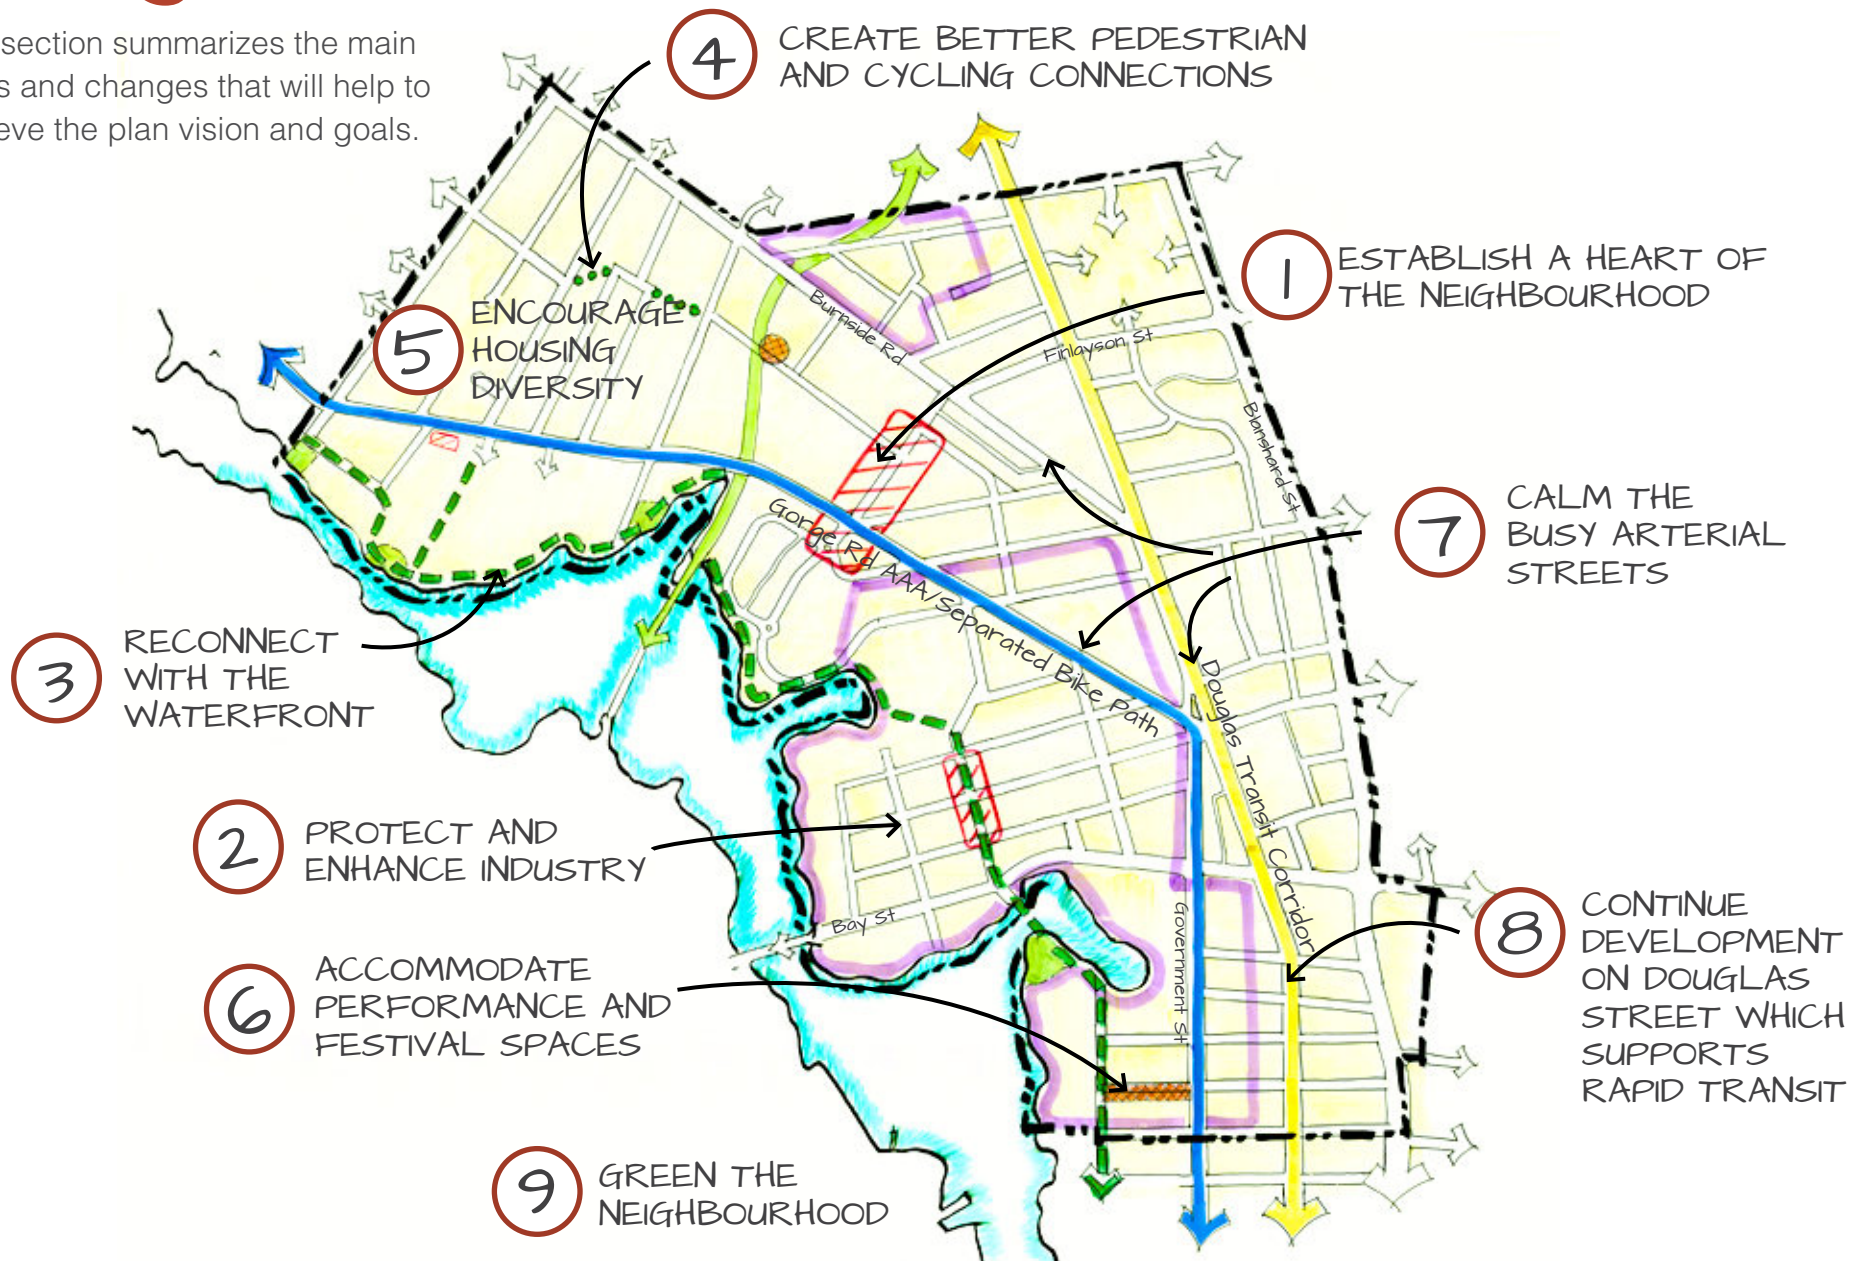

Because of the importance of this neighbourhood for artists and artisans and opportunities for public performance spaces, several directions have been provided which can be explored further through the Arts and Culture Master Plan.

Infrastructure Master Plans

The land use directions of this plan should be consistent with the Water Master Plan and the Sewer Master Plan

3. Big Moves

This section summarizes the main goals and changes that will help to achieve the plan vision and goals.

Establish a Heart of the Neighbourhood: Build out Selkirk and Cecelia Village

What we heard

Burnside Gorge lacks a neighbourhood 'heart', where residents can gather and access shops and services for daily needs.

How the plan addresses what we heard

This area is envisioned as the expanded Urban Village heart of the neighbourhood, uniting housing and employment around Jutland Road as the "main street" supporting shops, services and gathering, with pedestrian and cycling links to disparate parts of the neighbourhood. As well, a second, small urban village on Gorge Road near Irma Street and Balfour, is envisioned. The new neighbourhood heart would include:

- Jutland Road as a people-oriented Main Street, with a focus at the Jutland-Cecelia intersection and the potential revitalization of the Burnside School site
- new housing on Cecelia Road west of Jutland Road, with mixed use buildings conserving light industrial and flexible employment opportunities.
- new housing East of Jutland Road within the Sumas residential pocket, with an enhanced Manchester Green.
- a new gateway building to Selkirk Village to accommodate housing, a new Canadian Legion facility, and retail development anchoring the Jutland-Gorge intersection.
- between Dunedin and Garbally Street, a Selkirk "makers' village" of residential units above light industrial space.
- the addition of residents (over 1,500 predicted) together with enhanced connections to the neighbourhood to the west to create vibrancy at all times of day

For more information on this Big Move

See Section 13 - Selkirk and Cecelia Sub-Area on page 63 details the land use and urban design policies, and the placemaking, parks and transportation improvements that support this vision..

2

Protect and Enhance Industry

What we heard

Industry is an important part of Burnside Gorge neighbourhood, as well as for the health of the City and regional economy and tax base. Industrial uses should be protected and updated to reflect today's needs and uses.

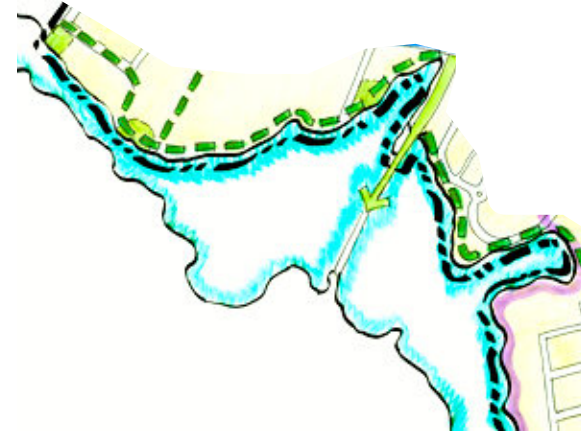

How the plan addresses what we heard

The industrial areas in Burnside Gorge are retained. "Industry first" is the guiding principle for future land use, leading to a vibrant mix of producers, artisans, designers and related professions, without displacing industrial uses. Policies include:

- maintain areas for heavy and harbour-oriented industry near the waterfront.
- designate the remainder of the Rock Bay area as Industrial Employment lands where the principle of "Industry First" is applied: ground floors of new buildings should be developed as light industrial spaces, with general commercial uses permitted only on upper storeys.
- designate two Industrial Arts areas, on Bridge Street and south of Pembroke Street, where a few additional uses – such as galleries and limited additional allowances for sales and/or services – would be allowed to connect artisans and producers with regional customers, and to provide day-to-day services to area employees.

For more information on this Big Move

Section 15 - Rock Bay Employment Sub-Area on page 85 details the land use and urban design policies, and the placemaking, parks and transportation improvements that support this vision..

3

Reconnect with the Waterfront

What we heard

The waterfront is an under-utilized asset in this neighbourhood due to a lack of accessibility. More opportunities for connecting to the waterfront should be created.

How the plan addresses what we heard

Improved connections to, from, and along the waterfront are identified, including

- a trail westward from the Galloping Goose to a small park at Harriet Road, designed to conserve existing habitat.
- a renewed Arbutus Park, which should evolve as a well-used waterfront location.
- a future park and small boat launch at the Gorge Road Hospital site.
- a proposed new small park at Barclay Point and a connection of the Harbour Pathway to Bridge Street via a pedestrian and bicycle bridge.
- the restoration and protection of shoreline habitat and enhancement of views.

For more information on this Big Move

See Section 6 - Parks, Trails and Open Space on page 33, as well as Section 12 - Gorge Residential Sub-Area on page 49 for urban design policies, and parks and trails improvements that support this vision.

Create Better Pedestrian and Cycling Connections

What we heard

The neighbourhood is disjointed, and there is a need for safer connections in order to access different parts of the neighbourhood.

How the plan addresses what we heard

This plan seeks to create better and safer connections to allow for greater mobility choice by:

- prioritizing the bicycle and pedestrian connection between Balfour Avenue and Washington Street – a neighbourhood goal since at least 1992.
- creating new designs – both interim and long term – for key roadways in the neighbourhood, with quality bicycle lanes, higher quality pedestrian spaces, trees and landscape, as well as support for transit.
- identifying new or improved pedestrian crossings, sidewalks and trails to make walking and cycling more comfortable and safer

For more information on this Big Move

See Section 6 - Parks, Trails and Open Space on page 35, as well as Section 12 - Gorge Residential Sub-Area on page 49 for urban design policies, and parks and trails improvements that support this vision.

Encourage housing diversity

What we heard

Further housing is desired in Burnside Gorge to diversify the neighbourhood and support improvements and amenities. New housing should include diverse choices, including family-oriented housing.

How the plan addresses what we heard

This plan seeks a balance of housing types and styles attractive to different households by:

- creating opportunities for new multi-unit housing and mixed use buildings along transportation routes and near the expanding urban village.
- planning for new ground-oriented housing, such as townhomes.
- introducing some new areas for housing above light industrial space near Selkirk and Cecelia Village. This balances the needs of tomorrow's businesses with those who want to live in a diverse village setting.

For more information on this Big Move

Section 12 - Gorge Residential Sub-Area on page 49 details the land use and urban design policies which support this vision.

Accommodate Performance and Festival Spaces

What we heard

The neighbourhood already hosts many successful events and festivals, but there is a need for spaces that are designed specifically for accommodating events.

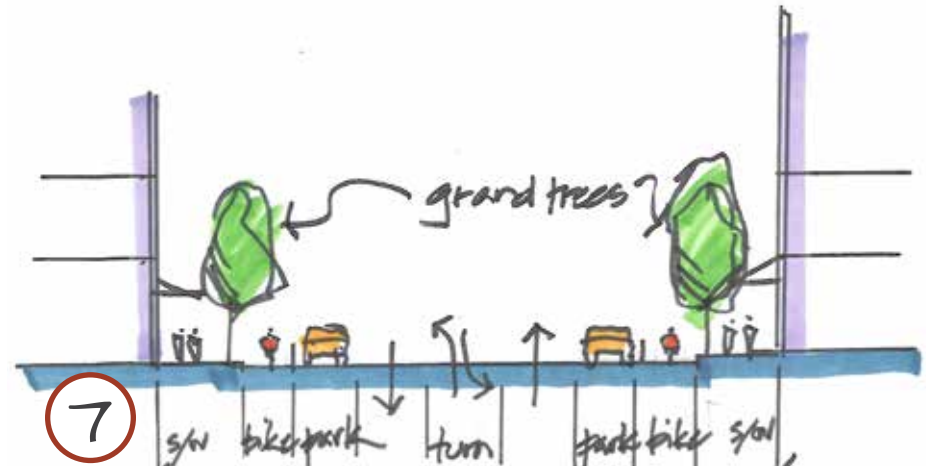

How the plan addresses what we heard

Two revitalized spaces are identified:

- a “festival street” on Discovery Street, which would allow the street to be transformed into a plaza for events
- a renewed amphitheatre space in Cecelia Ravine to host live music, theatre, film, and neighbourhood events.

For more information on this Big Move

See Section 12 - Gorge Sub-Area on page 49 and Section 15 - Rock Bay Employment Sub-Area on page 85 for placemaking and public realm improvements that support this vision.

Calm the Busy Arterial Streets - Transform Roads into Complete Streets for all Users

What we heard

The neighbourhood is divided by major streets with heavy traffic, making it uncomfortable to get around the neighbourhood on foot or by bicycle.

How the plan addresses what we heard

This plan identifies future road designs, interim improvements, and pedestrian crossings that enhance safety and comfort for all users. These include:

- Burnside Road improved with bicycle lanes, canopy trees and landscape boulevards separating pedestrians from traffic.
- Gorge Road as an “All Ages and Abilities” bikeway consistent with the Bicycle Master Plan
- Government Street as a main street for the Rock Bay district and a key regional cycling corridor, with protected bicycle lanes, canopy trees, quality design and new businesses.
- Enhanced routes for east-west walking and cycling through the Douglas and Blanshard Corridor, connecting residential parts of Burnside with other city neighbourhoods.

For more information on this Big Move

See Section 5 - Transportation and Mobility on pg 29, the new street designs in Sections 12 - 15, and pedestrian improvements in Section 14 - Douglas Corridor Sub-Area for improvements which support this vision.

Concept sketch showing an example of a frequent transit route through a Town Centre

Continue Development on Douglas Street which supports future Rapid Transit

What we heard

As the Region's future Rapid Transit spine, and with 46% of current person trips by transit, Douglas Street is suitable for additional employment and residential density. Development should be done sensitively and strategically to create a positive pedestrian environment. Humber Green is not where residents want to access daily shops and services, but is a suitable place for additional employment and mixed-use development.

How the plan addresses what we heard

This plan envisions two areas of transit-oriented development: Mayfair Town Centre and Humber Green, aligned with future rapid transit stations. Sections of Douglas Corridor between these two areas will remain in general employment to maintain lands for future businesses.

Mayfair Town Centre is envisioned as a focus for redevelopment, centred around:

- a future transit station at Douglas and Finlayson Street. This area evolves into a main street with storefronts and employment fronting onto the street and opportunities for housing above.
- a healthy tree canopy and quality urban design complete the environment.
- An eventual redevelopment of Mayfair Shopping Centre may include

housing, employment and community services. Redevelopment should prioritize an active frontage of smaller storefronts along Douglas Street, and the introduction of an internal block system that facilitates movement east and west and connects Oak Street in Saanich to Nanaimo Street in Victoria.

Humber Green is envisioned as an evolving employment and mixed use area which will become the northern edge of downtown. This plan recognizes that physical conditions in 2016 are not ideal in this area, particularly to support additional residents, but that additional development will support improvements to the public realm. The vision for Humber Green is

- a district with enhanced street trees and landscape, shopfronts and employment fronting onto arterial roads with a focus on Douglas Street.
- an internal network of well-designed, pedestrian friendly streets and a small green space to provide a respite from the busy arterial roads.
- a new bicycle and pedestrian crossing of Blanshard at King's Street that integrates Humber Green with Quadra Village, which is only a three-block walk away.
- create a design for the 5-point intersection to make the intersection safer for pedestrians, cyclists, buses, and cars.

For more information on this Big Move

See Section 14 - Douglas Corridor Sub-Area on page 74.

Green the Neighbourhood

What we heard

The neighbourhood needs more greenery, with a desire for parks and natural areas accessible to residents and employees, restored or enhanced coastal ecosystems, and the introduction of more trees into the Rock bay and Douglas Corridor areas.

How the plan addresses what we heard

- the plan envisions enhancing existing parks and adding new parks and open spaces within each of the sub-areas, through parks planning or through the creation of amenities with redevelopment of key sites
- the plan supports the retention and addition of street trees within all areas, including the Rock Bay employment sub-area
- the plan supports restoration and enhancement of waterfront ecosystems through regulatory guidelines for new development and through continued support of Gorge Waterway restoration efforts
- the plan supports landscape standards within design guidelines, including standards tailored to light industrial conditions

For more information on this Big Move

See Parks, Trails and Natural Areas (section 6 and 12.13, 13.7, 14.11, 15.12), Sub-Area placemaking and urban design sections 12.6, 12.8, 13.2, 13.3, 14.4, 14.5, 15.6), Stormwater policies (section 7.2), and various key street cross-sections.

4. General Land Use and Urban Design Policies

The use of land and the design of new development are critical components in moving towards the future outlined in this plan. This section provides an overview of land use directions for the Burnside Gorge neighbourhood.

Sections 12-15 provide more detailed guidance, broken down by sub-areas, on new housing, shopping, employment, the design of buildings and public spaces, transportation and parks and open space.

The land use and urban design guidance in this plan supplements and refines the Official Community Plan (OCP), and is used to evaluate development applications, to guide rezoning projects, and to create development guidelines. The OCP remains the City's guiding bylaw for considering new development, and where conflicts arise, the OCP takes precedence.

Detailed land use, urban design, transportation, and parks and open space guidance for each sub-area is provided in Sections 12-15.

4.1 General Policies for Land Management and Development

4.1.1. Support the development of a variety of new housing forms: Opportunities to develop new housing should include a range of housing types attractive to different households. New housing opportunities should include apartments, mixed-use buildings, and ground-oriented housing such as townhomes. Housing options attractive to a range of households, including families with children, are encouraged where appropriate.

4.1.2. Support the expansion of a large urban village in the Selkirk and Cecelia-Sumas area: Existing shops and services in Selkirk Village should be complemented by an expanded main street supporting shops and services along Jutland Road, with a focus at the Jutland-Cecelia intersection, anchored by the Burnside School site, and surrounded by additional housing to bring vitality to the existing and expanded village. The village will be a place to live, work, gather, and connect to the rest of the neighbourhood.

4.1.3. Support the development of a smaller urban village along Gorge Road west of Cecelia Ravine: This village will provide shops, services and a gathering place within the Gorge sub-area, close to residents and future waterfront amenities.

4.1.4. Maintain the character of existing traditional residential areas while supporting the incremental addition of ground-oriented and appropriately scaled infill housing where it is appropriate:

The Official Community Plan allows a variety of ground-oriented housing types within traditional residential areas, including townhouses and duplexes, depending on context. This plan identifies conditions such as lot sizes, frontages and site conditions that are particularly suited for further ground-oriented housing, including fee-simple row houses, as well as smaller apartment buildings.

4.1.5. Protect the City's industrial land base and encourage the development of new industrial and general commercial space to support future businesses: The Rock Bay area and Douglas Corridor area provide important locations for employment, including the City's primary industrial and light industrial lands. In 2011, these lands supported over 1,400 businesses and 14,000 employees, and contributed 12.5% of the City's property tax. These lands also represent an important reserve of developable land for future employment uses.

4.1.6. Encourage the conservation of important heritage buildings: Burnside neighbourhood contains important heritage buildings and sites of the Coast Salish people, the neighbourhood's agricultural, residential, and industrial history, and the natural and recreational history of the Gorge Waterway.

4.1.7. Ensure that new development enhances its environment through appropriate and attractive design: Different parts of the neighbourhood call for

unique design guidelines – whether for emerging urban villages, residential corridors, working industrial lands and areas with heritage value.

4.1.8. Improve public access to the shoreline where appropriate: The shoreline habitat, both coastal forest and aquatic habitat, is an important natural system. In addition, there are important views of the shore from public paths, parks and streets across the Gorge Waterway, as well as for the many recreational users of the waterway. This area should be protected by a Development Permit Area.

4.1.9. Support Transit-Oriented Development: Development along transit routes and near future station areas is encouraged, with amenities at and near transit stations.

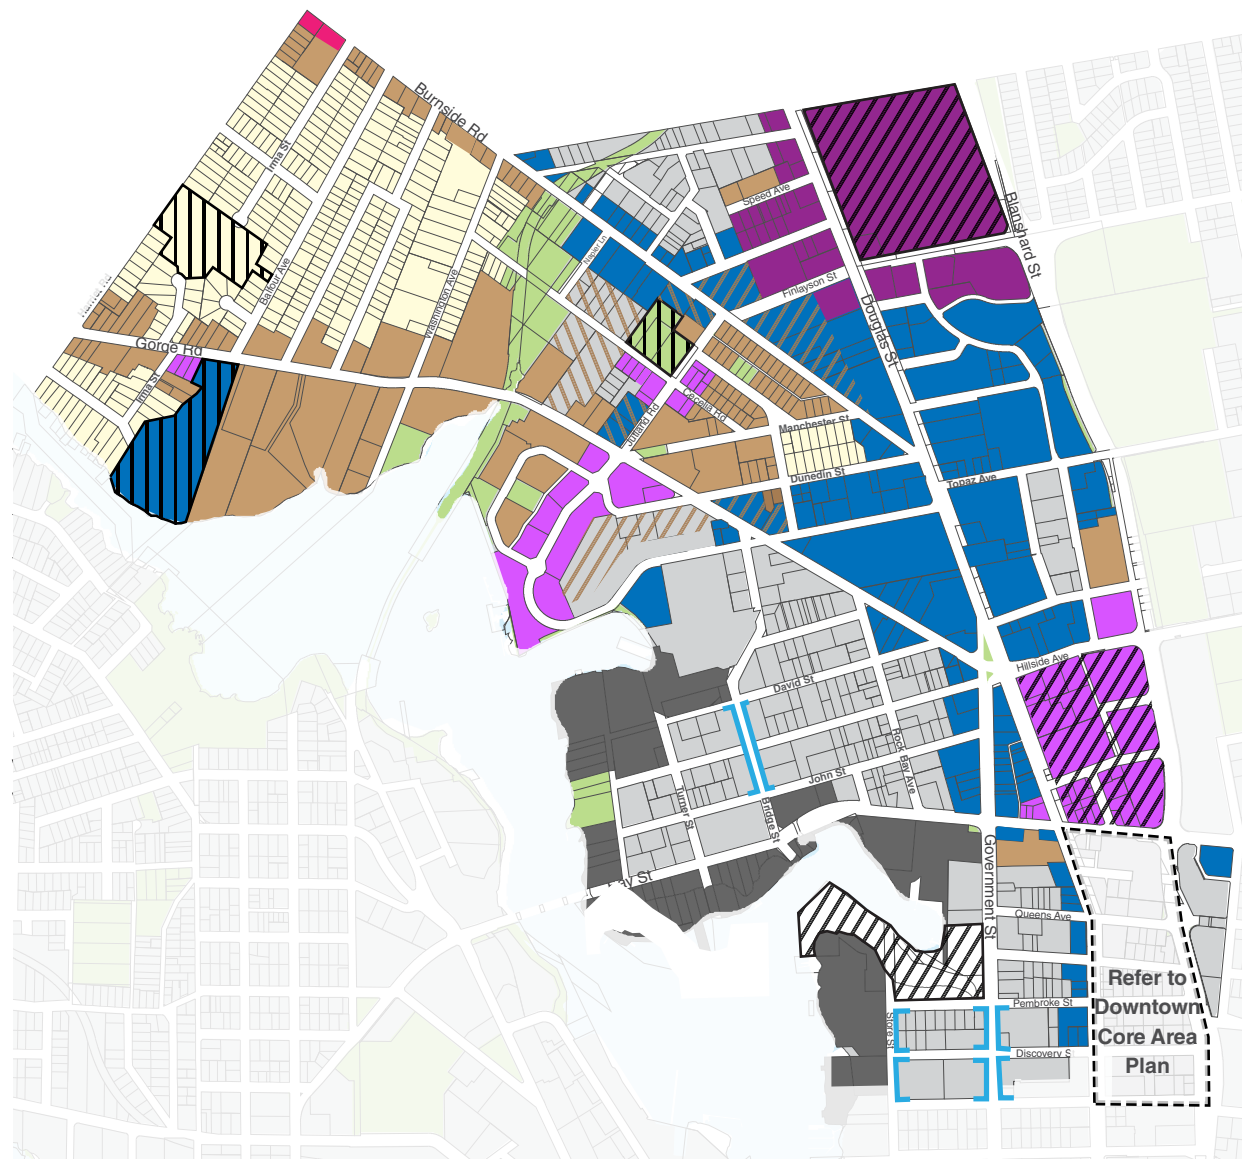

4.1.10. New development should offset the impacts of added density by supporting the provision of amenities: Key amenities are identified in this plan based on neighbourhood input. Section 16, Implementation. More detail is provided in the various sections of this plan with emphasis on parks, placemaking, public realm, pedestrian improvements and transit station areas in Sections 12-15. Development which seeks densities above a "base" density provided in the Official Community Plan should support the provision of those amenities through partnerships or through contributions made via the City's Community Amenity Contribution program. Amenity funds should support improvements above and beyond the City's core funding for infrastructure, parks and transportation.

Burnside Neighbourhood Land Use Map

This plan builds on the City's Official Community Plan by providing more refined guidance for the development of land, including appropriate uses, building types and scale, densities, and design considerations.

The Land Use map in Figure 1 provides an overview. More detail is provided for individual sub-areas in sections 12 (p. 51), 13 (p. 65), 14 (p. 75) and 15 (p. 87).

	Uses	Base/Max Density	Building Types
General Employment	<ul style="list-style-type: none"> Commercial or light industrial uses Retail uses supported on the ground floor along arterial roads and areas with high pedestrian activity 	<p>Up to approx. 2.0 FSR</p> <p>Up to 3.0 FSR south of Bay Street</p>	<p>Commercial buildings where the ground level is built up to the street, with parking generally located to the rear or underground.</p> <p>Light industrial buildings generally built up to the street</p> <p>Any retail uses should generally be located at ground level</p> 
General Employment with limited residential	<ul style="list-style-type: none"> Light industrial or commercial, and ancillary uses on the ground floor Commercial or residential on upper floors Primary retail uses limited to properties as indicated on Future Land Use maps Work-live*** 	<p>Up to approx. 2.5 FSR</p> <p>All residential space is considered bonus density</p> <p>Residential floor area is limited to approx. 1.5 FSR</p>	<p>Commercial or mixed use buildings where the ground floor is built up to the street and consists of commercial or light industrial uses (as compatible with other uses), with parking generally located to the rear or underground. Any residential uses generally located in upper storeys.</p> 
Industrial Employment	<ul style="list-style-type: none"> Light industrial and ancillary uses on any floor Commercial uses limited to upper floors Art galleries, convenience grocery on ground floor only along the Industrial Arts frontages (see 15.3) 	<p>Up to approx. 2.0 FSR</p> <p>Up to 3.0 FSR south of Bay Street, or west of Bridge Street</p>	<p>Various building forms where the ground level supports light industrial uses, with a floor-to-ceiling height suitable for contemporary light industry (with or without mezzanine), loading bays, and adequate separation from uses above</p> 
Industrial Employment with limited residential	<ul style="list-style-type: none"> Limited light industrial** General commercial or residential on upper floors Work-live*** 	<p>Up to approx. 2.0 FSR</p> <p>All residential space is considered bonus density.</p> <p>Residential space limited to 1.5 FSR</p>	<p>Various building forms where the ground level supports light industrial uses, with a floor-to-ceiling height suitable for contemporary light industry (with or without mezzanine), loading bays, and adequate separation from uses above</p> 
Marine Industrial	<ul style="list-style-type: none"> primary processing, marine industrial, marine transportation, warehousing, shipping, bulk materials handling, and other industrial uses and accessory offices 	<p>Up to approx. 3.0 FSR</p>	<p>Industrial buildings and structures from one storey to approximately four storeys</p> 

* Village commercial uses include retail stores, personal services, medical services, restaurants, pubs, coffee shops, bakeries and related food and drink uses, theatres, social or athletic clubs, and limited professional services. If it can be demonstrated that the market does not support village commercial uses at grade, alternative uses (residential or commercial) can be permitted within a building form that is designed to support retail use. See Future Land Use directions maps for further guidance.

** Light industrial uses which are compatible with residential or commercial uses above based on impact within and external to the building.

*** Work-live units should be designed so that residential space and work space may be leased and occupied separately. (see also Work-Live Planning and Design Guidelines, as updated)

5. Transportation and Mobility

Improved transportation and mobility is a key aspect to the vision for Burnside Gorge outlined in this plan. The key goals for Transportation and Mobility in the Burnside Neighbourhood are:

Transform Arterial Streets into Complete Streets

The neighbourhood is a gateway into Victoria, with over 100,000 person- and freight-trips daily. This regional mobility is important to the economy, but creates negative impacts on the neighbourhood, which is divided by several arterial roads which carry high volumes of automobile traffic, including trucks. In 2016, these roads divide the neighbourhood with poor conditions for pedestrians and cyclists.

This plan provides new designs – both interim and long term – for transforming these roads into Complete Streets with improved bicycle lanes, higher quality pedestrian space, trees, landscape, and support for transit. These new designs along with the Bicycle Master Plan's cycling network (2016) and with the 2011 Transit Futures Plan's Rapid and Frequent Transit routes.

Create a Network for Walking, Cycling and Other Non-motorized Modes of Travel

Walking and cycling depend on having safe and pleasant routes. This plan builds on city-wide plans (such as the Bicycle Master Plan and Pedestrian Master Plan) to propose new or enhanced crossings, sidewalks and trails that improve walkability and cycling conditions on arterial roads, and that provide alternative routes on local streets and trails. These improvements enhance the routes where people want to go today, and support future land uses such as those in Selkirk and Cecelia Village.

Support Urban Villages, New Housing and Employment

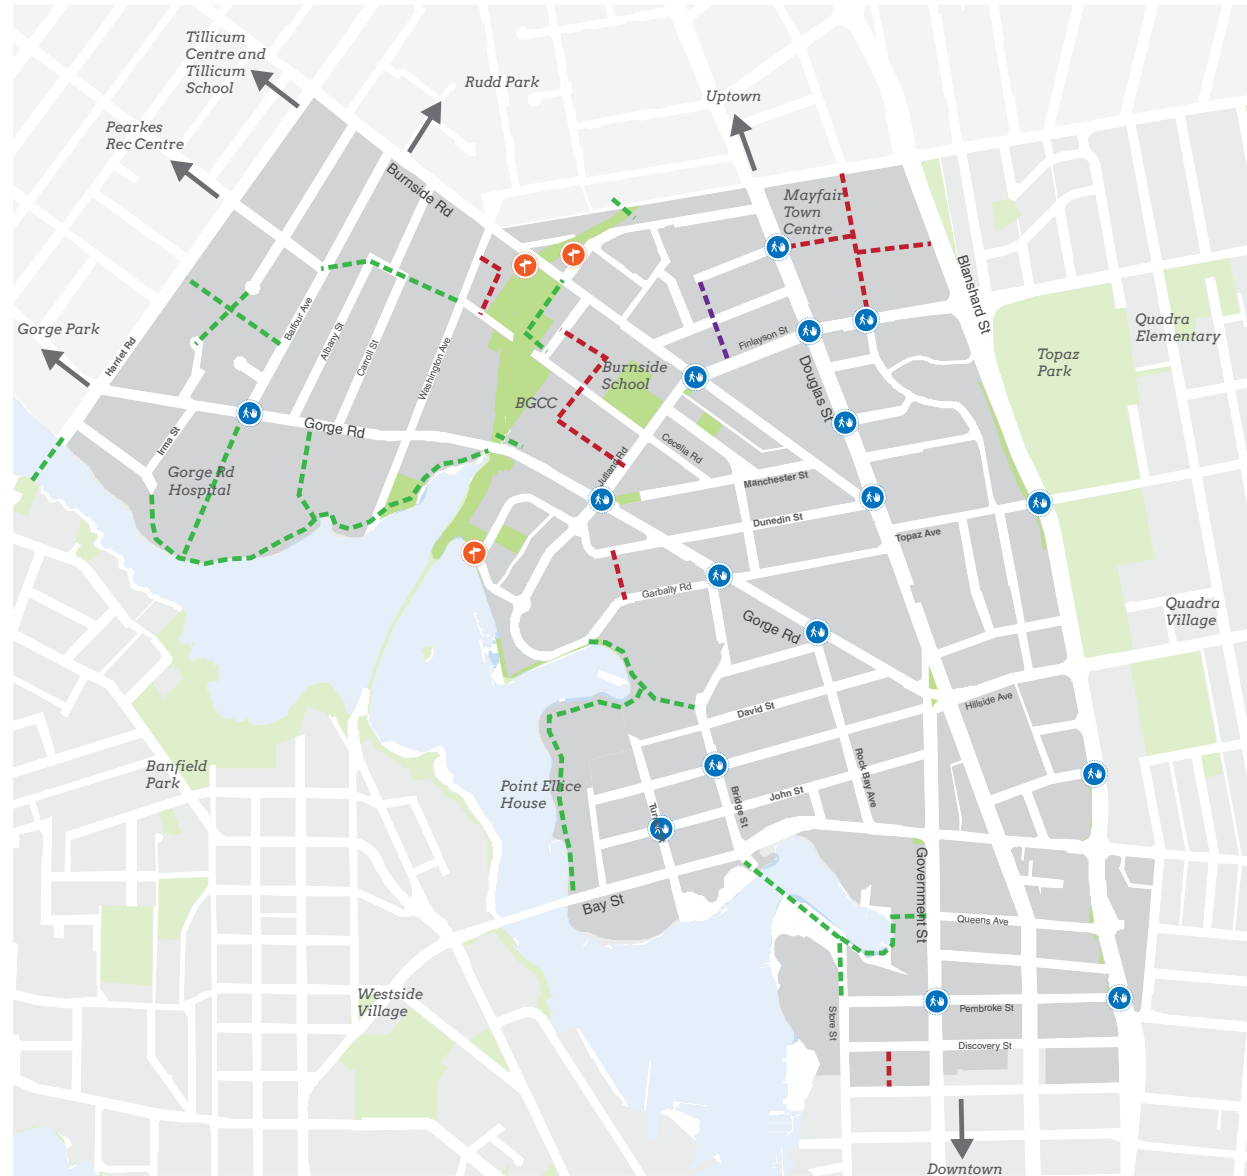

The future roadway designs in this plan support future development along key arterial streets by considering how the design of buildings and streets create a more desirable “people place.” Canopy trees and on-street parking create a buffer between pedestrians and traffic, calm traffic speeds, and support more vibrant business districts and attractive urban design. The street and trail enhancements connect residential areas to urban villages and encourage movement on foot, by bicycle or by transit. These enhancements also accommodate freight access to key employment areas, including the Rock Bay area, while mitigating traffic impacts on public space and pedestrian comfort.

Transportation and Mobility

5.1 Walking Routes

This map shows priority pedestrian improvements in the Burnside Gorge Neighbourhood. See Section 12.10, 13.5, and 14.8 for details and prioritization for each neighbourhood sub-area.

- - - - Potential new street or lane
- - - - Potential new mid-block connection
- - - - Potential new trail connection

Map 5. Present and future priority cycling routes in the Burnside Gorge Neighbourhood

Transportation and Mobility

5.4 Priorities for Improvements

The following thirteen priorities are based on what we heard from the community through open houses, walking tours, and design workshops. Additional improvements are identified in individual sub-areas in Section 12-15.

1. Burnside Road

Establish boulevard with street trees through collaboration (voluntary easement) with property owners on south side of street west of Cecelia Ravine as part of overall improvements to Burnside Road. Consider permitting parking on the south side at all hours to buffer pedestrians and remove the 4 lane to lane transition.

2. Doric Connector and Cecelia Road

Complete a local bicycle and pedestrian connection between Balfour Street and Washington Avenue, with associated improvements at Cecelia Ravine to facilitate connection to and across the Galloping Goose.

3. Gorge-Government All Ages and Abilities Bicycle Route

Complete a protected bicycle route along Gorge Road and Government Streets.

4. Connections to the Galloping Goose Regional Trail

Complete a pedestrian-bicycle connection between the Galloping Goose and Arbutus Park. Enhance the connections between the Galloping Goose trail and Gorge Road, Cecelia Road, and Alpha Street.

5. Waterfront Pathway

Complete a pedestrian pathway between Lotus Street and Arbutus Park.

6. Bridge Street Streetscape Enhancement and Crossing

Enhance Bridge Street through placemaking and the completing of a pedestrian crossing.

7. Rock Bay Sub-Area Improvements

Initiate various improvements in the Rock Bay area including the paving of unpaved streets and the addition of crossings, street trees or landscape as identified in this plan.

8. Kings Road Bikeway

Establish a crossing of Blanshard at Kings Road, consistent with the Biketoria plan.

9. Blanshard and Topaz Avenue

Establish a crossing of Blanshard Street at Topaz Avenue, and related bicycle connectivity to Dunedin Street and/or Burnside Road.

10. Burnside Road Bicycle Lanes

Establish bike lanes on Burnside Road from Harriet Street to Douglas Street, with connectivity across Douglas Street to Topaz Avenue.

11. Harbour Pathway Rock Bay Connection

Develop a pedestrian and bicycle connection spanning Rock Bay, linking Barclay Point to Bridge Street.

12. Discovery Festival Street

Develop a festival street on Discovery Street. A festival street is a street which is designed so that, when closed to traffic, it functions as a plaza or event space.

13. Humber Green Intersection Design

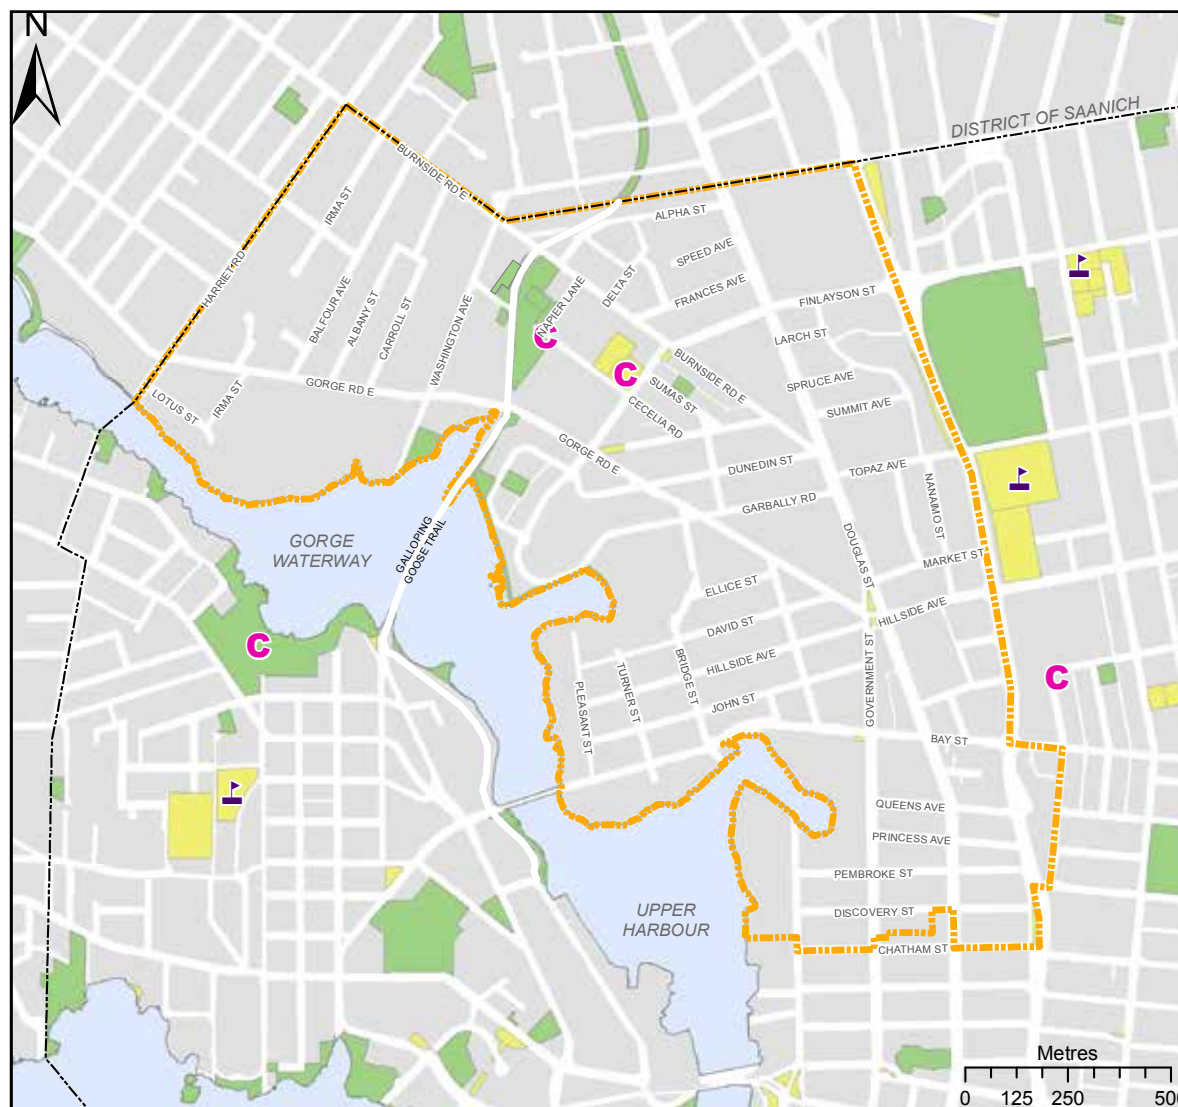

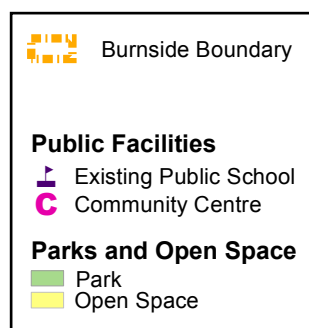

Develop a future design for this complex intersection, in order to improve conditions for pedestrians and cyclists and create a “sense of place.”

6. Parks, Trails, and Open Space

Access to parks and green spaces is important for human health and well being. These spaces also protect the environment and our urban forest and help to mitigate and adapt to the impacts of climate change. City green spaces are places for people to meet, play and enjoy nature, particularly important in a neighbourhood like Burnside Gorge, where 75% of households live in multi-unit housing.

The Burnside Gorge neighbourhood has five parks, most of which are small, community parks, totalling an area of 3.7 hectares. The largest park in the neighbourhood is Cecelia Ravine Park. Most residents in the neighbourhood live within 400m of a park.

The neighbourhood also has an extensive waterfront area along the Upper Harbour and Gorge Waterway, although most of the waterfront is privately owned. The City holds several easements for access in this area.

Map 6: Parks in Burnside Gorge Neighbourhood

6.1 Principles for Parks, Trails and Natural Areas

6.1.1. Provide access to the waterfront: The waterfront is one of the key assets of the Burnside Gorge neighbourhood. A remnant coastal forest exists between Cecelia Ravine and Lotus Street. Much of the residential waterfront is privately owned west of the Selkirk Trestle although the City possesses easements for public trail access for most of this waterfront. Key improvements should focus on accessing the waterfront through a combination of linear trails, parks, overlooks, and opportunities for water-based recreation (swimming, small boat launches) in the residential areas of Burnside from Selkirk Village west. This access should respect and enhance the shoreline and aquatic habitat, consider Green Shores principles, and accommodate sea level rise. The possibility for an additional small boat launch located somewhere west of Cecelia Ravine and the Galloping Goose Regional Trail should be explored. Where appropriate, opportunities for commercial uses (such as patios for dining) may be located in select places adjacent to waterfront parks or trails.

Within the industrial-employment areas of Burnside neighbourhood, the functions of the working harbour take precedence over direct public access. In

these areas, an emphasis should be placed on re-establishing coastal forests or native shoreline ecosystems in order to “green the shore” and enhance views from the water for kayakers and other users. Trails may be located along the water if they do not compromise the ability of industries to operate. Redevelopment of industrial lands may provide opportunities to increase shoreline access. Overlooks and views should provide interaction with the water where access is not feasible.

6.1.2. Protect environmental values: Cecelia Ravine, Cecelia Creek and the Gorge Waterway and its shoreline are sensitive, unique habitats. Care should be taken that development of parks and trails related improvements do not unduly impact these ecosystems. Invasive species should be removed and native vegetation re-established native where possible.

6.1.3. Support informal recreation and social gathering: Parks and open spaces provide Burnside residents, employees and visitors with a variety of informal recreational and social opportunities appropriate to a diversity of residents and ages. Urban villages and employment areas should provide green spaces or urban plazas for social gathering.

6.1.4. Connect parks to the neighbourhood

fabric: Parks and open spaces should be located and connected so that all parts of Burnside neighbourhood – residents and employees – have access to park space.

6.1.5. Ensure safety in design: Parks should be designed according to CPTED (Crime Prevention through Environmental Design) principles. Part of safety is ensuring a variety of activities that draw parks users.

6.1.6. Support local food production: In collaboration with the community, additional allotment garden space should be located in the neighbourhood. Particular attention should be paid to locating the garden where it is easily accessible to residents in multi-family housing.

6.1.7. Create Parks and Trails which appeal to a wide variety of users of different ages and abilities: When designing parks and trails, incorporate features such as shaded resting areas, activities appealing to users ranging from children to seniors, access and activities for persons with disabilities, and sense of safety.

7. Infrastructure

A vital aspect to any plan is to forecast infrastructure demands and ensure proposed land use changes can be accommodated in a sustainable manner.

7.1. Sanitary Sewer Policies

The City is undertaking a Sewer Master Plan consistent with siting for wastewater treatment, and has also has completed a Water Master Plan.

7.1.1. The City will consider the capacity of utility networks, including sanitary sewer and storm sewer, in reviewing development applications.

7.2. Stormwater Policies

Stormwater runoff in this area enters adjacent waterways, including Cecelia Creek and the Gorge Waterway. Parts of the neighbourhood, including Rock Bay, currently have a high impervious cover. This, along with certain land use practices can have a negative impact on the health of the waterways, in the form of elevated metals, suspended solids, turbidity, polycyclic aromatic hydrocarbons and coliform counts. Reduction of total impervious areas and improvements to stormwater quality and quantity will have a positive impact on watershed health.

7.2.1. The City will continue to monitor stormwater outfalls emptying into the Gorge Waterway and investigate exceedances.

7.2.2. Development proposals should consider the creation of greenspace at the shore of Rock Bay incorporating surface stormwater treatment (e.g. rain garden) or daylighting of the creek that once emptied into the bay.

7.2.3. The City will work with property owners to identify options for mitigating stormwater impacts on sites with high impervious cover, and thereby reducing the stormwater utility costs for these properties.

7.2.4. The City will consider integrating green stormwater infrastructure or “green streets” in the Rock Bay area and along arterial streets as improvements are made.

7.2.5. The City will continue to enhance the daylight creek at Cecelia Ravine.

7.2.6. The City will continue to work with business owners to ensure compliance with Stormwater Quality requirements under the Stormwater Codes of Practice, and look for opportunities to further improve the quality and quantity of stormwater leaving commercial and industrial properties in Rock Bay.

8. Heritage

Burnside Gorge neighbourhood has a strong heritage legacy, with sites including including Comossung (the Gorge Waterway) and Rock Bay, which was an important gathering place important to the Coast Salish people. There are several heritage Designated and heritage Registered properties (see Map 6), as well as several additional properties of Heritage merit (see Map 7) in the neighbourhood. Among these are several National Historic Sites, including Point Ellice House, a destination with its house museum and gardens, collections, and old growth forest. The policies and actions below intend to maintain and strengthen that legacy.

8.1 Heritage Policies

8.1.1. The City will encourage protection of heritage resources through the designation of properties listed on the City's Register of Heritage Properties, identified in orange in Map 6, including as part of rezoning application considerations.

8.1.2. Consider future additions to the City's Register of Heritage Properties in consultation with property owners, including those identified by the Burnside-Gorge Community Association in Map 7.

8.2. Heritage Conservation Areas

8.2.1. Encourage heritage conservation and sensitive change in the Cecelia-Sumas area and the Gorge Residential Sub-Area, including consideration of Heritage Conservation Areas and appropriate boundaries.

8.3. Heritage Actions

8.3.1. Identify opportunities for heritage interpretation throughout the Burnside-Gorge neighborhood, with a focus on the First Nations history of the Gorge Waterway, Rock Bay and the surrounding areas. Interpretation may include heritage murals, photos, and interpretive panels, as part of a future city-wide Heritage Interpretation Plan. Consider integration of heritage interpretation features into key neighborhood improvements including waterfront walkways, parks and public spaces.

8.3.2. Continue to prepare or update Statements of Significance for properties listed on the City's Register of Heritage Properties, and for properties proposed to be added to the Register.

8.3.3. Work with the Province and the Point Ellice House Preservation Society to enhance visibility and access to the site and, support its ongoing use as a cultural destination for both locals and visitors, and as a valuable open space within the Rock Bay area.

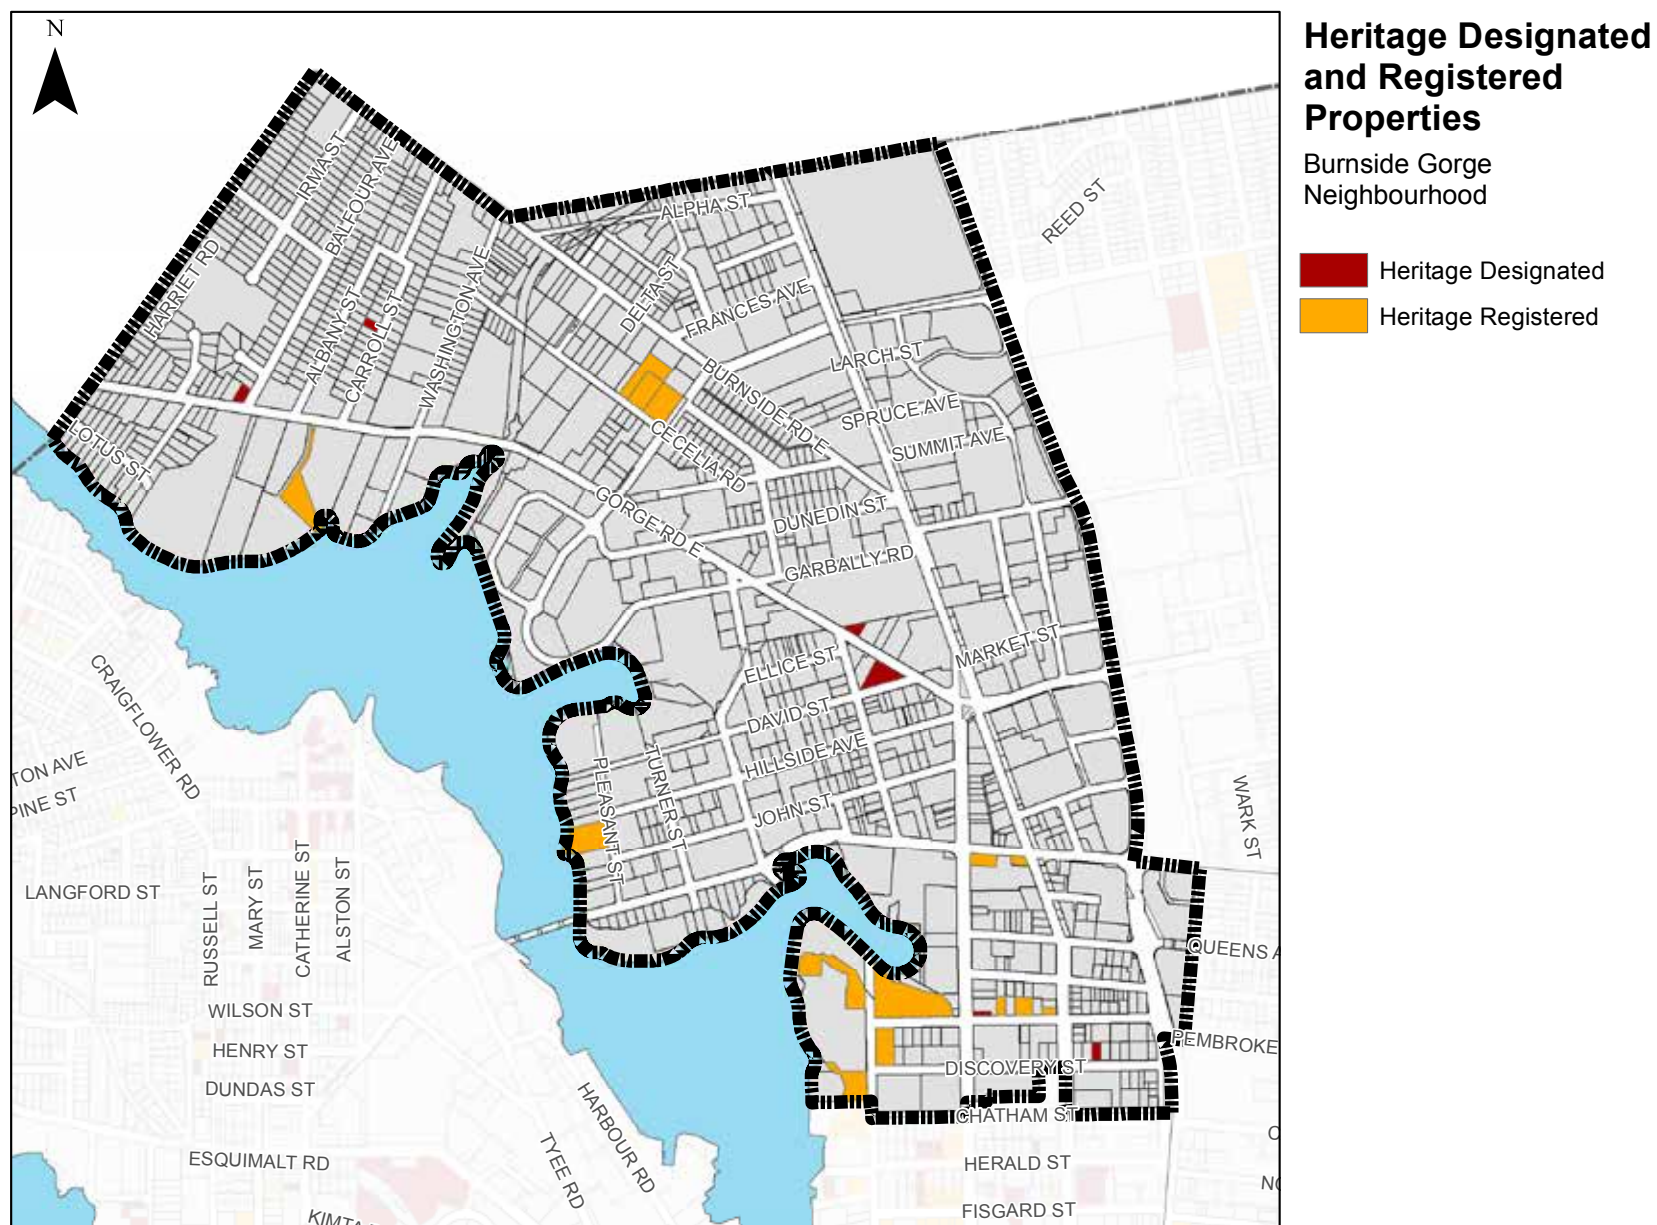

a. update zoning to reflect the site's use as a cultural destination and space for events and visitation.

b. develop a plan for improvement to landscape and streetscape on Pleasant Street which supports attractive transition from industry to the house site.

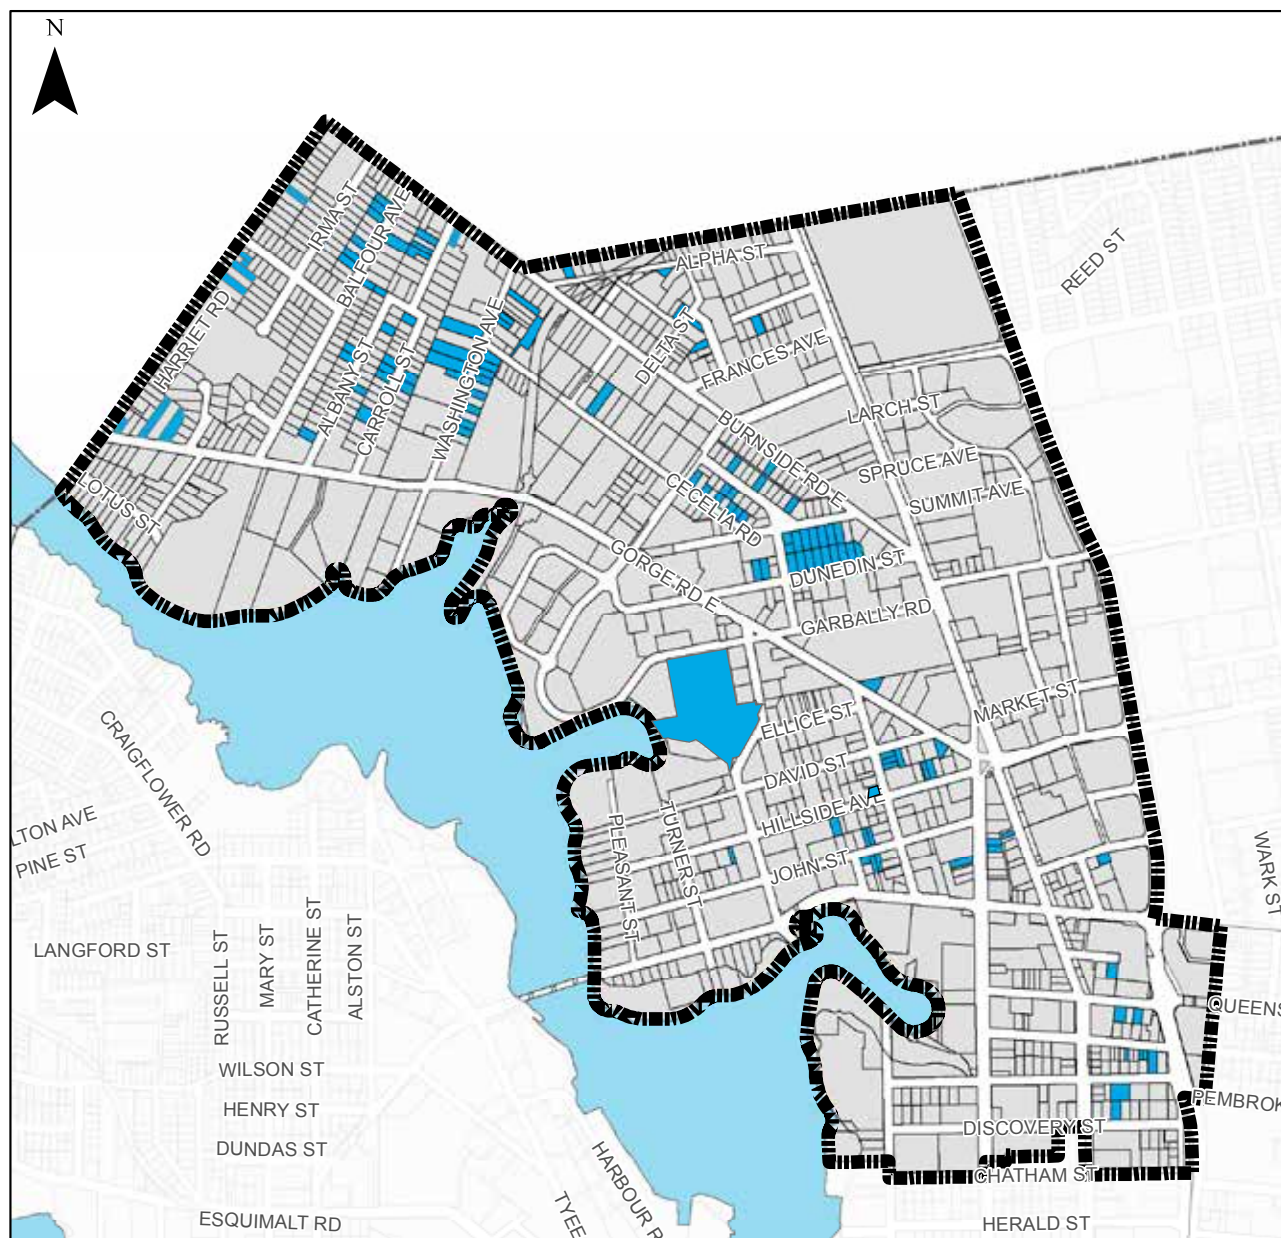

c. include Point Ellice House in the City's wayfinding strategy, drawing visitors from the Galloping Goose and nearby Bridge Street Industrial Arts area.

d. explore enhanced access to the grounds and site.

Map 7: Heritage registered and designated properties in Burnside Gorge Neighbourhood

Additional Buildings of Heritage Merit

Burnside Gorge Neighbourhood

Buildings of Heritage Merit

Note - additional buildings of heritage merit may be identified through future processes

Map 8: Additional buildings of heritage merit in the Burnside Gorge Neighbourhood

9. Business Vitality

In 2011, Burnside's Employment Lands east of Cecelia Ravine (and excluding regional retail at Mayfair Mall) supported over 1,200 business employing over 12,000 people. Within this area, almost 40% of businesses, and one-third of employees, were in sectors which transport, distribute, repair, or manufacture goods and equipment. The Rock Bay sub-area in particular is a niche for industrial businesses whether high-tech, low tech, artisan, food and beverage processing, or connected to the construction industry.

Overall, this area provides:

- 12.5% of the City's (and 80% of Burnside's) tax base in 2011;
- important services to the region;
- a place for new businesses to grow and prosper; and
- high quality jobs.

Demand for industrial space within the core of the region is expected to grow, with low vacancies and rising rents for business-ready spaces. For these reasons, protecting the vitality of the Employment Lands within Burnside is a key goal of this Plan. Land use and public investment decisions should protect this employment land base and avoid displacement of existing and emerging business sectors. In addition, many businesses report that it is difficult to find buildings which are business ready (meeting the needs of businesses and up to date with regard to fire and building codes). It is important that the policies in this plan support further investment in business-ready building stock.

The vision for the various employment lands is:

Rock Bay Area: While becoming a more attractive area to work and visit, Rock Bay should maintain its primarily working character and zoning. Limited areas such as Bridge Street and areas south of Pembroke Street evolve into hubs where employees can access daily services and visitors can purchase local and artisan products.

Most of the Rock Bay area is a typical urban "production, distribution and repair" area; businesses rely on the central location proximate to worksites, customers and workforce throughout the region, and easy access to the downtown. These areas are also attractive to artists and artisans producing tangible goods, many of whom seek the same qualities and zoning as light industrial businesses. The harbour front and select sites within Rock Bay host heavy industries, many reliant on access to the Upper Harbour. Proposed land use in this area maintains industrial uses at grade while supporting opportunities for general commercial above (see Section 15 - Rock Bay Employment Sub-Area).

The cluster of businesses around the Alpha, Beta, Delta and Gamma streets and Tolmie Lane is similar in character and function to the Rock Bay employment lands.

Humber Green Area: Humber Green may evolve into a denser, centrally located hub for employment as well as mixed use residential buildings, focused on a future rapid transit station. Development will result in enhanced amenities, improved walkability and more greenery in this district.

Douglas Corridor General Employment Lands:

The general employment lands along and near the Douglas Corridor are an important reserve of properties, often larger in size than in the Rock Bay area, which serve both current businesses and as a reserve of land for future employment needs in the region.

Business Vitality Strategies

9.1. Business Support and Marketing

- 9.1.1. Provide more help for businesses, owners and prospective tenants in navigating City business and development processes.
- 9.1.2. Connect businesses to existing business assistance available in the community.
- 9.1.3. Work with the community to market, brand and promote Rock Bay as a place to do business.
- 9.1.4. Support tourism focused on the Gorge Waterway and the Galloping Goose, as well as complementary improvements to the waterfront, pedestrian and cycling infrastructure.
- 9.1.5. Work with the community to develop a business organization in the Rock Bay area.

9.2. Environmental Quality

- 9.2.1. Encourage industrial businesses to be good neighbours by continuing to minimize impacts on neighbouring businesses (e.g. dust, odours).
- 9.2.2. Support the development of district energy related to a larger land use in the Rock Bay area.

- 13.2.3. Support the development of green infrastructure to mitigate stormwater impacts on the Upper Harbour.

9.3. Business-Ready Buildings

- 9.3.1. Work with the business community to encourage upgrades to existing buildings to make them ready for new and diverse types of businesses (e.g. with regard to fire code, building code, physical appearance).
- 9.3.2. Encourage new buildings to be designed to accommodate light industrial or flexible space
- 9.3.3. Encourage energy efficient buildings.

9.4. Space for Business and Arts Incubation

- 9.4.1. Work with the business community to establish an incubator space for new businesses which require industrial space to develop, test, prototype or manufacture products.
- 9.4.2. Work with the Arts and Culture community to establish an incubator space for new arts and culture businesses and co-location of non-profit organizations.

9.5. Public Parking Management

- 9.5.1. The City will develop and implement a parking management strategy for the Rock Bay area that emphasizes a land use pattern of relatively dense industrial and employment use with limited on-site parking complemented by a supply of publicly available shared parking.
- 9.5.2. Explore options for paid, secure employee/ long-term parking , in order to reserve on-street parking primarily for customers.

9.6. Urban Villages, Shops and Services

- 9.6.1. Support the development of shops and services in the designated Urban Villages and Town Centre in the neighbourhood through appropriate land use regulation, urban design/placemaking and public investments.
- 9.6.2. Encourage the District of Saanich to complete streetscape improvements identified in the Action Plan for Burnside Village and to make improvements to road design, parking management and land use regulation that support a more vibrant urban village.

10. Arts and Culture

A vibrant, creative and diverse community includes opportunities for artists, artisans and makers to create, explore, produce, distribute and display their creative goods and services.

Burnside Gorge is uniquely positioned to be a prime hub of creative production and distribution for arts and creative enterprises based on the industrial zoning, available spaces and clustering of creative businesses already located in this area.

The neighbourhood can provide a place for local and sustainable maker economies for creative entrepreneurs. This direction supports the recognition that creative businesses are important to local economic development and that further resource sharing, education and business skill development is needed for creative businesses to grow and sustain their businesses.

Opportunities for creative placemaking including temporary and permanent public art opportunities along the waterfront and trail systems, in greenspaces and urban villages, and the creation of outdoor performance areas. This can further enhance linkages between the industrial and creative sectors, residents and visitors.

10.1. Space for Creation and Production

The Rock Bay area represents a place where artists can work, producing, displaying and selling products.

10.1.1. Ensure that updated zoning for the Rock Bay area includes artist and artisan production, including the production of tangible goods as well as the production of music.

10.1.2. Through the Arts and Culture Master Plan, engage the Arts community and non-profit groups in identifying opportunities, incentives and partnerships to create an incubator space including affordable gallery, studio, and business incubation spaces and space for the co-location of non-profit organizations.

10.1.3. Through the Arts and Culture Master Plan, engage creative businesses, micro-enterprise, the Arts community and non-profit groups in identifying opportunities for affordable artists' housing co-located with studio and gallery space.

10.2. Support Creative Entrepreneurs

Community programs and partnerships may support artists and artisans in becoming successful entrepreneurs, whether they are future business owners who will employ others, or individuals seeking self-sufficiency through micro-enterprise.

10.2.1. Through the Arts and Culture Master Plan, explore ways to link potential creative entrepreneurs, micro-enterprise and self-employed individuals to available resources for business assistance, branded marketing campaigns, and skills sharing as well as access to spaces to make and sell goods.

10.3. Space for Performance

The Rock Bay area hosts important city-wide events, including music festivals which can be accommodated in this non-residential area. Smaller or local events take place at the Selkirk Waterfront and along the Galloping Goose trail. Enhancing performance spaces will support future programming.

14.3.1. Develop performance spaces at Cecelia Ravine Park and Discovery Street as identified in the sections 12 and 15 of this Plan.

10.4. Public Art

Public art can play an important role in placemaking, cultural enrichment, and interpretation of the natural and cultural history of this area for current and future residents.

10.4.1. Introduce public art into urban village areas and Industrial Arts areas as part of streetscape improvements.

10.4.2. Incorporate public art into the design of waterfront trails and parks spaces.

10.4.3. Develop murals throughout the neighbourhood, taking advantage of opportunities on private or public property. An initial project should build on the success of the temporary installation at the BC Hydro remediation site, honouring First Nations history.

Creative City Concept

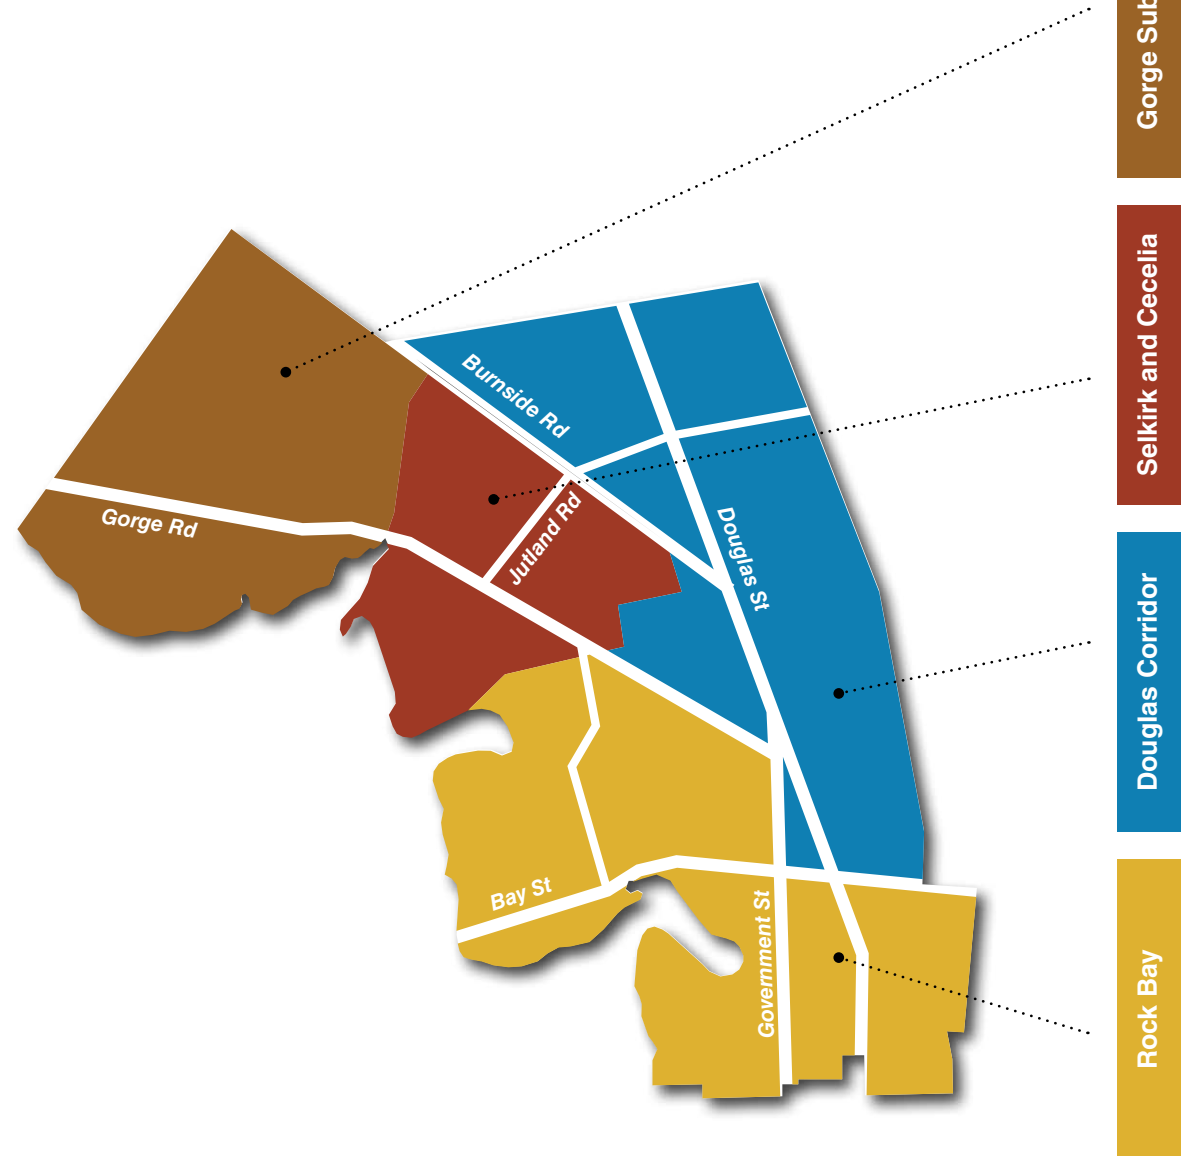

Cities can build culturally rich, urban environments that integrate place, culture and economy. Creative cities create opportunities to attract, retain and nurture talent and to foster the clustering of innovative enterprises. A creative city includes a sense of belonging and social cohesion supported in part through creative and cultural expression.

Creative hubs/clusters are formed by groupings of interconnected and interdependent businesses, places and cultural resources. When networked, the creative activities of businesses, artists, artisans, and entrepreneurs converge to produce new ideas, innovative products, services, art and design. Creative hubs are significant economic stimulators.

11. Neighbourhood Sub-Areas

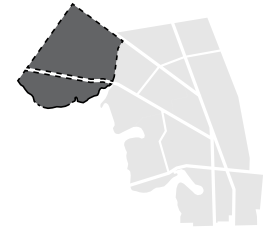

The Burnside Gorge neighbourhood is a diverse neighbourhood consisting of several distinct sub-areas. Because of this, detailed directions for land use, urban design, placemaking, transportation, parks, open space, and trails are provided in the following sections for each of the sub-areas:

- 12. The Gorge Residential Sub-Area to the west of Cecelia Ravine
- 13. The Selkirk and Cecelia Village Sub-Area
- 14. The Douglas Corridor Sub-Area
- 15. The Rock Bay Sub-Area

12. Gorge Residential Sub-Area

Future Land Use Directions and Urban Design

The vision for the Gorge Residential Sub-Area is as a stable neighbourhood bisected by two main arterial corridors. Multi-unit residential development is found along Burnside Road and Gorge Road, stretching to the waterfront.

Gorge Road, formerly the Island Highway, is also an important location for tourist accommodations and related restaurants and retail uses.

The traditional residential areas include a mix of ground oriented residences including single-family homes and attached housing such as duplexes and townhomes.

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Gorge Residential Sub-Area

Land Use Policies

12.1. Gorge Road and Burnside Road Residential Corridors

This plan supports the development of further multi-unit housing along Gorge Road, a small urban village along Gorge Road near Balfour and Irma streets, and maintains Gorge Road's role as a location for tourist accommodation. New development on the south side of Gorge Road should maintain or establish visual and physical connections to the water where possible. With much of the existing multi-unit development likely to remain for the life of this plan, opportunities for redevelopment exist primarily on the western end of the corridor, with incremental redevelopment likely in other areas over time. The Gorge Road Hospital Site, if redeveloped for health care or other uses, should establish a mixed-use frontage along Gorge Road while maintaining a green waterfront, internal circulation and views.

Burnside Road west of Cecelia Ravine is also an evolving corridor supporting primarily residential development up to four storeys in height, with a choice of residential or commercial use at grade. A similar built form should be encouraged along the northern side of Burnside Road in Saanich. New development should enhance the corridor through the provision of treed boulevards and the underground of utilities where possible.

12.2 Gorge Road Land Use Policies

12.2.1. New multi-unit residential will be supported along the Gorge Road Corridor, west of Cecelia Ravine subject to the following criteria:

- i) Development generally up to four storeys on the north side of Gorge Road, to maintain compatibility with the lower-density areas to the north, and generally up six storeys on the south side consistent with Map 9.
- ii) a base density of 1.2 FSR and a maximum density of up to 2.0 FSR where amenities are provided to offset the impacts of additional density.
- iii) Buildings on the north side of Gorge Road, east of Balfour Avenue, may be built to 5 storeys along the Gorge Road frontage, if they support plan objectives, including the creation of space for local-serving commercial uses, with a sensitive transition to lower density areas to the north.
- iv) West of Balfour Avenue, lot consolidation is encouraged in order to support redevelopment which can sensitively transition to adjacent lower density residences, achieve quality site layouts, and avoid "landlocking" single lower-density lots between higher-density developments.

12.2.2. The development of a new Large Urban Village at Gorge Road and Irma Street will be supported, as this area is proximate to pedestrian routes, future waterfront access, employment, and presents redevelopment opportunities.

12.2.3. New development outside of the Urban Village along Gorge Road, may include either ground-floor commercial or residential uses along the Gorge Road.

12.2.4. New restaurant/café's including patio dining will be supported adjacent to and across from Arbutus Park.

12.2.5. In order to avoid the concentration of single-room occupancy (SRO) housing in one part of the city, and to support the continued role of Gorge Road for tourism the further conversion of existing hotel and motel buildings to SRO housing are not supported west of Cecelia Ravine.

12.2.6. A mix of housing units, including units attractive to families with children (e.g., 3 bedroom units) is encouraged where appropriate.

12.2.7. Any redevelopment of the Gorge Road Hospital Site will be in accordance with the policies in this chapter.

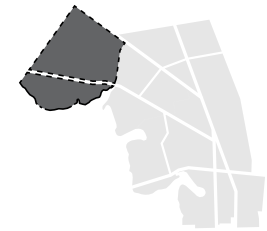

12.3 Burnside Road Land Use Policies:

12.3.1. New multi-unit buildings on the south side of Burnside Road up to four storeys in height will be supported subject to the following criteria:

- i) residential or commercial uses on the ground floor where appropriate
- ii) Development with a base density of 1.2 FSR and a maximum density of up to 2.0 FSR where amenities are provided to offset the impacts of density.

Gorge Residential Sub-Area

Land Use Policies cont'd

- Traditional Residential
- Urban Residential
- Small Urban Village
- Large Urban Village
- Open Space
- Special Planning Area - see page 56
- #** Anticipated Building Height (storeys)

A mix of unit types, including units attractive to families with children, is encouraged along Gorge Road (12.2.5) and in ground-oriented infill development in the large lots along Washington Avenue (12.5.4.).

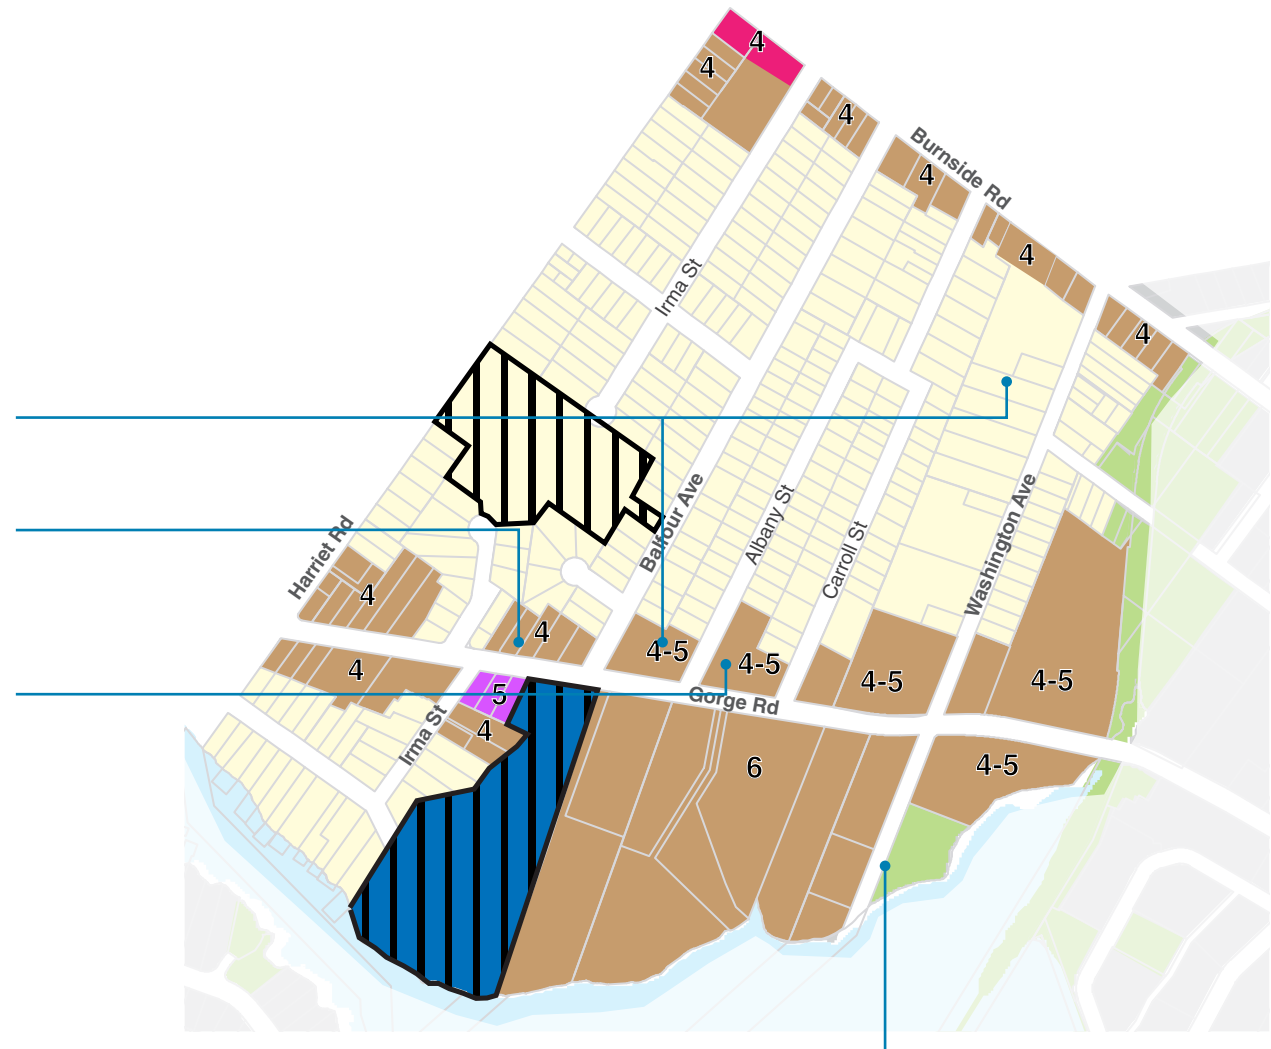

On Gorge Road, west of Balfour Avenue, lot consolidation is encouraged to ensure new buildings sensitively transition to lower-density development, and to avoid “landlocking” single lots. (12.2.1.iv)

On the north side of Gorge Road, east of Balfour Avenue, buildings up to 5 storeys may be supported if they support plan objectives including provision of local-serving commercial uses. (12.2.1.iii.)

Urban residential developments along Gorge Road may be developed with a choice of commercial or residential use at ground floor. (12.2.3)

Conversion of existing hotel and motel buildings to Single Room Occupancy (SRO) housing is not supported west of Cecelia Ravine. (12.2.5.)

Commercial uses including patio dining may be appropriate adjacent to and across Washington Ave. from Arbutus Park. (12.2.4.)

Map 9: Future Land Use Map for Gorge Residential Sub-Area

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Gorge Residential Sub-Area

Land Use Policies cont'd

12.4 Areas for ground-oriented housing:

The intent of this land use direction is to support appropriate intensification through primarily ground-oriented forms of housing within the Traditional Residential areas of Burnside Gorge. A range of housing appropriate within Traditional Residential OCP designations is encouraged, providing options for households who are seeking housing with access to useable outdoor amenity space, and which may support ownership structures such as fee simple row houses, strata townhomes, cohousing or cooperative housing. These housing choices complement denser development appropriate along transportation corridors and in urban villages.

It is intended that redevelopment maintain neighbourhood character of landscaped front and rear yards, tree-lined streets, a rhythm of housing units oriented to the street, and building massing which mitigates impacts on neighbours through appropriate design and building separation (see 12.7, Urban Design). Further, infill development appropriate to lot size and configuration is encouraged in order to support efficient site layouts that reduce the impacts of surface access and circulation. Finally, it is intended that any added development incentivize the conservation of homes of heritage merit.

12.5 Ground-Oriented Housing Policies

12.5.1. Ground oriented housing including attached or detached townhouses and fee simple row houses, will be supported subject to the following criteria:

a) Setbacks should be based on the following guidance:

- Front setbacks should maintain the sense of landscaped front yards and street trees, while

creating semi-private space which encourages social interaction.

- Side setbacks should respond to a development's building orientation and facade height in order to mitigate impacts on neighbours and provide sufficient building separation. Where a unit's primary elevation and living space faces the side lot line, larger side setbacks (approximately 6 metres) are preferred to create useable outdoor amenity space and sufficient access to light and air. On the other hand, side setbacks for units fronting the street may be reduced for consistency with adjacent zoning and development patterns.
- Rear lot setbacks should respect the existing pattern of landscaped back yards, respect privacy and provide sufficient building separation under current and potential development patterns.

b) Floor space ratios should be generally up to 0.8 FSR. Where all required parking is fully enclosed in an underground (basement) structure, up to 1.0 FSR may be supported.

c) Minimum open space and maximum lot coverage should provide for landscaped front and back yards and access to individual or shared open space for units.

12.5.2. Townhomes and other housing forms which transition from Urban Residential are encouraged in Traditional Residential lots adjacent to urban residential areas

12.5.3. New stacked townhouses or multi-unit residential buildings up to three storeys will be supported along arterial roads (e.g. Harriet Road).

12.5.4. Denser ground-oriented housing (for example, townhomes) with a significant proportion of units

designed to be attractive to families with children are supported on the large lots on the west side of Washington Avenue.

12.5.5. The retention of homes with heritage designation, listed on the Heritage Register, or of heritage merit (see Map 7) is encouraged as a condition of a rezoning which adds density. Ways of incentivizing heritage conservation may include added density or the relaxation or varying of requirements (such as on-site parking or maximum lot coverage) if a heritage property is designated.

12.5.6. For redevelopment of townhomes, consolidation of deeper lots is encouraged. This results in more efficient densities, circulation and site layouts. Development sites should have sufficient width and depth to accommodate the desired character identified in 12.5.1. Smaller redevelopment projects which replicate the pattern of existing homes along the street (e.g. duplexes, triplexes or fourplexes) are supported on the shallower lots in this neighbourhood or where lot consolidation is not possible.

12.5.7. Creativity in design to meet the intent of these policies is encouraged, without compromising desired building form and character.

Gorge Residential Sub-Area

Urban Design Policies

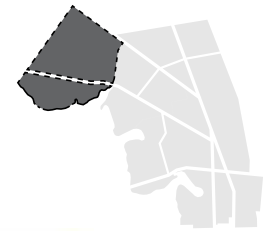

12.6 Gorge Residential Urban Design Actions

The City will adopt design guidelines and zoning regulation for Burnside and Gorge Road Residential Corridors including the following objectives:

- 12.6.1. To ensure new development is compatible, neighbourly and creates a good fit within these established residential neighbourhoods
- 12.6.2. To ensure new development along Burnside and Gorge Roads is oriented positively towards the street to create a more attractive and pedestrian friendly streetscape environment
- 12.6.3. To ensure a sensitive transition to the Gorge water way and the larger lots adjacent to it
- 12.6.4. To preserve important views towards the Olympic Mountains from north-south streets intersecting with Gorge Road
- 12.6.5. To preserve, enhance or establish native shoreline ecosystems and maintain habitat and views of a green shoreline from the adjacent water and from public trails on the opposite shore
- 12.6.6. To mitigate the impacts of noise from traffic along these two corridors on adjacent dwelling units through design features and building orientation
- 12.6.7. To minimize impacts of off-street parking on the pedestrian environment.

Ensure new development along Burnside and Gorge Roads is oriented positively towards the street to create a more attractive and pedestrian friendly streetscape environment

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Gorge Residential Sub-Area

Urban Design Policies

12.7 Gorge Sub Area Ground-oriented Housing Urban Design Policies

The City will adopt design guidelines for ground-oriented residential infill development to guide new housing with consideration for the following:

12.7.1. present a friendly face, with units adjacent to the street or other public spaces

12.7.2. be a good neighbour to adjacent homes, with massing mitigating impacts on neighbours

12.7.3. encourage street vitality and social interaction amongst neighbours, with useable semi-private space or front porches along streets

12.7.4. ensure livability and considerations for outdoor space

12.7.5. contribute positively to the unique character and identity of the neighbourhood

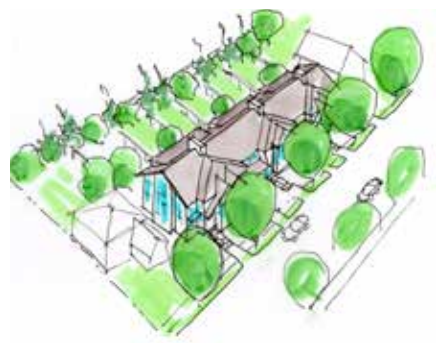

12.7.6. emphasize green building and site sustainability approaches

12.7.7. provide sufficient building separation to create an attractive living environment. Separation between buildings on one lot should generally be equal to the height of building facades for a unit's primary living spaces and should provide opportunities for landscape along interior drive aisles.

Duplex or Houseplex

Free Simple Rowhouse

Townhome Cluster

Perpendicular Townhome Cluster

Figure 1: examples of different ground-oriented housing layouts. Houseplexes replicate the pattern of single detached homes and may be appropriate on shallower lots. Townhome typologies may require lot consolidation in order to accommodate desired setbacks and building separation. Creativity in design is encouraged while respecting the policy goals of this section.

Gorge Residential Sub-Area

Placemaking and Public Realm

The vision of the Gorge Sub-area is of a green residential area with ample tree coverage. Public realm improvements should enhance this quality, with particular emphasis on the Gorge and Burnside Road corridors and the proposed Doric Street Connector.

Develop a distinct streetscape for the Harriet-Burnside intersection, in collaboration with Saanich, as a welcoming element for Burnside Village. See Saanich's Tillicum-Burnside Streetscape Action Plan (2005).

Develop a distinctive placemaking kit for Gorge Road, including elements such as banners, pedestrian-oriented lamps, street furniture and seating at select locations.

Focus streetscape improvements as part of urban village development on the south side of Gorge Road between Irma and Balfour Streets. Design should incorporate on-street parking, street trees, street furnishings, bicycle parking and space for café seating, wrapping around the Gorge-Irma corner. Consider this as a location for public art.

Enhance pedestrian comfort by establishing a landscaped boulevard with street trees along the south side of Burnside Road, through collaboration with current property owners.

Doric Street Connector: design a bicycle-pedestrian path as an attractive space that relates to future development around it and has 'eyes on the path'

Enhance Cecelia Ravine Park as a gathering place with features such as an enhanced amphitheater, picnic shelter, seating or other features for live music, theatre, movies, block parties and informal gatherings.

Gorge Residential Sub-Area

Special Planning Areas

Over time, two opportunity sites have been identified which may be redeveloped. The following principles should be considered when evaluating development proposals.

12.8. Gorge Road Hospital Site Policies

Should the Gorge Road hospital site redevelop the following policies should be addressed in any overall site masterplan which should be developed for the site:

12.8.1. Establish a mix of residential and commercial uses including multi-unit residential buildings, if the site transitions from a purely health care use

12.8.2 Provide opportunities for strategic intensification that supports housing affordability and/or affordable housing objectives

12.8.3. Establish a waterfront pathway from Lotus Street east towards Arbutus Park, with a connection from the waterfront northward in line with Balfour Street

12.8.4. Conserve the native coastal forest and aquatic ecosystems and maintain a “green view” from the water

12.8.5. Establish a waterfront park and small boat launch

12.8.6. Establish internal circulation east-west across the site, with the potential to connect with the established street network and with the potential to link in to future east-west connections, and north towards Balfour Avenue.

12.8.7. Maintain public views from the Balfour-Gorge intersection towards the Olympic Mountains

12.8.8. Establish buildings with an active street frontage and uses along Gorge Road, with enhanced streetscape supporting an urban village character between Balfour Avenue and Irma Street

12.8.9. Building heights and scale should be sympathetic to the scale, character and context of the area which is primarily Urban Residential along

12.8.10. Seek opportunities to improve tree canopy.

Gorge Road Hospital Site concept plan

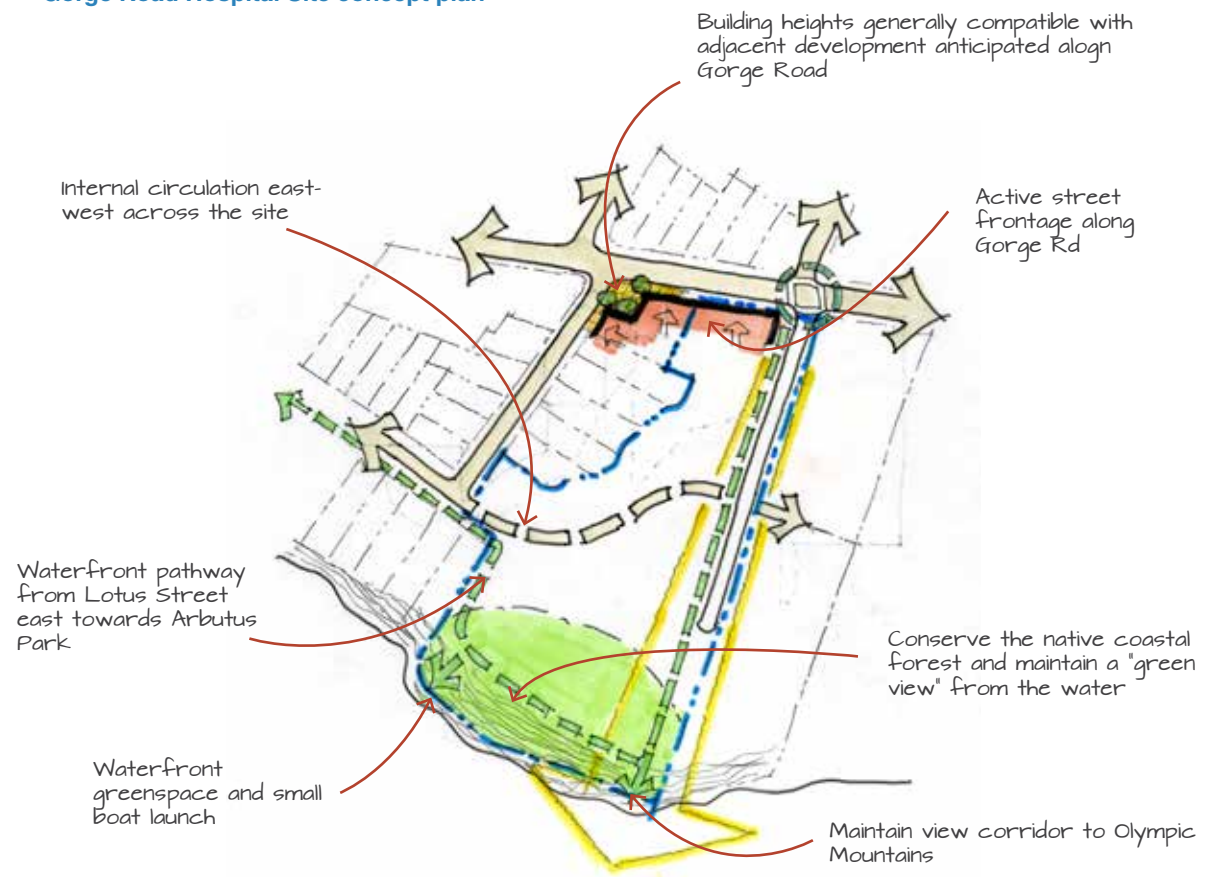

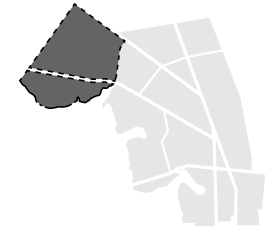

Figure 2. concept sketch showing principles for Gorge Road Hospital Site

Gorge Residential Sub-Area

Special Planning Areas Cont'd

12.9. Chown Place Policies

Chown Place provides affordable housing for seniors in an environment with a high amount of open space. The site incorporates fruit trees from its former use as an orchard. A small Gary Oak meadow exists on the south side of the site, adjacent to Irma Street. The site is currently developed to a relatively low density. Principles for the redevelopment of Chown Place include:

- 12.9.1. Any redevelopment of the site should maintain its affordable housing function
- 12.9.2. Protect or replace all existing non-market housing units
- 12.9.3. Provide circulation for pedestrians through the site to connect with the existing street network
- 12.9.4. Protect the existing Garry Oak Meadow and views at the end of Irma Street
- 12.9.5. Consider a mix of townhomes, stacked townhomes or low-rise multi-unit buildings up to 3 storeys in height and up to 1.0 FSR to site
- 12.9.6. Enhance the tree canopy including tree species within the landscape which reflect the site's history as an orchard.

Gorge Sub-Area

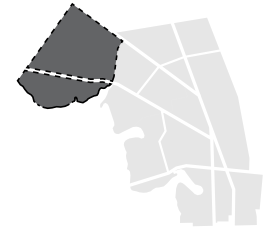

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Gorge Residential Sub-Area

Walking and Cycling Improvements

12.10. Walking and Cycling Priorities

The following desired improvements are listed in general order of priority, recognizing that funding, needs and opportunities may change over time.

12.10.1. Doric Connector: Establish a pedestrian and bicycle connection from Maddock Street to Cecelia Road and the Galloping Goose Regional Trail.

12.10.2. Burnside Road: Complete detached sidewalk along length of Burnside Road, with treed boulevards where voluntary easements can be acquired. Evaluate removal of an eastbound lane to accommodate on-street parking or a bicycle lane (with Saanich)

12.10.3. Gorge Road: Retrofit existing sidewalk in constrained locations on south side to address barriers (trees, utility poles). Seek to address trees, utility poles and encroaching vegetation in the sidewalk on the north side.

12.10.4. Washington Avenue: Complete a sidewalk on Washington Avenue from Gorge Road to Arbutus Park.

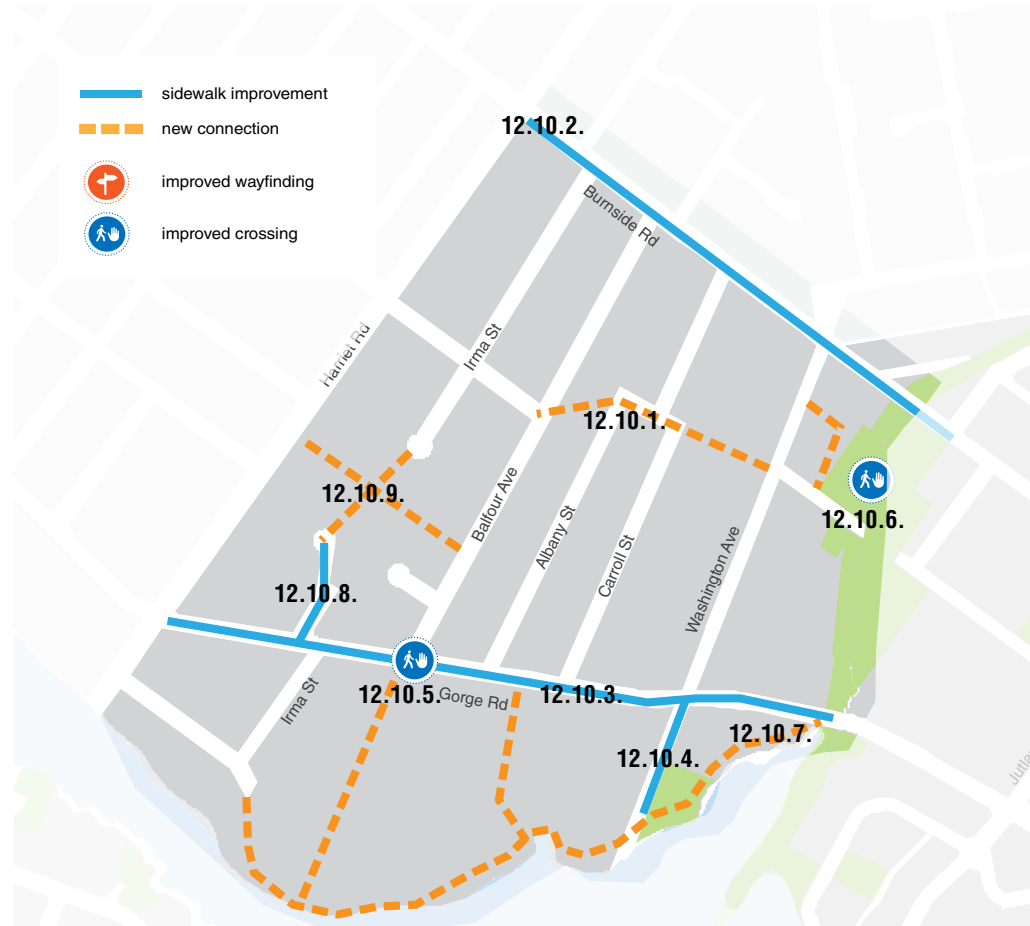

12.10.5. Gorge Road and Balfour Avenue: Create the fourth leg of the crosswalk across Gorge Road and install sidewalk on east side of Balfour where missing (immediately north of Gorge Rd).

12.10.6. Galloping Goose Wayfinding: Improve pathway (e.g. lighting, grade) and add signage to better connect Cecelia Road, Napier Lane, the Galloping Goose trail, and Burnside Road.

12.10.7. Galloping Goose to Washington Avenue: Complete a bicycle and pedestrian connection between the Galloping Goose, Arbutus Park and Washington Ave. [also see Section 12 - Parks, Trails and Open Spaces on page 85]

12.10.8. Irma Street: Install sidewalk connecting Gorge Rd East to private walkway at end of cul-de-sac.

12.10.9. Create pedestrian connections through Chown Place (with redevelopment or partnership).

Map 10: Walking and cycling improvements for the Gorge Residential Sub-Area

Gorge Residential Sub-Area

Roadway Improvements

12.11. Burnside Road

Burnside Road is to be prioritized as a people place characterized by sidewalks separated from traffic by planted medians and canopy trees, by on-street parking and by redevelopment creating a positive environment along the street. Burnside Road is also part of the City's secondary bicycle network.

12.11.1. Interim Improvements

a. Complete detached sidewalk along length of Burnside Road, with treed boulevards where voluntary easements can be acquired. Evaluate removal of an eastbound lane to accommodate on-street parking or a bicycle lane (with Saanich)

b. If the proposed Cecelia Road Greenway is not completed in due course, bicycle facilities on Burnside Road should be prioritized in place of on-street parking from Harriet Road to Douglas Street.

Note that between Washington Ave. and Harriet Road, the District of Saanich is responsible for the roadway (curb-to-curb). Any future improvements within the roadway will need to be agreed upon by the District of Saanich.

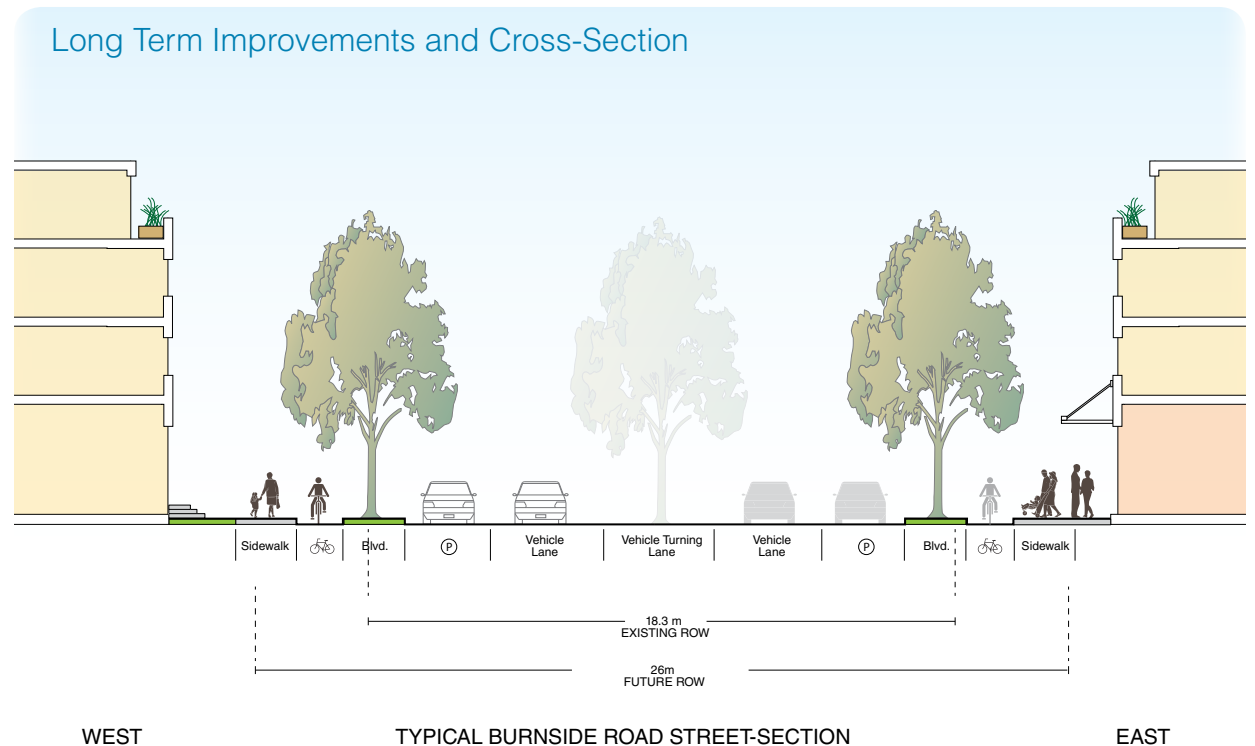

Figure 3: Long term cross section for Burnside Road

Gorge Residential Sub-Area

Roadway Improvements

12.12. Gorge Road

Gorge Road is designated as part of the City's priority All Ages and Abilities bicycle network and is identified as an important Frequent Transit corridor which will connect Vancouver Island Technology park, both Camosun College campuses, UVic and the Hillside and Tillicum shopping centres.

12.12.1. Interim Improvements

a. Seek easements or property along Gorge Road west of Cecelia Ravine to complete protected bicycle lanes consistent with the Bicycle Master Plan, prior to redevelopment of properties.

b. Implement protected bicycle lanes in existing roadway east of Jutland Road by removing one inbound (eastbound) travel lane, concurrent with bicycle improvements to Government Street consistent with the All Ages and Abilities bicycle network. These changes should be accompanied by improvements to optimize traffic flows to support frequent transit levels of service.

c. Work with BC Transit to support improvements (e.g. signal prioritization, enhanced bus shelters supporting real-time information) to support the Frequent Transit corridor.

d. Improve connections from Gorge Road to the Galloping Goose Regional Trail, through completion of a trail connection to Washington Avenue (see p. 56).

Long Term Improvements and Cross-Section

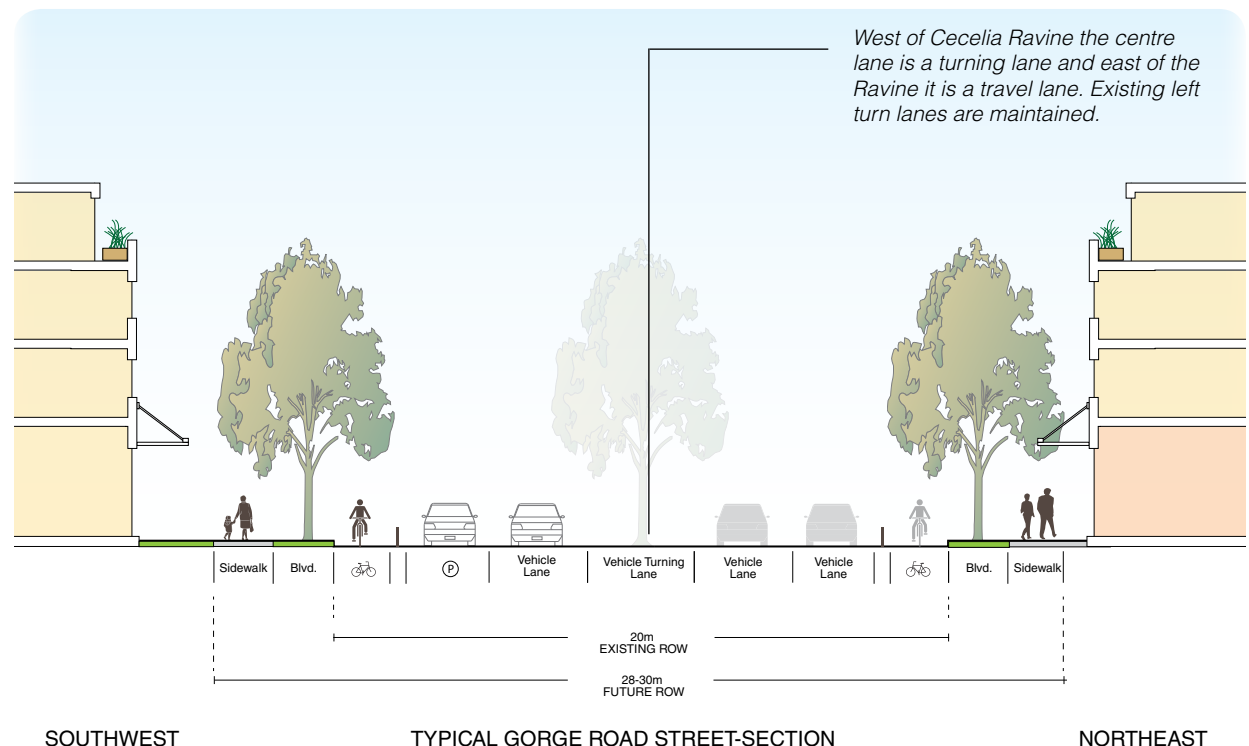

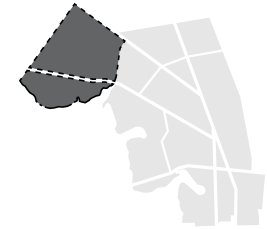

Figure 4: Long term cross section for Gorge Road

Parks, Open Space and Trails

12.13. Enhancing Existing Parks and Natural Areas

12.13.1. Arbutus Park: In 2016, Arbutus Park is under-utilized and indeed not well-known to residents of the neighbourhood. This presents a key opportunity for enhancement that would draw people to the waterfront. The City should engage in a park design and management plan guiding improvements to the park. Principles guiding park design include:

- Create a variety of activities and facilities to draw different park users. During the local area planning process, residents expressed interest in a playground and family activities, picnicking, community garden space, improved connections to walking paths, a space for dogs (delineated from the rest of the park), enjoyment of nature, access to the water, and improved sense of safety as ideas of important things to consider.
- Improve wayfinding to the park and provide a sidewalk connection to Gorge Road.
- Undertake an environmental review and conduct detailed design of a pathway to connect Arbutus Park to Cecelia Ravine Park that minimizes environmental impacts to the important ecology of the shoreline and mudflats.

12.13.2 Cecelia Ravine Park: Update Park Management Plan and design for the addition to Cecelia Ravine Park (acquired in 2016), the enhancement of an event/gathering space, and enhanced connections to Cecelia Road

12.14. New Parks and Public Spaces

12.14.1. Harriet Road Waterfront: In conjunction with Saanich, develop an improvement plan for this undeveloped road right-of-way area. Residents expressed interest in the following improvements: a waterfront overlook, considering views to the Gorge as well as westward along the Gorge; access to the water for swimming (e.g. swim raft) and possibly boat launch; connection to a waterfront trail system; and a play area for children.

12.14.2. Manchester Road Green: Expand the existing greenspace along Manchester Road to create a small green space serving and enhancing this evolving residential area.

12.14.3. Gorge Road Hospital Site: Consider development of a waterfront park as part of any major redevelopment of the Gorge Road Hospital site. In the interim, seek an easement agreement to secure lands for the future development of a waterfront walkway.

12.15 Paths and Trails

12.15.1. Waterfront Pathways: Completion of the waterfront walkway from the Galloping Goose Regional Trail to Lotus Street is a priority for the neighbourhood.

- Accelerate completion of a pathway link between the Galloping Goose and Arbutus Park, designed for pedestrians and cyclists.
- The pathway west of Arbutus Park may be designed for pedestrians only, or for pedestrians

and cyclists depending on the available widths and existing habitat, slopes and other constraints.

- Emphasize the preservation and enhancement of shoreline and aquatic habitats in any waterfront pathway development.
- Seek opportunities along the pathway to interpret the history and natural environment of the Gorge Waterway.
- Provide seating places and shaded areas to accommodate people of all abilities

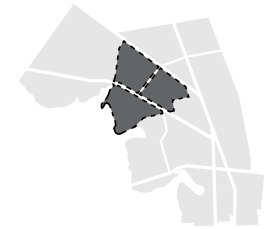

12.16.2. Doric Connector: Completion of the Doric Connector is a priority for the neighbourhood, and supports the land use vision of establishing a Large Urban Village in the Cecelia-Jutland area.

12.17 Natural Environment

12.17.1. Habitat restoration: Continue to work with the Gorge Waterway Initiative and other partners to support the restoration of shoreline and aquatic ecosystems through habitat enhancement projects. Continue to work on invasive species removal and the planting of native vegetation in Cecelia Ravine. Improve the mouth of Cecelia Creek for fish habitat. Ensure that waterfront pathway design and construction, boat launches and other features do not cause negative impacts on sensitive shoreline and aquatic ecosystems.

13. Selkirk and Cecelia Village Sub-Area

Future Land Use Directions and Urban Design

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

The vision for this area is to develop as a more urban, mixed use heart of the neighbourhood, between the residential areas to the west and the employment areas to the east, accessible to the Galloping Goose Regional Trail. The vision could add 1,500 residents to the areas near Cecelia Road, Jutland Road and Selkirk Village, supporting more vibrant destinations at Selkirk Village with its waterfront, shops, services and gathering places. It includes unique opportunities for mingling light industrial spaces with residences, and supports a second focus for the urban village at the Jutland-Cecelia intersection, anchored by the Burnside School.

Over time, Jutland Road is envisioned to evolve into a main street with a mix of retail, housing and employment and high quality public spaces.

With its proximity to Downtown and Selkirk Village and its urban context, the Sumas residential area to the southeast of Jutland Road is ideally suited for residential infill development. New housing along local streets should maintain the character of tree-lined streets and front yards in this residential pocket and retain the most important heritage homes.

Along Cecelia Road and adjacent to Selkirk Village, industrial and employment uses may transform over time with new development which generally maintains ground floor industrial-flex spaces with residential uses above. This vision balances preservation and enhancement of employment lands, and the addition of multi-unit housing supporting the expanded urban village.

Figure 5. Concept drawing showing the future vision of Selkirk and Cecelia Village, with protected bicycle lanes, on-street parking, and new gathering spaces and mid-rise buildings.

Selkirk and Cecelia Village

Land Use Policies

13.1. Land Use Policies

13.1.1. New mixed use development will be supported along Jutland Road, subject to the following:

- a. new buildings having active storefront-type frontages along Jutland Road.
- b. On parcels designated Urban Village, village commercial uses should be located at the ground level, particularly at the corners of Jutland and Cecelia Roads. (See pp. 26-27)
- c. On parcels designated Employment with Limited Residential, light industrial or commercial uses, including village commercial uses, should be located at ground level.

13.1.2. Along local streets in the Sumas residential area east of Jutland Road, new intensive residential development will be supported through redevelopment subject to the following:

- a. Stacked townhomes or small apartment buildings up to three storeys, with density up to 1.2 FSR, are appropriate generally on consolidations of two lots or on larger lots, consistent with Map 10. Less intensive infill options including house conversions are supported on individual lots.
- b. Homes listed on the Heritage Register, or of heritage merit, should be retained and protected through heritage designation as a condition of any rezoning which adds density (See Figure 19-21).

13.1.3. New residential development will be supported along Burnside Road between Jutland Road and the laneway north of Manchester Street, subject to the following:

- a. New attached dwellings or apartments, up to four storeys, are encouraged generally on consolidations of two or more lots.
- b. A base density of 1.2 FSR is supported, with density up to 2.0 FSR where amenity contributions are provided to offset the impacts of density.
- c. New residential development may include commercial uses on the ground floor, except retail and restaurant uses unless adjacent to Jutland Rd.

13.1.4. New residential development will be supported in the Industrial Employment with Limited Residential areas (see Map 10) only where one storey of light industrial flex space is provided at the ground level. Along Cecelia Road only, the actual use of this space may include uses which

activate the street such as cafes, food services, personal services and retail uses.

13.1.5 Light industrial flex space should include sufficient floor-to-ceiling heights to accommodate light industrial uses, which may include a mezzanine level, as well as provisions for truck loading, and should meet codes and design guidelines for appropriate separation from non-industrial uses above

13.1.6 With any future redevelopment of the GVSD works yard, a mix of light industrial employment and residential uses, with connectivity established throughout the site, and an urban village frontage on Cecelia Road opposite the Burnside School site, would be supported.

Figure 6: an example of an Industrial Employment and Residential mixed use development featuring industrial/flex space at ground level, with residences above.

Selkirk and Cecelia Village

Land Use Policies

Legend

-  General Employment
-  General Employment with limited residential
-  Traditional Residential
-  Urban Residential
-  Large Urban Village
-  Park/Open Space
-  Special Planning Area
-  # Anticipated Building Height (storeys)

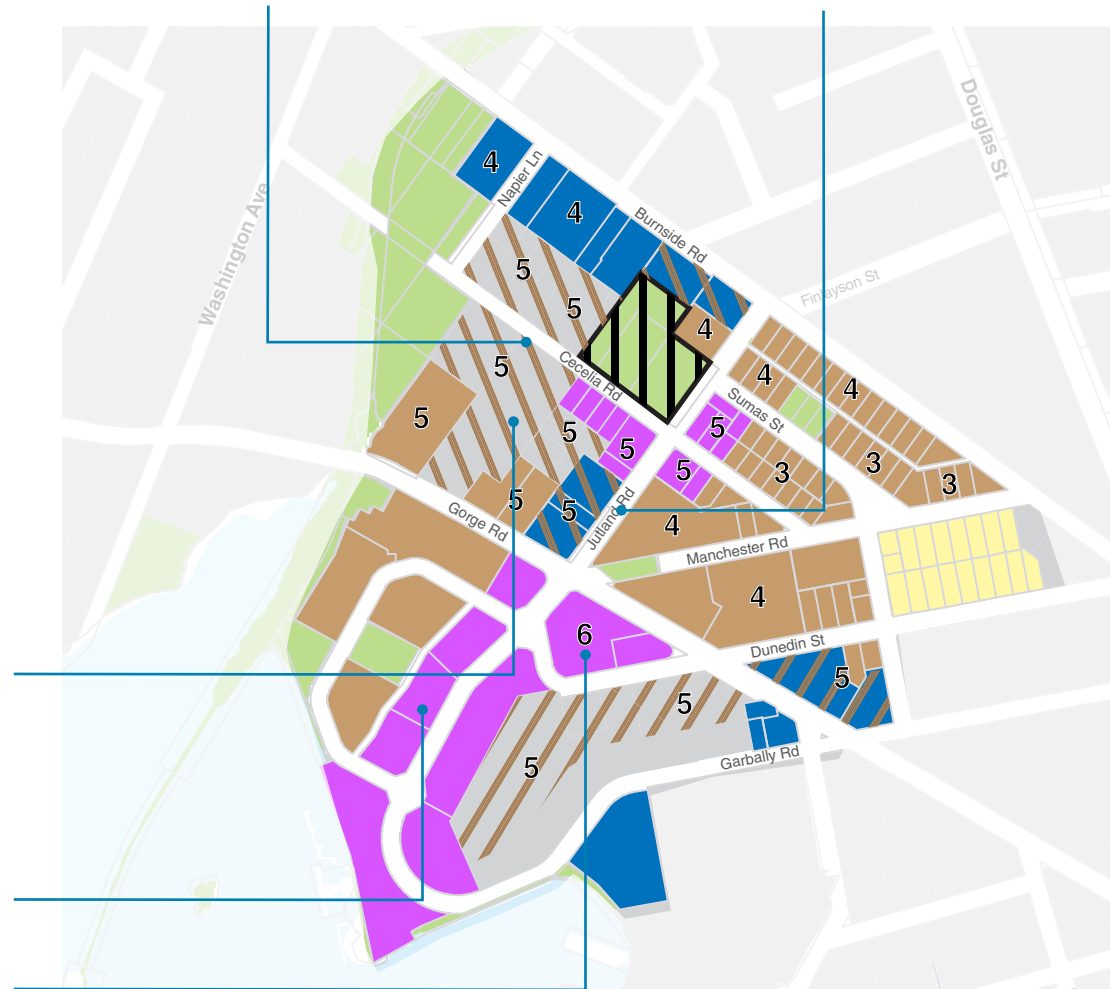

13.1.6 With any future redevelopment of the GVSD works yard, a mix of light industrial employment and residential uses, with connectivity established throughout the site, and an urban village frontage on Cecelia Road opposite the Burnside School site, would be supported.

Live-work uses or home occupations would be supported in the townhomes fronting on Jutland Road

For mixed use projects which are primarily residential on this site, more than six storeys may be supported with a building height generally consistent with the existing building across Jutland Road.

Along Cecelia Road, uses which activate the street such as cafes, food services, personal services and retail uses may be located within industrial flex spaces (see 13.1.4)

Light industrial or commercial uses, including village commercial uses, should be located at ground level along Jutland Road in areas designated for Employment with Limited Residential (see 13.1.1.c.)

Map 11: Future Land Use Map for Selkirk and Cecelia Village sub-area

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Selkirk and Cecelia Village

Urban Design Policies

13.2. Urban Design Policies

The City will adopt design guidelines for Selkirk and Cecelia village, the adjacent residential areas, and industrial-employment and residential mixed use areas, that include the following objectives:

13.2.1. to create a pedestrian oriented main street character with active and attractive shop fronts along Jutland Road

13.2.2. to ensure new development responds positively to topography, i.e., maintains active, accessible ground floor uses on commercial streets, and minimizes view impacts.

13.2.3. to maintain and enhance the existing character of green front yards, visible front entrances, sloping roofs, and tree-lined streets along local streets in the Sumas residential area east of Jutland Road.

13.2.4. To maintain and enhance Cecilia Road as a pedestrian oriented street by, for example, incorporating active ground floor uses and attractive frontages, incorporating residential uses on upper stories to overlook the street, and locating loading and parking, and where possible, access from the rear of developments.

Principles for development of the Cecelia Village Area

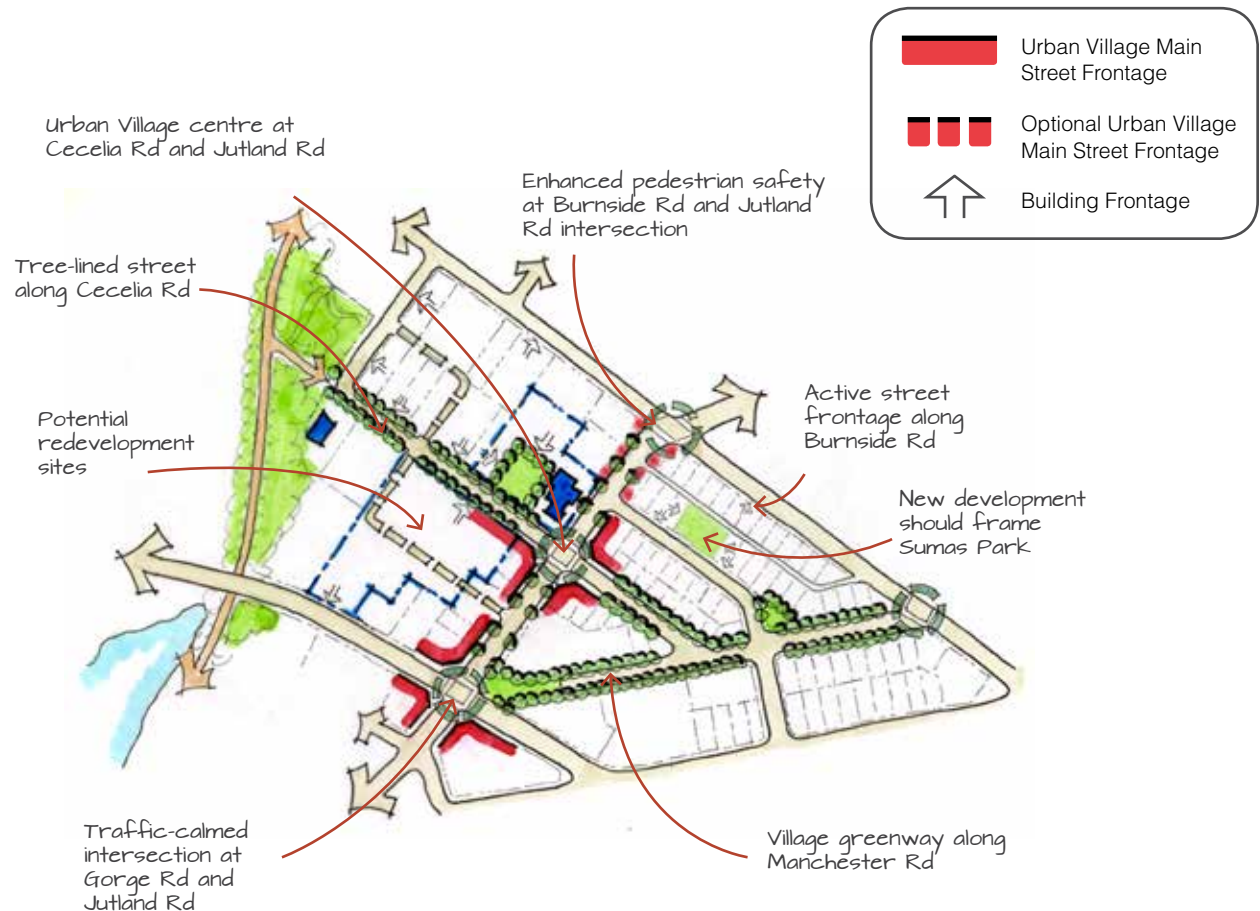

Figure 7. concept sketch showing principles for development of the Cecelia Village Area

Selkirk and Cecelia Village

Placemaking and Public Realm

13.3. Placemaking Priorities

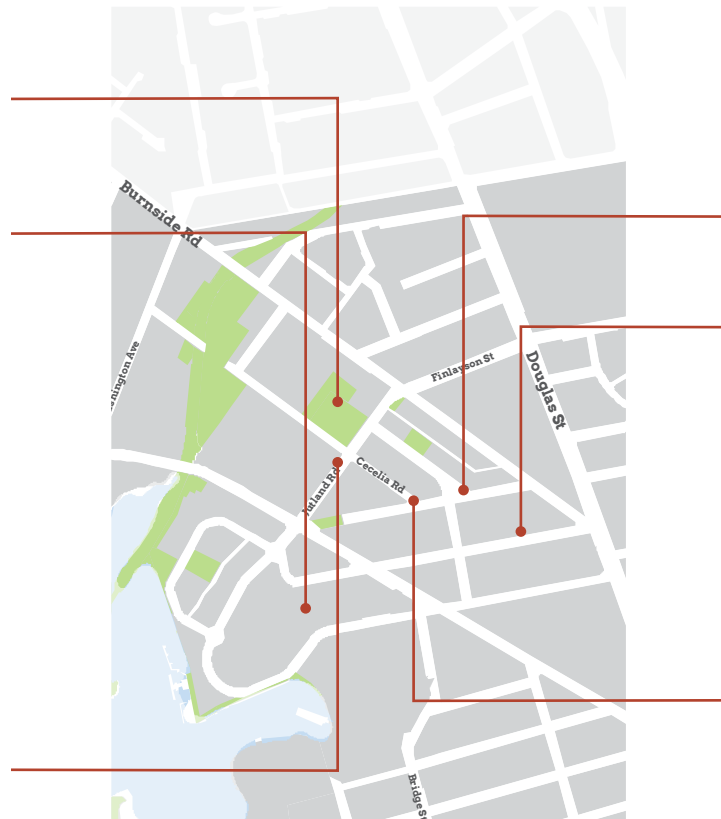

Placemaking within this area is intended to support the extension of an urban village along Jutland Road with an added focus at the Cecelia-Jutland intersection.

Incorporate a greenspace as part of a redevelopment of Burnside School site, to serve as a “Village Green” for the area.

With redevelopment, create a shared street or lane connecting Dunedin Street to Garbally Road, building on the design features of Selkirk Village but supporting light industrial uses at grade.

Develop a distinctive streetscape for Jutland Road, considering street furnishings, landscape, pavement, public art or other features. The Jutland-Cecelia intersection should be a focus of design, wrapping around the corners to provide gathering space.

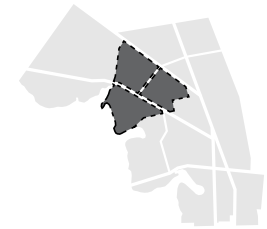

Expand and enhance the greenspace at Sumas and Manchester Streets to create a more attractive small public space.

Establish quality landscape and streetscape to create a pleasant interface between residential area and industrial-employment across Dunedin Street.

Develop a tree canopy along Cecelia Road, and maintain the distinctive flowering trees on Manchester Road and Frances Street.

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Selkirk and Cecelia Village

Special Planning Areas

13.4. Burnside School Site

The Burnside School is expected to continue to function as a school with potential for communities facilities and amenities at the site. The following policies would apply if the Burnside School site is redeveloped for uses other than school functions. In this case, the Burnside School site is envisioned as a site for re-use and redevelopment with opportunities for community-serving space. In the case of redevelopment, this site should include:

13.4.1. Redevelopment as a mixed use site considering opportunities for community uses and space

13.4.2 A revitalized Burnside School Building, conserving the building's heritage and exploring opportunities for community-oriented uses.

13.4.3. A green space, fronting on Cecelia Road, serving as a central greenspace for the urban village focused at Cecelia-Jutland.

13.4.4. Consideration of additional housing including affordable housing consistent with the scale of the urban village.

Selkirk and Cecelia Village

Walking and Cycling Improvements

13.5. Walking and Cycling Priorities

The following desired improvements are listed in general order of priority, recognizing that funding, needs and opportunities may change over time.

13.5.1. Alpha Street: Complete sidewalk, boulevard and wayfinding signage (for Galloping Goose) on Alpha Street.

13.5.2. Jutland Road and Burnside intersection: Evaluate this intersection for pedestrian improvements, giving consideration to sightline issues and reviewing the need for the southbound merging lane south of Burnside Road.

13.5.3. Jutland Road and Gorge Road Intersection: taking into account the designation of an alternative primary truck route, establish a more pedestrian-friendly design for the intersection. Enhance the visibility of connections between this intersection and Manchester Road.

13.5.4. Create a new street linking Dunedin Street to Garbally Street, building on the character of Selkirk Village (with redevelopment).

13.5.5. Jutland is envisioned as a main street, complete with sidewalks and street trees. For more information, see placemaking on page 43.

13.5.6. Improved wayfinding signage from Galloping Goose to Jutland Road in Selkirk Village.

13.5.7. Evaluate the need for a pedestrian crossing of Burnside Road near Manchester Road as redevelopment occurs.

13.5.8. Introduce traffic calming at the Manchester-Sumas intersection to support the neighbourhood connection for cyclists, along with improvements to the triangular green space.

Map 12: pedestrian improvements for the Selkirk and Cecelia Village Sub-Area

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Transportation and Mobility

Roadway Improvements

13.6. Jutland Road

Jutland Road is the future main street for Selkirk and Cecelia Village, as well as part of the primary bicycle network. Priorities include enhanced streetscapes and street furnishings, trees, and bicycle facilities, while maintaining the role of on-street parking in buffering pedestrians, calming traffic and supporting businesses. The City should evaluate the potential for alternative routes for heavy trucks and consider redesign of Jutland Road's intersections at Burnside Road and Gorge Road to better support pedestrians.

Interim Improvements

13.6.1. Interim improvements enhance the Jutland-Burnside intersection, removing a southbound travel lane. Enhanced bicycle facilities co-exist with on-street parking on one side of the street. The overall design results in the loss of 8 on-street parking spaces out of 23 total.

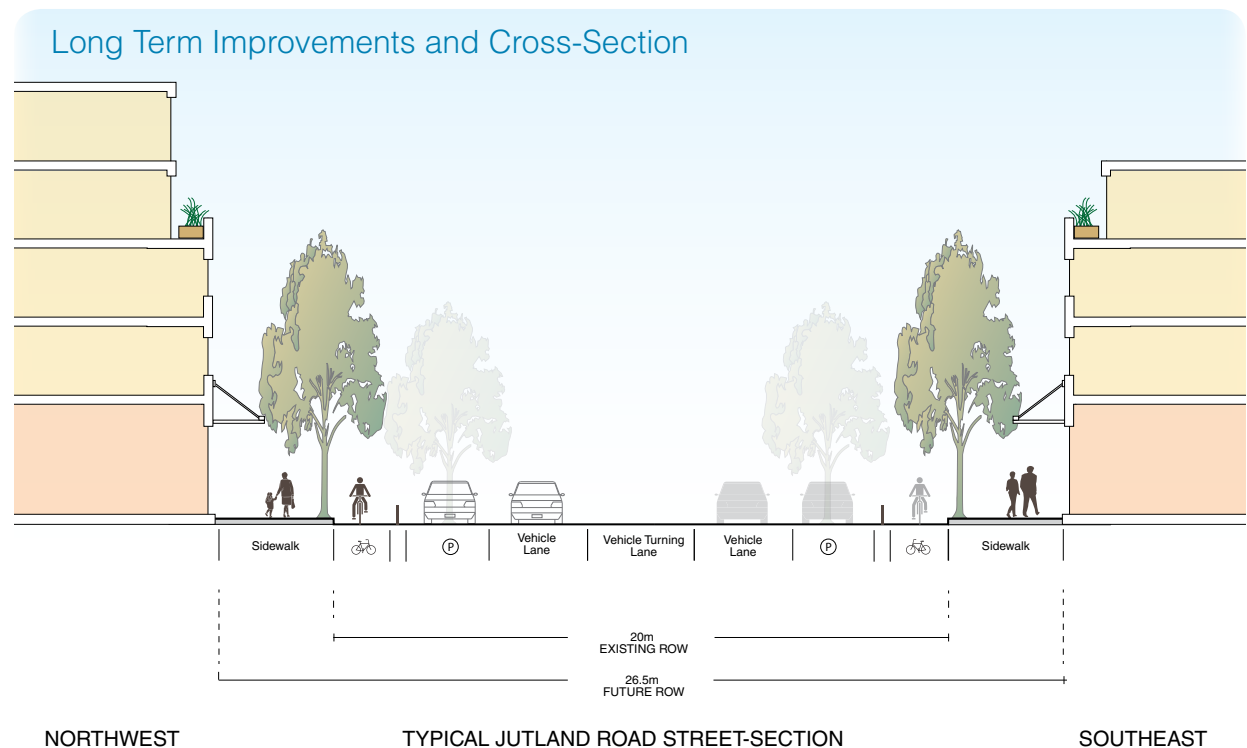

Figure 8: Long term cross section for Jutland Road

Selkirk and Cecelia Village

Parks, Open Space and Trails

13.7 Enhancing Existing Parks and Natural Areas

13.7.1. Cecelia Ravine Park: Significant investments have been made in Cecelia Ravine Park, and the community sees opportunities to increase use of the park even further. A management plan for the park was approved by Council in 2011 and key initiatives identified in the plan have already been completed, including the installation of the youth bike park, a community garden and the beginnings of some stream restoration work. A large section of the green space is owned by the Capital Regional District (CRD) and operated as the Galloping Goose Regional Trail.

Ravines can play a critical role in the protection of natural values in urban areas. In addition, Cecelia Creek was one of the first streams to be day-lit within the boundaries of the City of Victoria.

- a. Work to remove invasive species and to improve native habitats in the ravine. Continue restoration of the creek and watershed. In addition, opportunities to make the mouth of Cecelia Creek more fish-friendly should be explored.

- b. Enhance the park's function for events through improvements to the amphitheatre function, collaboration with the Burnside Gorge Community Associate on programming, and consideration of a shelter, seating, or other features to support music performances, block parties, films, live theatre, or casual neighbourhood gatherings.
- c. Improve wayfinding signage to the park as well as internal park signage.
- d. Improve the connection of Cecelia Ravine and Cecelia Road through pathway improvements (e.g. grade, signage and lighting). See also 12.10.6.
- e. Update Park Management Plan and design to include the addition to Cecelia Ravine Park (acquired in 2016)

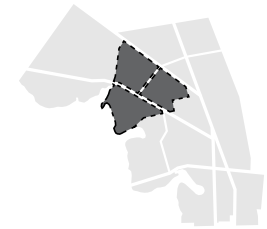

13.8. New Parks and Public Spaces

13.8.1. Burnside School Site: As part of a re-use of the Burnside School site, consider the establishment of a green which serves as open space for the emerging urban village. This space may use all or part of the existing greenspace on the school site and should be designed in conjunction with a re-use of the site which retains the existing heritage school.

13.9. Paths and Trails

13.9.1. Galloping Goose: Work with the CRD to:

- a. Improve connections to the Galloping Goose at Gorge Road, Cecelia Road, and Alpha Street.
- b. Improve conditions along the Galloping Goose to enhance sense of safety, lighting, and better sharing of the trail among different user groups.
- c. Widen the trail surface to a minimum 5m width.
- d. Improve wayfinding signage from the Galloping Goose to Jutland Road in Selkirk Village, Cecelia Road, Burnside Road and Alpha Street.

14. Douglas Corridor Sub-Area

Future Land Use and Urban Design

Douglas Corridor is envisioned to be the future Rapid Transit spine for the region, with stations envisioned at Mayfair Town Centre, near the intersection of Douglas Street and Finlayson Street, and at Humber Green, near the intersection of Douglas Street and Market Street.

In the years ahead, BC Transit expects to invest in creating a Frequent Transit level of service, including enhanced station areas and 24-hour bus lanes, as an ongoing transition to Rapid Transit.

Future mixed-use development will be focused on the station areas at Mayfair Town Centre and Humber Green, with much of the remaining corridor reserved for general employment uses including light industry. These areas provide an important reserve of land for future business.

Figure 9: Concept drawing showing an example of a frequent transit route through a Town Centre, with enhanced sidewalk and protect bicycle lanes framed in by tall buildings. In this example, Light Rail Transit (LRT) is shown with tracks along the side of the right-of-way, although centre lane is another common case for LRT.

Douglas Corridor

Land Use Policies

14.1. Humber Green

Humber Green is the future northern gateway to downtown and as such will support a mix of commercial and residential uses which emphasize retail frontages along Douglas Street.

Humber Green Land Use Policies:

- 14.1.1. New commercial and mixed-use development will be supported along arterial roads in Humber Green Village.
- 14.1.2. New commercial, mixed-use or residential uses will be supported fronting on the internal streets of Humber Green: Ross Lane, Hill Street, Westborough Place, and Kings Road.
- 14.1.3. New development of up to six storeys with a base density of 1.5 FSR is supported, with a maximum density of 2.5 FSR where developments contribute towards public amenities which make the area more livable will be supported.
- 14.1.4. Development in Humber Green Village should be consistent with section 14.6, Humber Green Principles for Redevelopment.
- 14.1.5 Conditions on the west side of Douglas Street are not currently conducive to residential development. However, as amenities are added to the area, and rapid transit is developed commercial-residential mixed use, may be supported in the future

14.2. Mayfair Town Centre:

Mayfair Town Centre will evolve as a mixed use area with active building frontages along arterial corridors, with a particular focus on Douglas Corridor as the retail main street.

Mayfair Town Centre Land Use Policies:

- 14.2.1. New commercial, residential and mixed use development will be supported subject to the following criteria:
 - a. a base density of 1.5:1 FSR, and a maximum density of up to 3.0:1 FSR. An additional 10% density above the maximum may be supported where non-market housing is included on-site.
 - b. buildings of up to 6, 10 or 12 storeys as shown in Map 12.
 - c. On the Mayfair Shopping Centre site, taller buildings should be focused closer to Douglas Street.
 - d. New development fronting arterial roads should include commercial uses on the ground floor.

14.3. Douglas Corridor General Employment Lands

Those areas in between Mayfair Town Centre and Humber Green Village are an important reserve of general employment and industrial employment lands.

General Employment Lands Land Use Policies

- 14.3.1. Maintain industrial or general employment zoning within these areas, consistent with the Official Community Plan and Map 12.
- 14.3.2. Areas of general employment uses with residential uses on upper floors may be developed only along Burnside Road between Frances Street and Manchester Road as shown in Map 12. Lots which front onto both Burnside Road and Douglas Street may contain residential uses at grade if a significant employment component is included in the part of the lot along Douglas Street which is designated as General Employment.
- 14.3.3. Where rezonings along the south side of Dunedin Street, between Sumas Street and Burnside Road, involve industrial use, these uses should be limited to light industries which are compatible with the existign residential uses across the street.

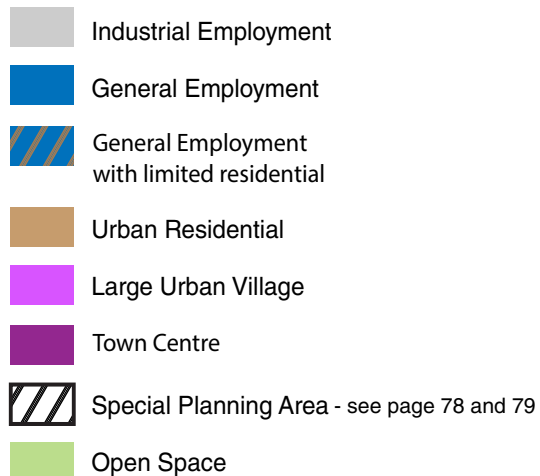

Figure 10: Land Use Concept showing a 'stepping down' of density from the Douglas Corridor to Rock Bay and the Waterfront

Douglas Corridor

Land Use Policies

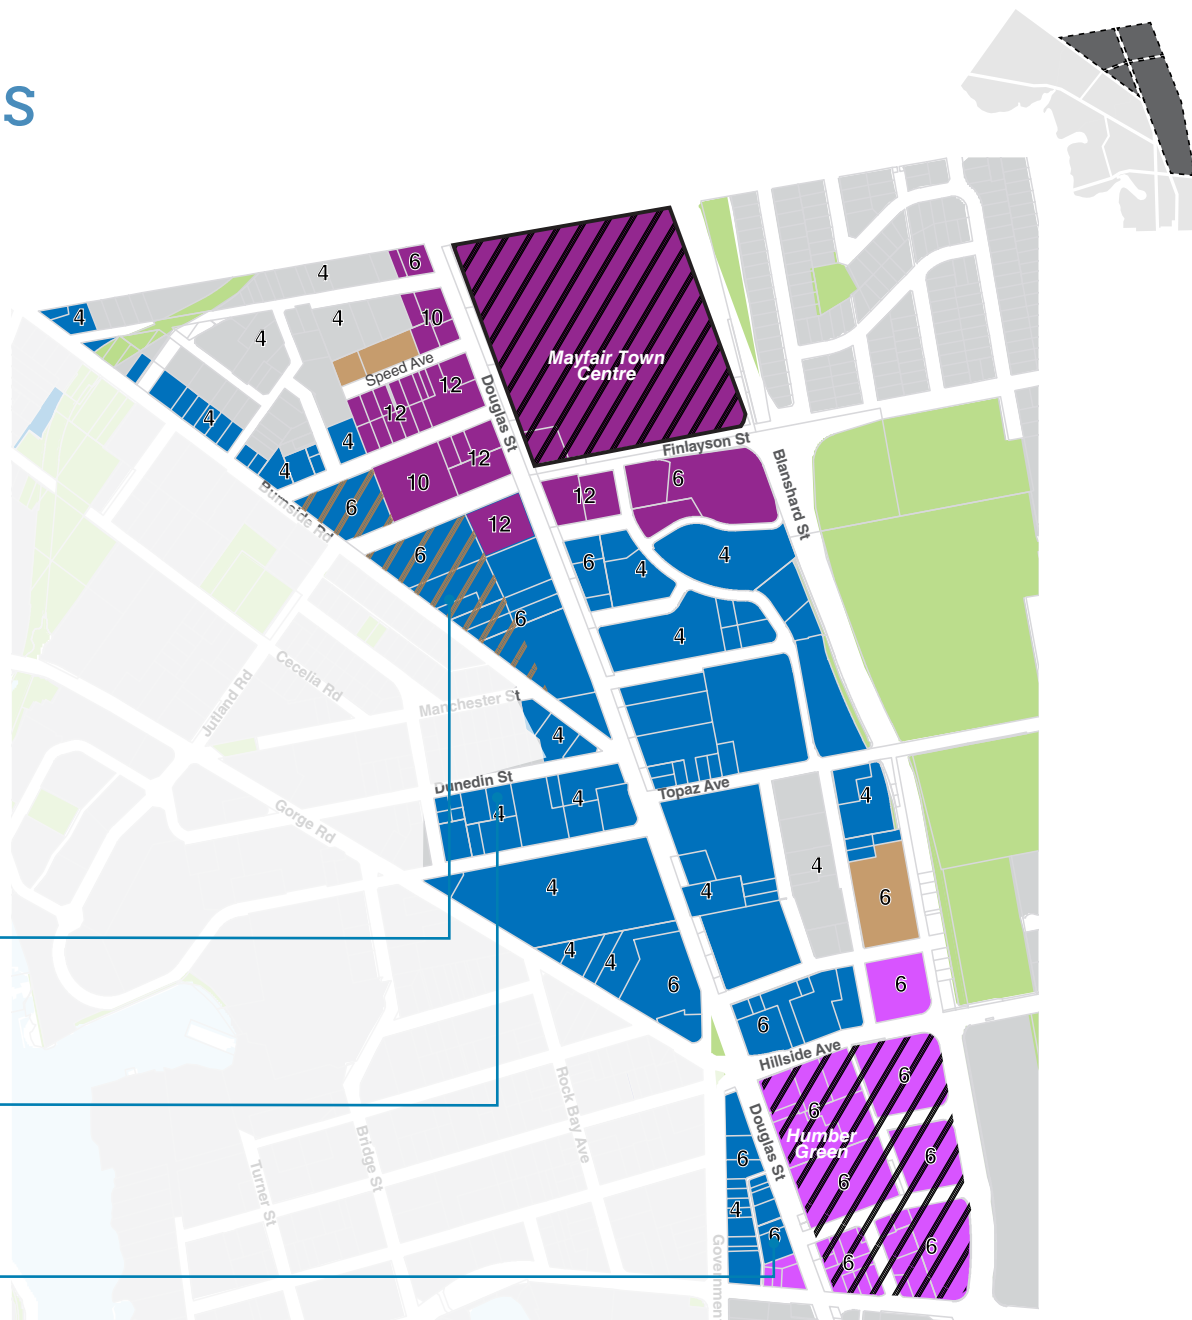

Anticipated Building Height (stores)

Lots which front onto both Burnside Road and Douglas Street may contain residential uses at grade if a significant employment component is included in the part of the lot along Douglas Street which is designated as General Employment (see 14.3.2.)

Any rezonings which include industrial uses on the south side of Dunedin Street should be compatible with residential uses across the street (see 14.3.3)

Conditions on the west side of Douglas Street are not currently conducive to residential development. However, as amenities are added to the area, and rapid transit is developed commercial-residential mixed use, may be supported in the future

Map 13: Future Land Use Map for Douglas Corridor sub-area

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Douglas Corridor

Urban Design Policies

14.4. Douglas Corridor Urban Design Policies

The City will adopt design guidelines for Douglas Corridor, including Mayfair Town Centre and Humber Green, that may include the following objectives:

14.4.1. To emphasize pedestrian orientation, activity and interest and a fine grain rhythm of shop fronts along the entire length of Douglas, with special emphasis on Humber Green and Mayfair Town Centre.

14.4.2. To incorporate small transit plazas in locations of future rapid transit stations that are defined and activated by new development.

14.4.3. to support evolution of the Mayfair Town Centre and Humber Green area as consistent with the principles in Figures 12 and 13

14.4.4. to establish prominent buildings at terminating vistas at street-ends and triangular blocks.

14.4.5. to manage transitions between residential and industrial/commercial uses through sensitive design and landscape.

14.4.6. to encourage building design to relate to future Frequent Transit and Rapid Transit stops on Douglas Street.

Figure 11: illustrating the concept of incorporating small transit plazas for future rapid transit stations that are defined and activated by new development.

Example of an architectural feature at a terminating vista.

Douglas Corridor

Placemaking and Public Realm

14.5. Placemaking Priorities

Douglas Corridor should evolve into a grand street for Victoria, flanked by canopy trees. Designs for streetscape and street furnishings should eventually convey a sense of the downtown extending north to the Humber Green intersection, which becomes a gateway.

Develop Douglas Street as a corridor supportive of pedestrian activity, with mature street trees, distinctive street furnishings and separation of pedestrians from traffic. Over time, establish a cohesive urban design that continues the character of downtown extending to the Humber Green intersection.

Ensure streetscape, street trees and landscape support a sensitive transition from residential uses to light industrial or commercial uses on Dunedin Street.

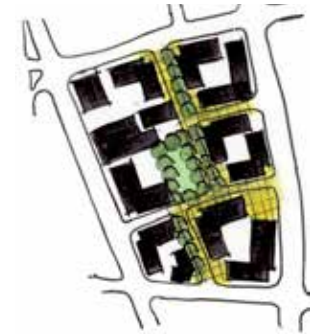

Establish prominent buildings at street-end vistas at these locations.

Work with BC Transit to enhance the pedestrian experience along Douglas Street adjacent to the BC Transit depot.

Locate plazas at the northeast corner of Douglas-Finlayson and Douglas-Market to support future transit stations and take advantage of solar orientation in the winter.

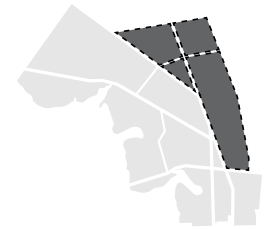

Develop the internal streets within Humber Green (Ross Lane, King's Street and Westborough Place) as shared spaces (e.g., "woonerfs") to create a strong pedestrian orientation.

Establish street trees and create a green space near the intersection of Ross Place and King's Road to provide a respite from surrounding heavily trafficked arterial roads.

Celebrate the creek which once flowed near Kings Road and Westborough Place.

Consider a re-design of the Humber Green intersection, with enhanced pedestrian space and crossing, with new development set back from the intersection and establishing a strong tree canopy.

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Douglas Corridor

Special Planning Areas

14.6: Principles for Redevelopment of Mayfair Shopping Centre

14.6.1. Redevelopment of the Mayfair Shopping Centre site should establish an internal block structure and connectivity for pedestrians, cyclists and cars and automobiles.

14.6.2. Douglas Street should be developed as a main street focused around the future transit station, with smaller storefront modules, high quality pedestrian facades and streetscapes featuring canopy trees.

14.6.3. New development along Douglas Street should establish a three- to five-storey streetwall. Taller buildings elsewhere should establish a two- to five-storey streetwall. Development should be sited to anticipate future right-of-way for Rapid Transit.

14.6.4. A cycling connection should be established connecting Oak Street in Saanich to Nanaimo Street in Victoria.

14.6.5. A plaza should be established near the future Rapid Transit station between Speed and Finlayson Streets.

14.6.6. With a major rezoning of the Mayfair Town Centre, on-site amenities should be considered and may include public open space, affordable housing, community use spaces or enhancements to nearby parks, trails or other public amenities.

14.6.7. Taller buildings should generally be focused on the western part of the site, in order to reinforce Douglas Street's role and transition to neighbourhoods to the east. Buildings exceeding 12 storeys may be considered at the intersection of Douglas Street and Finlayson Street.

14.6.8. Major redevelopment of the Mayfair Shopping Centre should include a public open space appropriate to the intensity of development.

Principles for development of Mayfair Mall

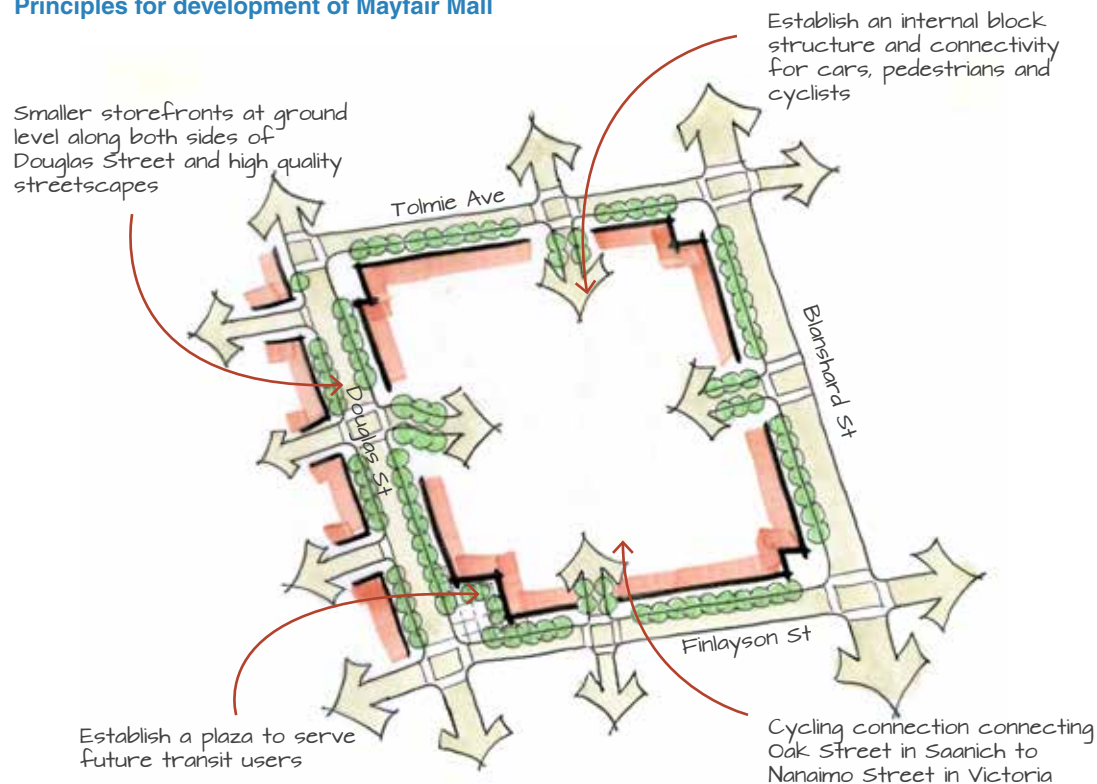

Figure 12: concept sketch showing principles for development of Mayfair Mall

Douglas Corridor

Special Planning Areas

14.7 Principles for Redevelopment of Humber Green Area

- 14.7.1. Development along arterial roadways should include at least one level of commercial use with commercial frontages. Residential uses should be limited to upper floors along arterial roads.
- 14.7.2. Development fronting Douglas Street should establish Douglas Street as a main street with a pattern of smaller storefronts at ground level.
- 14.7.3. Development fronting arterial roads should establish a three to five-storey streetwall.
- 14.7.4. Buildings fronting internal streets may contain commercial, residential, or other mixed uses. Residential ground floor frontages should feature landscaping and a transition from public to private space established by the presence of semi-public spaces such as front porches, grade change, etc.
- 14.7.5. Where an entire block is redeveloped and residential uses are included, courtyard-style buildings are encouraged in order to enhance the livability of this area for residents.
- 14.7.6. A green space should be developed at the corner of Kings Road and Ross Lane.
- 14.7.7. Rights-of way internal to Humber Green (local roads) should be maintained and enhanced, with public realm treatments establishing a sense of a shared space between cars, pedestrians and cyclists, with quality pavements, limited curbs, large street trees and on-street parking.

Principles for development of Humber Green

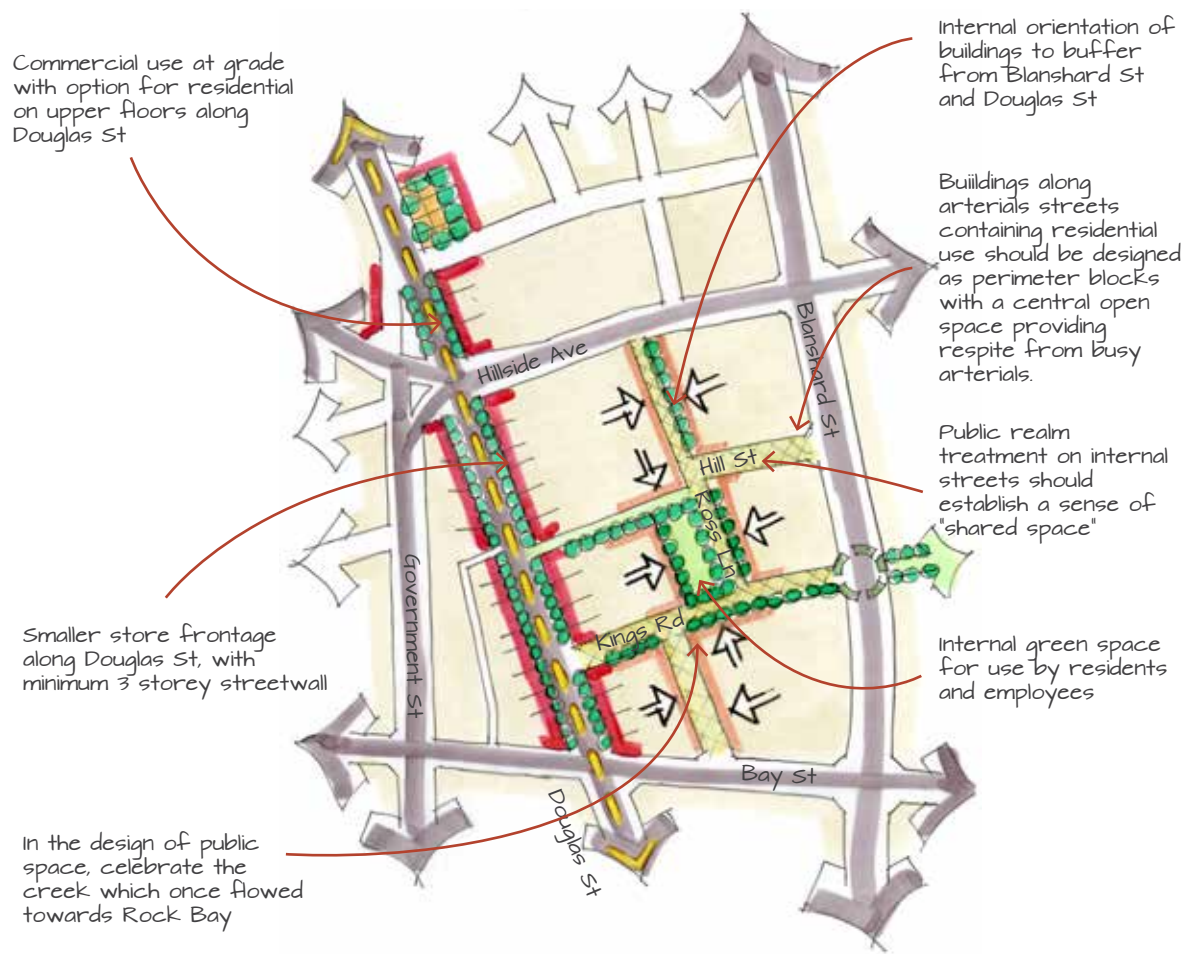

Figure 13: concept sketch showing principles for development of Humber Green

Douglas Corridor

Walking and Cycling Improvements

14.8: Walking and Cycling Priorities

The following desired improvements are listed in general order of priority, recognizing that funding, needs and opportunities may change over time.

14.8.1. Blanshard Street and Kings Road: With the implementation of Phase 2 of the priority bicycle network, create a signalized bicycle and pedestrian crossing of Blanshard Street.

14.8.2. Blanshard Street at Topaz Avenue: Create a signalized bicycle and pedestrian crossing of Blanshard Street.

14.8.3. Finlayson Street east of Douglas Street: Complete the missing segment of bicycle lane, and improve the space in the southeast corner for pedestrians (see also 14.9.1.).

14.8.4. Douglas Street at Burnside Road-Dunedin Street: Consider the addition of a crosswalk on the south side of the Burnside-Douglas intersection to complete east-west connectivity from Dunedin Street to Topaz Avenue.

14.8.5. Douglas Street at Speed Avenue: In conjunction with redevelopment in the area, create a signalized crossing.

14.8.6. Douglas Street at Spruce Avenue: Evaluate the creation of a signalized crossing of Douglas Street.

14.8.7. Finlayson Street at Nanaimo Street: In conjunction with redevelopment in the area, add a signalized crossing of Finlayson Street.

14.8.8. Mid-block connections: Create a new street or mid-block connection for pedestrians between Finlayson Street and Speed Avenue to establish a block structure near Mayfair Town Centre (with redevelopment).

14.8.9. Mayfair Shopping Centre: In conjunction with redevelopment, create an internal block structure, with bicycle connection from Oak Street in Saanich to Nanaimo Street in Victoria.

14.8.10. Quesnel Street: Install sidewalk on west side between Topaz Avenue and Market Street. Consider completing the east-side sidewalk that is missing, considering impact to existing trees.

Map 14: pedestrian improvements for the Douglas Corridor Sub-Area

Transportation and Mobility

Roadway Improvements

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

14.9. Finlayson Street

As development occurs along Finlayson Street, the street should be redesigned with protected bicycle lanes and boulevards with street trees creating a more comfortable pedestrian environment. Depending on traffic needs and adjacent land uses, on-street parking may be permitted in the outermost lanes during off-peak hours.

Interim Improvements

14.9.1. Complete the missing segment of bicycle lane on the south side, east of Douglas Street (see also 14.8.3).

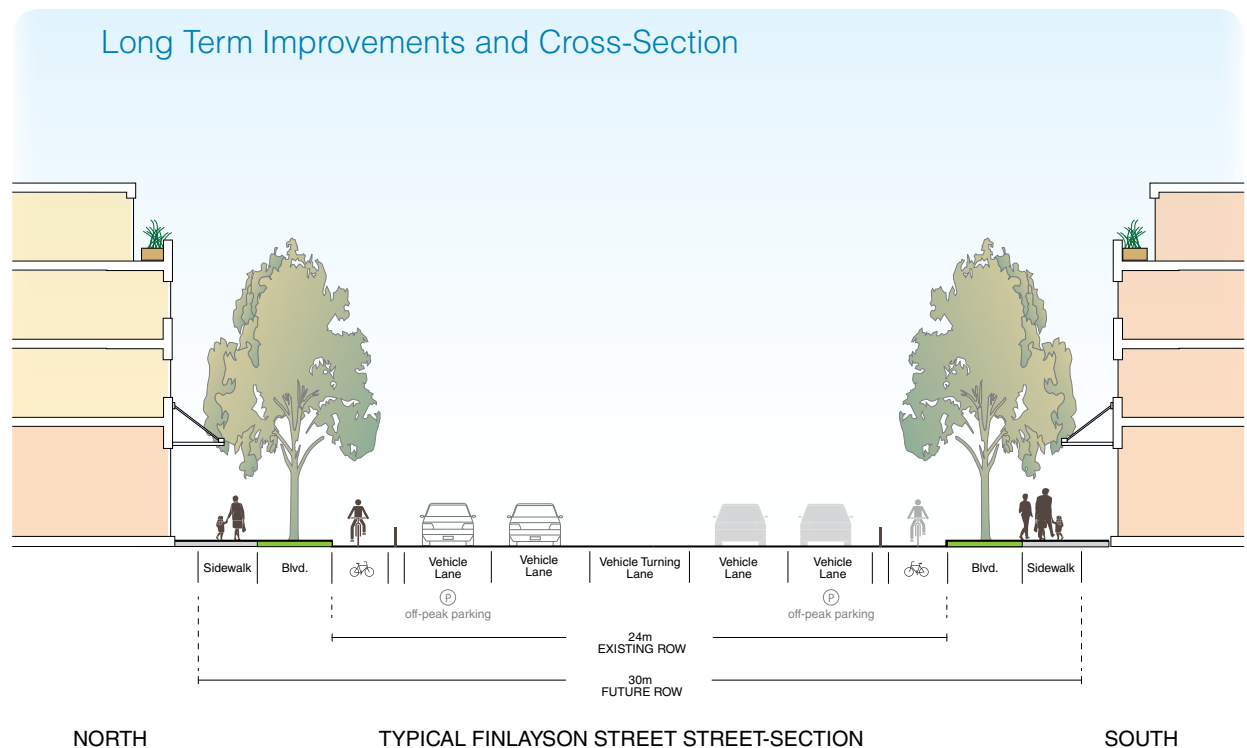

Figure 14: Long term cross section for Finlayson Street

Transportation and Mobility

Roadway Improvements

14.10. Douglas Street

Douglas Corridor will evolve into the region's Rapid Transit spine as well as a place where new development and public realm enhancements create a "people place" and attractive cycling corridor; already in 2016 46% of person-trips were by transit. This evolution is underway in 2017 with the transition to 24-hour bus lanes. As part of this evolution, a Frequent Transit level of service is desired, with improvements such as signal timing, enhanced bus stations.

14.10.1. Transportation and Design Elements

Specific designs for Douglas Street will be undertaken as part of a design for Rapid Transit. Douglas Street may include the following transportation and design elements:

- Dedicated Rapid Transit lanes
- Planted boulevards and sidewalks totaling 5 metres on either side of the roadway, providing spaces for pedestrians and a healthy tree canopy. South of Hillside Avenue, sidewalks generally with trees in grates will provide space for pedestrians
- Protected bicycle lanes
- Four lanes of general purpose traffic north of Hillside Avenue and two lanes of general purpose traffic south of Hillside Avenue
- A centre median which accommodates left turning movements at intersections, intermittent business access, and canopy trees.

- If future transportation capacity allows for a reduction in general purpose lanes north of Hillside Avenue, excess space should be reallocated to enhance pedestrian-oriented streetscapes and landscape, and/or provide on-street parking supporting a "main street" character.

14.10.2. Douglas Street Right of Way

- To accomplish these design elements, Douglas Street will require a right-of-way of 37.5 metres north of Hillside Avenue.
- South of Hillside Avenue, Douglas Street will maintain its current 30.5 metre right of way.
- At the anticipated Mayfair Station location between Finlayson Street and Speed Street, an additional 1.5 metres should be acquired on the east side to accommodate a boarding platform.
- The required right of way should be acquired with rezoning along the corridor. Where right of way is not acquired, new construction should be set back to accommodate future roadway needs (assuming zero setback would be required beyond the desired right of way).

14.10.3. Interim Improvements

Prior to the funding of Rapid Transit, Douglas Corridor should evolve into a Frequent Transit corridor as identified by BC Transit's Transit Futures Plan (2011). Frequent Transit Corridors include features such as transit priority, right-of-way improvements, a high level of transit stop amenities and corridor branding.

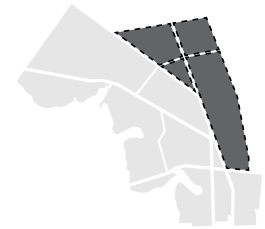

- Maintain Douglas Corridor as a green corridor with planted boulevards and street trees.
- Work with BC Transit to support improvements (e.g. signal prioritization, enhanced bus shelters supporting real-time information) to support the evolution towards a Frequent Transit level of service as a step towards the development of Rapid Transit.

Douglas Corridor

Parks, Open Space and Trails

14.1. Policies for New Parks and Public Spaces

14.11.1. Humber Green: During re-development, the creation of a small greenspace in Humber Green near the intersection of Ross Lane and Kings Road should be considered. This would provide a place for employees and residents, away from the noise of surrounding arterial roads.

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

15. Rock Bay Employment Sub-Area

Future Land Use Directions and Urban Design

The Rock Bay area will continue to serve as Victoria's urban industrial district. The waterfront is a key location for heavier, often harbour-dependent industries. The rest of the district contains a mix of businesses engaged in the production, distribution or repair of goods or equipment as well as various employment-generating uses. A guiding principle for this area is "industrial first", ensuring that industrial uses are given precedence.

Related commercial uses are an important part of the district but should not displace industry. Housing should be excluded from most of this area because most business activities are not compatible with residential use (as they generate impacts such as noise or odours from production, truck loading and unloading, late and early shifts, etc.) and because residential uses can price out important employment-generating uses.

Preservation of these lands from inappropriate land uses is vital to a vibrant economy and to a strong tax base for the City. This area is ideally located close to the Downtown, and central to the region's workforce, worksites and customers. The CRD projects that demand for these industrially zoned spaces will increase over time, putting pressure on existing spaces. At the same time, it is important that land use and zoning policies support the development of newer industrial and flex spaces within the district, providing new businesses with quality spaces that are "business ready."

Within the Rock Bay District, the areas between Douglas Street and Blanshard Street can support higher density housing consistent with the Downtown Core Area Plan (2010). These areas should feature employment or commercial uses located on the ground floor of buildings that front onto Douglas or Blanshard Streets.

Figure 15: Concept drawing showing future vision for Bridge Street, with protected bicycle lanes, new crossing Hillside Avenue, street trees, and new buildings with industrial at grade as well as spaces for employees to gather.

Rock Bay Employment Area

Land Use Policies

15.1. Heavy Industrial Areas

These areas support a range of heavier industrial uses often associated with the Upper Harbour.

15.1.1. Retain areas zoned for heavier industry near the waterfront as shown in Figure 12.

15.1.2. Through urban design and ongoing mitigation such as sound-proofing and screening, minimize impacts on the surrounding business district from heavier industrial uses.

15.2. Industrial Employment Areas

The intent of this designation is to support a broad range of businesses generally engaged in light industry on the ground floor, with ancillary retail or office uses limited to those that support the primary use. Light industry includes production, distribution and repair activities (such as manufacturing, processing, warehousing, distribution, wholesale, repair and prototyping) with limited off-site impacts.

On upper floors, a broad range of commercial uses are supported including office, artists studios, and services.

15.2.1. Ground floor uses should be industrial in nature, with any ground-floor retail and office use as an accessory use.

15.2.2. Building types should support production, distribution and repair uses on the ground floor through the presence of loading bays and sufficient floor-to-ceiling heights.

15.2.3. Buildings up to 4 storeys and 2.0 FSR are supported except where noted on Map 14 (page 85). South of Bay Street and west of Douglas Street,

up to 5 storeys and 2.5 FSR is supported

15.2.5. Upper floors should allow commercial uses including professional offices, artists' studios, or light industrial uses.

15.2.6. Retail uses are supported where they are accessory to a primary use.

15.2.7. The total upper floor commercial space should not exceed industrial space by more than a 2:1 ratio.

15.2.8. Residential uses are not supported in these areas as they would be detrimental to future business vitality.

15.2.9. Residential uses may be supported above industrial uses only in the half block facing Chatham Street between Government Street and Store Street. In this area, a ground floor accommodating light industrial and flex uses and at least one upper floor of general employment use should be provided, and residential uses should comprise no more than 50% of the floor space of any building. Additional residential uses are not supported anywhere else within the Industrial Employment areas.

15.3. Industrial Arts

These areas are intended to evolve as artisan-oriented areas, supporting industrial and artisan production, as well as a place for area employees to find limited shopping and services.

15.3.1. Support light industrial production, distribution and repair uses as in the Industrial Employment areas.

15.3.2. In addition to the Industrial Employment uses described in 15.2., limited retail and services meant to link customers to artisans, or to provide local-serving options, may be supported in the Industrial Arts area. This should be limited to art galleries and convenience grocery.

15.3.3. The Industrial Arts frontages may support a higher proportion of floor space used for ancillary sales, as compared to elsewhere in the Industrial Employment area.

15.4. General Employment

General Employment areas provide a supply of land for current and future employment which is more diverse and at a lower intensity than the Downtown Central Business District.

15.4.1. Support a range of uses, including light and service industrial uses which are compatible with other business uses, as well as offices, services, and tourist accommodations.

15.4.2. Retail uses are supported where fronting on arterial or minor arterial roads.

15.5 Rock Bay Downtown Core Area Mixed Use

These areas have been identified in the Downtown Core Area Plan for residential and mixed use development at the north end of Downtown.

15.5.1. Between Douglas and Blanshard Streets, building heights, uses and densities should be consistent with the Downtown Core Area Plan

15.5.2. The ground floor of buildings facing Douglas Street and Blanshard Street should consist of commercial uses.

Rock Bay Employment Area

- Special Planning Area - see page 91

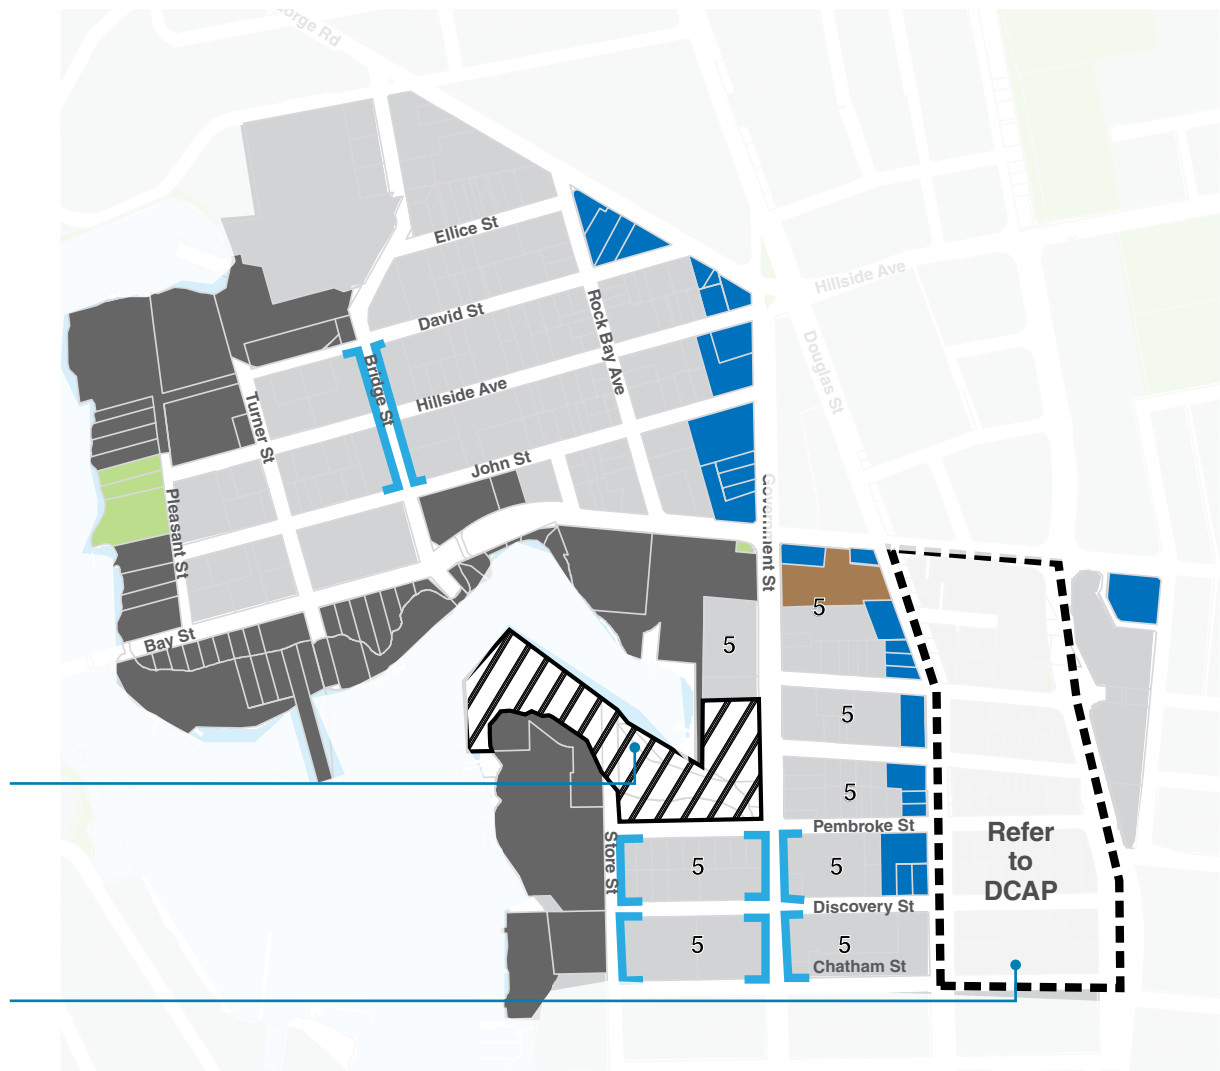

Industrial Arts District Frontage

Anticipated Building Height (storeys)
= 4 except where otherwise noted

15.8.1. Consider a range of industrial, employment and ancillary uses on the Rock Bay remediation lands to support economic development.

15.5.1. Between Douglas Street and Blanshard Street, building heights, uses and densities should be consistent with the Downtown Core Area Plan.

15.5.2 The ground floor of buildings facing Douglas Street and Blanshard Street should consist of commercial uses.

Map 15: Future Land Use Map for Rock Bay sub-area

Gorge Sub-Area

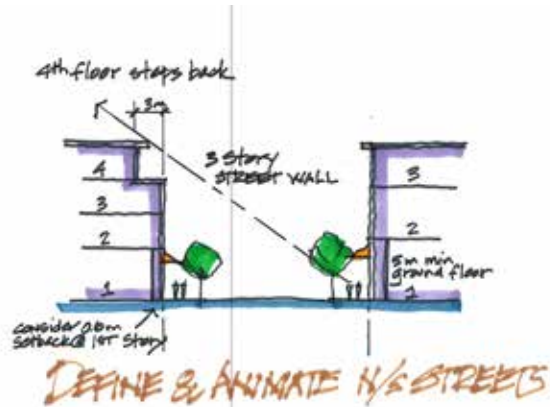

Selkirk and Cecelia

Douglas Corridor

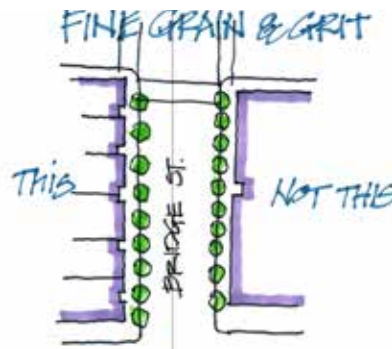

Rock Bay

Rock Bay Employment Area

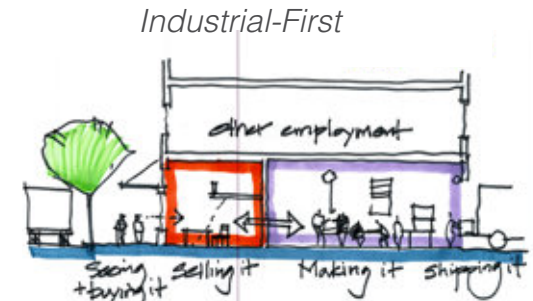

Urban Design Policies

Certain Streets should maintain active frontages along side-walks, while mid-block areas may have a variety of frontages supporting industrial uses (see policy 15.5.1)

Industrial Arts areas should feature buildings broken into smaller storefront modules along the street (see policy 15.5.4)

Industrial Employment buildings which mix industrial and general commercial uses should be designed to maintain industrial uses at grade (see policy 15.5.7)

15.6. Urban Design Policies

The City will adopt design guidelines for the Rock Bay Area with the following objectives:

15.6.1. Maintain and enhance streets with active fronts (for example, along Bridge Street, Rock Bay Avenue, Government Street, Douglas Street, Store Street, Chatham Street, and Discovery Street – see map) while supporting industrial use and character.

15.6.2. On streets not identified as active fronts, street edge definition should be maintained and enhanced by preserving or incorporating street trees. New development should improve the appearance of off-street surface parking located adjacent to streets and public open spaces.

15.6.3. Recognize that many industrial uses call for basic building forms and materials, with on-site loading and circulation.

15.6.4. Buildings in the Industrial Arts areas should have a fine-grained frontage with multiple, smaller storefronts and a higher level of design and materials than elsewhere in Rock Bay.

15.6.5. Industrial heritage buildings and heritage character should be conserved and enhanced by new development.

15.6.6. For buildings south of Pembroke Street, maintain a form and character compatible with Old Town while recognizing industrial uses and appropriate materials.

15.6.7. Industrial Employment buildings which mix industrial and commercial uses should be designed to maintain industrial uses on the ground floor (e.g. through sufficient first floor height [5.5m], possibly with a mezzanine level, loading bays, and proper separation, ventilation and power).

15.6.8. Encourage new buildings to incorporate access which provides the potential for future shared access with neighbours, minimizing curb cuts.

15.6.9. Maintain important view corridors along Turner Street, Queens Avenue, Princess Street, and Store Street, by considering the design of new buildings and building additions and how they frame views.

Rock Bay Employment Area (North)

Placemaking and Public Realm

15.7. Placemaking Priorities

The purpose of improvement to this area is to create a positive environment for employees, visitors and customers; to provide a positive image for the district which encourages future business location and investment; and to enhance a sense of safety. Improvements should

enhance pedestrian comfort and maintain and enhance tree canopy while recognizing the business functions of the area, including loading for trucks. Designs should reflect the nature of the district in character, with a preference for simplicity.

Develop a streetscape design for the Bridge Street Industrial Arts village, using a “cheap and cheerful” approach reflective of the working character of the area, while adding greenery and a sense of place.

Enhance landscape and streetscape design along the north side of Bay Street as permitted by existing utilities.

Enhance landscape and streetscape on Pleasant Street and screen industrial uses to support attractive access to Point Ellice House

Maintain the remnant old growth coastal forest at Point Ellice House and enhance the coastal forest and aquatic habitat on City-owned land north of the Bay Street Bridge.

Consider painting silos or other prominent buildings with unique branding for Rock Bay.

Establish quality landscape and streetscape to create a pleasant interface between residential and industrial and employment across Dunedin Street.

Enhance landscape and streetscape along Rock Bay Avenue.

Overall Placemaking Policies for Rock Bay

15.7.1. Incorporate murals within the district, including murals which celebrate and interpret the First Nations history of Rock Bay itself, building on the temporary installation.

15.7.2. Maintain the distinctive flowering trees along John Street to enhance the approaches to the Bridge Street Industrial Arts area. Planted boulevards and street trees are a distinctive element of Rock Bay which maintains a link to its residential past and creates a unique character for an industrial district. These boulevards should be maintained, while accommodating access for loading and other business activities.

15.7.3. Consider green stormwater features such as bioswales where appropriate as streets are upgraded in the Rock Bay area.

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

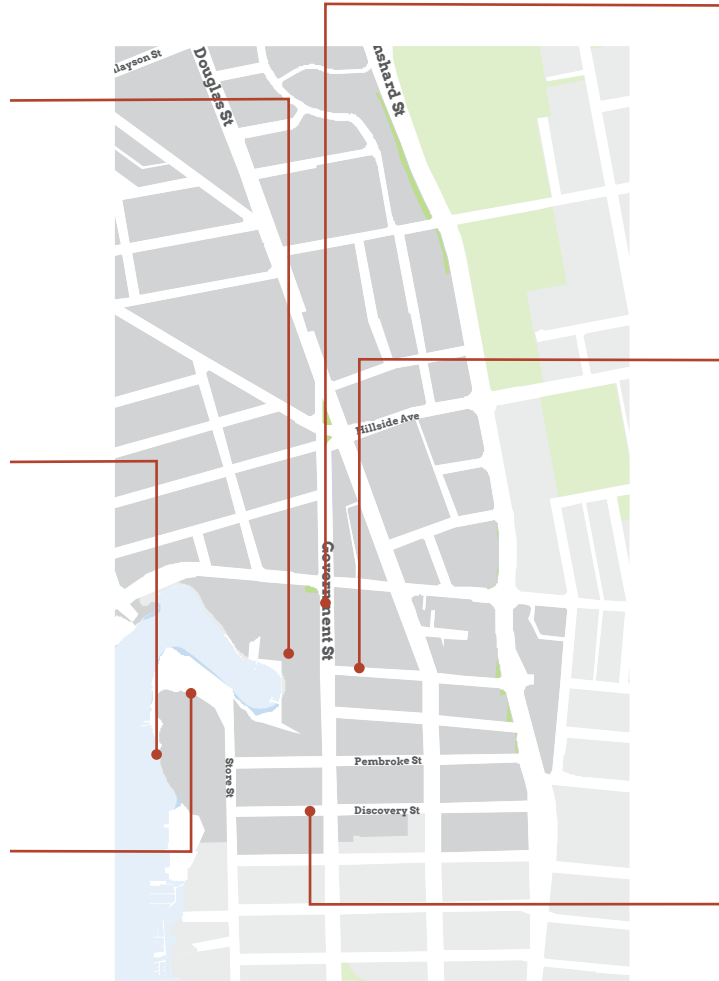

Rock Bay Employment Area (south)

Placemaking and Public Realm

Develop a rain garden or other feature celebrating the creek which once flowed from Spring Ridge in Fernwood to Rock Bay.

Re-establish a green shoreline (coastal forest) wherever possible along the shoreline industrial lands, protecting coastal and aquatic ecosystems and maintaining green views for users of the waterway, parks and trails on the opposite shore.

In designing the **special place** at Barclay Point, consider interpretation of First Nations history and Rock Bay's role as a gathering place. Design the park as a space not for passing through, but for area employees and visitors to spend time. Depending on the character of future development, patio dining or other opportunities for people to interact with water views may be considered.

Government Street is a Main Street for the Rock Bay district, as far as the five points intersection at Gorge Road. Extend a distinctive design along Government Street as far as the four corners of the Pembroke Street intersection, as an extension of the downtown Government Street Mall. The entire length of Government Street should be characterized by canopy trees. Government Street may be a location for creative and unique public art and street furnishings.

Celebrate the creek which once flowed into Rock Bay, through features along the Queens Avenue alignment and at the waterfront.

Develop Discovery Street, between Store and Government Streets, as a “Festival Street”: a space which can be closed periodically and transformed into a plaza for events. Distinctive features should include a lack of raised curbs and inclusion of landscaping and street furnishings. Design elements should be creative yet simple and subdued, reflective of the industrial character of this area.

Rock Bay Employment Area

Special Planning Areas

15.8. Rock Bay Remediation Lands Policies

Following remediation in 2016, the lands at Barclay Point and wrapping around the south side of Rock Bay have returned to ownership by the Songhees Nation and Esquimalt Nation, re-establishing an important connection to the Upper Harbour. The two Nations have not created a specific vision or plans for this area, and desire flexibility in future planning in order to achieve their aspirations for these lands. As a Special Planning Area, it is the intent of the City to work with the land's owners to refine and support a vision for the future. The following guidance reflects city policies and aspirations of the community:

15.8.1. Consider a range of industrial, employment and ancillary uses on these lands to support economic development.

15.8.2. Create a small special place at Barclay Point, consistent with the vision for "special places" along the Harbour Pathway. This space should interpret the history and importance of Rock Bay as a gathering place, and provide area employees with a place to spend time.

15.8.3. Redevelopment that activates the waterfront through new commercial restaurants, cafes, and patio spaces is encouraged as compatible with surrounding uses.

15.8.4. Explore a pedestrian and bicycle connection linking the Harbour Pathway/Barclay Point to Bridge Street and unifying the Rock Bay area, as feasible with the functions of the working harbour and navigable waters. Provision of a small boat launch in the vicinity of one end of the bridge should be explored for feasibility.

Principles for development of the Rock Bay Remediation Lands

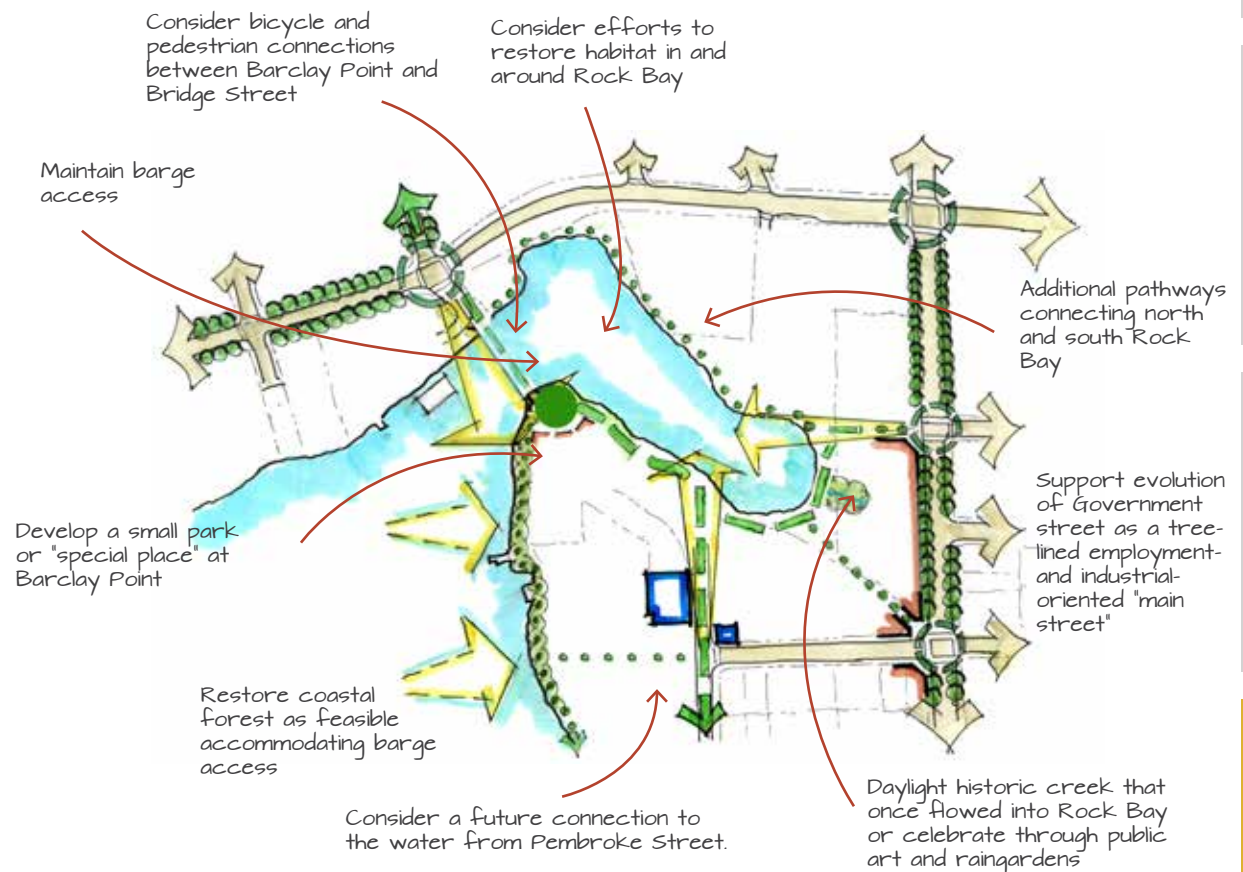

Figure 16: concept sketch showing principles for development of the Rock Bay remediation lands

15.8.5. Consider additional pathways along the shore of Rock Bay, linking to Queens Avenue and possibly north to the intersection of Bay Street and Bridge Street intersection.

15.8.6. Consider efforts to restore the habitat of Rock Bay and its shoreline, as compatible with land use and access.

15.8.7. Seek opportunities to daylight the creek that once flowed into Rock Bay or to celebrate the creek's former path through features such as public art or rain gardens.

15.8.8. Restore native shoreline forest where feasible given the need for barge access.

Map 16. The historic path of the Creek that once flowed into Rock Bay (map courtesy of Fernwood Community Association). The dashed and solid lines show routes of the creek as shown in historic maps.

Rock Bay Employment Area

Walking and Cycling Improvements

15.9. Walking and Cycling Priorities

The following desired improvements are listed in general order of priority, recognizing that funding, needs and opportunities may change over time.

15.9.1. Bridge Street: Add new crossing at Hillside Avenue. Alter landscape to increase space for pedestrians on the northeast corner of Bridge and David Streets. Review intersection of Bridge Street and Ellice Street considering the reduced crossing distances for pedestrians.

15.9.2. Work with the Province and Point Ellice House to develop and implement enhancements to sidewalks and landscape along Pleasant Street. Maintain on-street parking on one side of the street to support visitation to Point Ellice House and area businesses.

15.9.3. Pave Hillside Avenue between Turner Street and Pleasant Street

15.9.4. Rock Bay Avenue at Gorge Road: Redesign the intersection to lessen crossing distances for pedestrians.

15.9.5. Discovery Street between Store Street and Government Street: Install sidewalks on the north side and develop a “festival street” (see Placemaking and Public Realm on page 53).

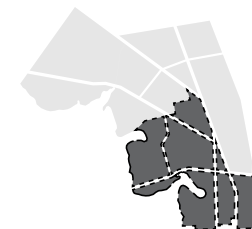

15.9.6. Turner Street: Consider installing a sidewalk on the east side connecting to existing sidewalks and the crosswalk on Bay St. Design the street to preserve existing supply of on-street parking (angled or perpendicular). Evaluate enhanced pedestrian crossings at John Street through the creation of bulb-outs which improve visibility and narrow crossing distances.

Map 17: pedestrian improvements for the Rock Bay Sub-Area

Rock Bay Employment Area

Pedestrian Improvements (cont'd)

15.9.7. Blanshard Street near Pembroke or Discovery Street: Consider a signalized bicycle and pedestrian crossing of Blanshard Street as residential and mixed use development occurs in the blocks between Douglas and Blanshard Streets.

15.9.8. Ludgate Street: Install a sidewalk on the west side to connect Bay Street and John Street (there are currently no sidewalks on either side).

15.9.9. Government Street at Pembroke Street: Create a signalized crossing of Government Street.

15.9.10. Design the Bay Street / Bridge Street intersection to minimize conflict between trucks, pedestrians and cyclists.

15.9.11. Bridge Street and Gorge Road: Redesign the Bridge Street and Gorge Road intersection to reduce crossing distances for pedestrians. Consider accommodation for truck movements from Douglas Street along Garbally Road accessing Bridge Street (as an alternative to using Jutland Road).

15.9.12. Create a pedestrian and cyclist connection from Barclay Point to Bridge Street in order to connect North and South Rock Bay.

15.9.13. Consider improved pedestrian crossing at Queens Avenue with the redevelopment of the Rock Bay remediation lands, with a pedestrian connection to the waterfront.

15.9.14. Create mid-block lane between Chatham Street and Discovery Street west of Government Street to support access to future industrial uses.

Gorge Sub-Area

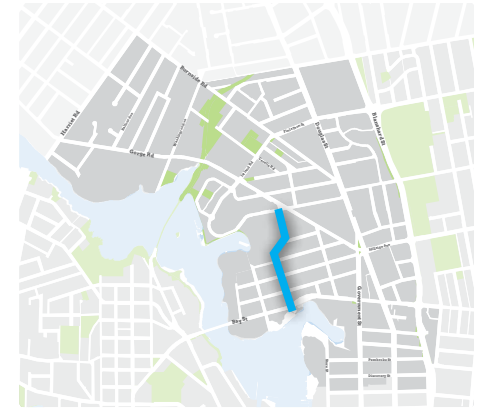

Selkirk and Cecelia

Douglas Corridor

Rock Bay

Transportation and Mobility

Roadway Improvements

15.10. Bridge Street

The first priority is to establish Bridge Street as a destination for local employees, artisans and customers in the Rock Bay area, consistent with its land use direction as an “Industrial Arts” village.

Bridge Street is designated as part of Victoria’s secondary bikeway network. The proposed cross section accommodates bicycle lanes while retaining on-street parking on one side of the street. This design would be implemented once a pedestrian-bicycle bridge is completed from Bridge Street to Barclay Point on the south, and pursuant to completion of a parking management plan for public and private parking in the Rock Bay Sub-Area (see policy 9.5).

Interim Improvements

15.10.1. Review crossing opportunities and safety for pedestrians and cyclists and establish a pedestrian crossing in the vicinity of Hillside Avenue.

15.10.2. Complete streetscape enhancements supporting the placemaking vision.

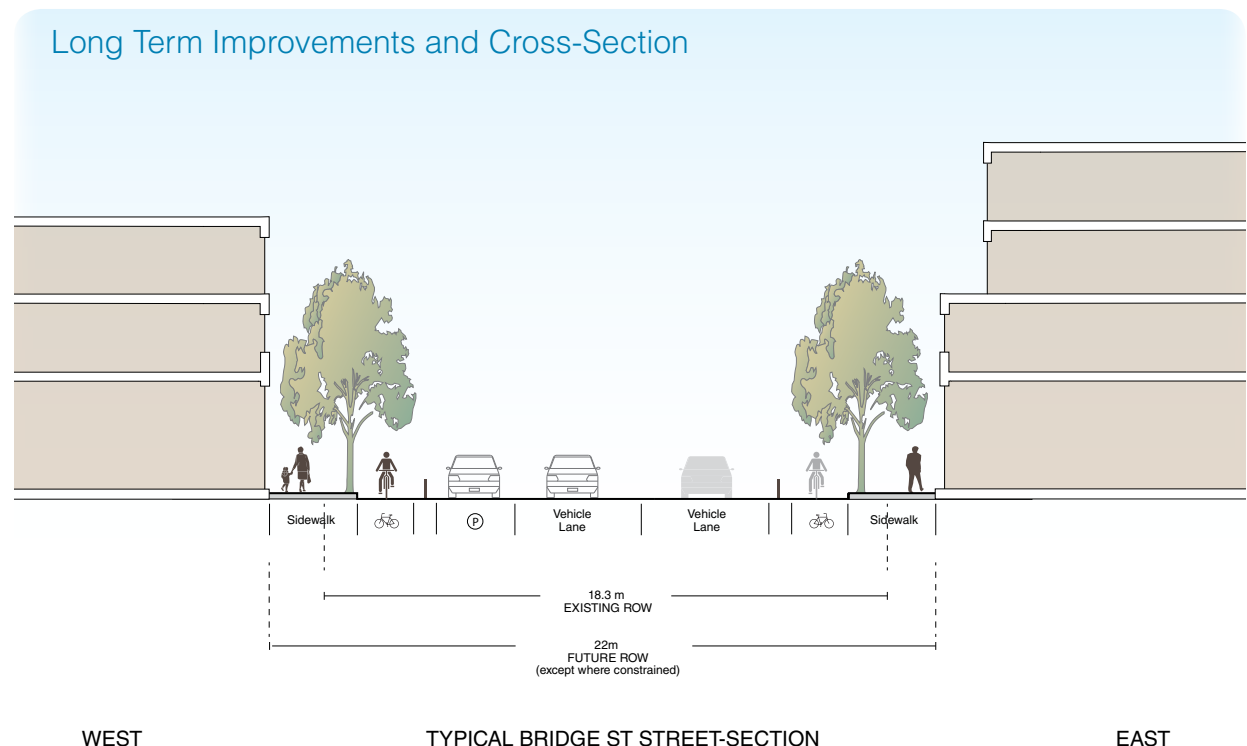

Figure 17: Long term cross section for Bridge Street

Transportation and Mobility

Roadway Improvements

15.11. Government Street

Government Street is an emerging Main Street for the Rock Bay area and a priority all ages and abilities bicycle route per the Bicycle Master Plan (2016 draft). It will be characterized by protected bicycle lanes, three lanes of auto travel, and a well-established tree canopy along its length from Chatham Street to the Five Points / Humber Green intersection, accommodated within the existing right of way.

The blocks from Chatham Street to Pembroke Street present the opportunity for a unique character incorporating public art and street furnishings which may continue north depending on the character of adjacent development.

Corner treatments and bulb-outs should be established, especially at pedestrian crossings.

Gorge Sub-Area

Selkirk and Cecelia

Douglas Corridor

Rock Bay

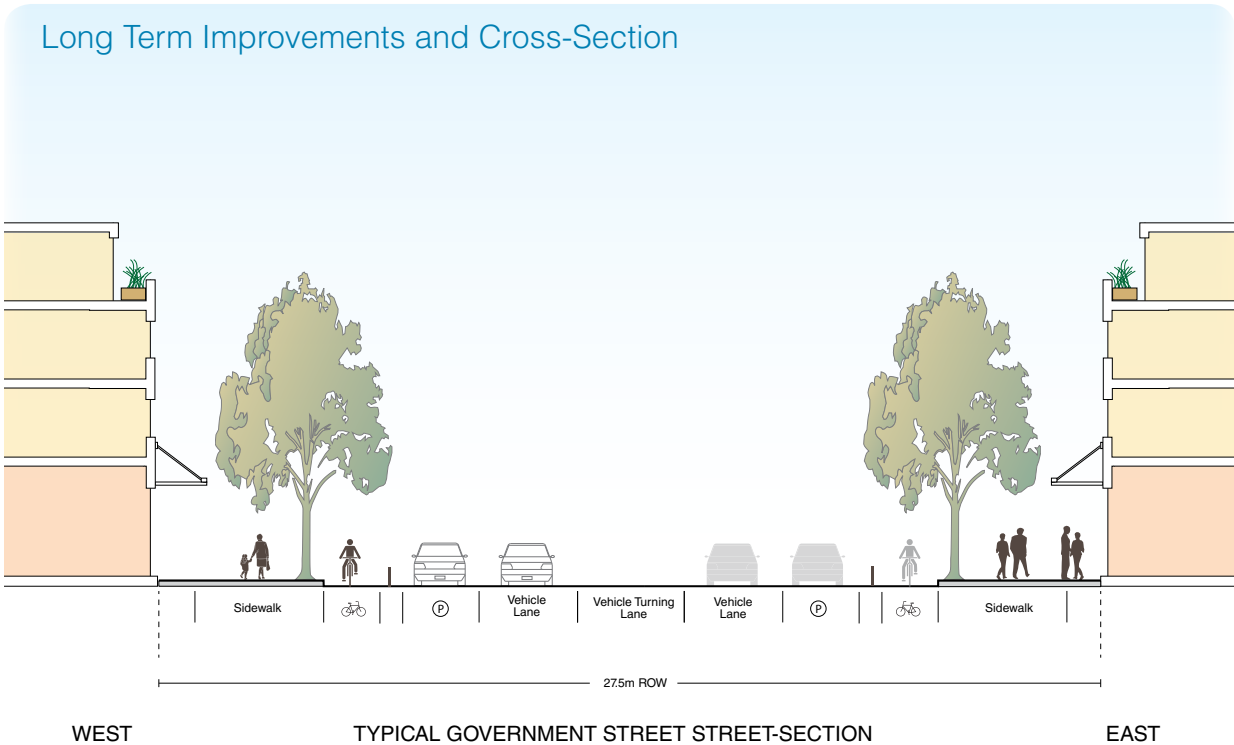

Figure 18: Long term cross section for Government Street

Rock Bay Employment Area

Parks, Open Space and Trails

15.12. Policies for New Parks and Public Spaces

15.12.1. Barclay Point: As redevelopment occurs, the provision of a small park at Barclay Point should be identified consistent with the “special places” of the Harbour Pathway Plan. Redevelopment that activates the waterfront through commercial patio spaces or other uses may be considered, depending on the character of redevelopment. The space should interpret First Nations history, including the role of Rock Bay as a gathering place. Provision of a small boat launch should be explored for feasibility.

15.12.2. Rock Bay District North: Develop a small park, plaza, greenspace or enhanced streetscape to serve as a gathering place for employees within the Rock Bay area north of Bay Street. This gathering space may be located near Bridge Street.

15.13. Policies for Paths and Trails

15.13.1 Harbour Pathway / Rock Bay Connection:

As land agreements are reached or as lands are redeveloped, connect the Harbour Pathway through Rock Bay to North Rock Bay, through the completion of a connection from Barclay Point to the Bay and Bridge Street intersection, respecting the operations of the working harbour. This may take the form of a bridge, a walkway around the shoreline of Rock Bay, or through improved streetscapes on Pembroke, Government and Bay Streets.

15.14. Natural Environment Policies

15.14.1. City-Owned Waterfront Lands: Restore and protect the shoreline native vegetation and aquatic ecosystem along the City-owned lands between the Bay Street Bridge and Point Ellice House.

15.14.2. Rock Bay: Explore environmental restoration of Rock Bay in coordination with redevelopment of the BC Hydro and Transport Canada lands.

15.14.3. Green the Shore: Conserve habitat and create green shoreline views in the north of the Bay Street Bridge, even where uses are industrial, through planning tools such as a Development Permit Area and design guidelines for different shoreline segments.

15.14.4. Rock Bay Creek: Seek opportunities to daylight the creek that once flowed into Rock Bay, or to celebrate the creek’s former path through features such as public art, signage or rain gardens.

Rock Bay Employment Area

Environmental Policies

15.15. Energy Conservation Policies

As an industrial and employment district, the Rock Bay area has the potential to contribute to a more energy-efficient future. Commercial and industrial buildings account for 42.9% of Victoria's energy use and 28.5% of its Greenhouse Gas emissions, second only to transportation.

The Rock Bay area is also one of the City's prime potential sites for district energy, according to a study commissioned by the City in 2010. The City will:

- 15.14.1. Consider the adoption of incentives for energy efficiency in existing and/or new employment and industrial use buildings.
- 15.14.2. Encourage the development of District Energy where a large new industrial or employment use is introduced into the Rock Bay Area.
- 15.14.3. As part of the consideration of District Energy, identify the likely receiving area for District Energy and consider guidelines and/or incentives for new construction to be ready to accept district energy.

15.16. Natural Hazards Policies

The Rock Bay Subarea adjacent to the Upper Harbour contains some of Victoria's most at-risk lands for tsunami inundation (see Figure 19). In addition, projected sea-level rise means that this area will be at risk of inundation during future storm events which coincide with high tides (see Map 16). One aspect of this risk is that storm sewers may back up.

15.15.1. The City will determine the appropriate precautions to protect the Rock Bay area from flooding associated with tsunami and sea level rise, with consideration of:

- 15.15.1.1. Protecting this area from future inundation; and/or,
- 15.15.1.2. Adopting zoning or Development Permit Area protections which require new construction to be resilient to flooding.

11.4.2. The City will determine appropriate precautions for seismic hazards, including the following:

- 11.4.2.1. Consider the extension of the Heritage Revitalization Tax Incentive Program to the heritage buildings in this area.
- 11.4.2.2. Consider the extension of tax incentives to non-heritage buildings for seismic retrofit projects.

Map 18: Inundation map showing projected sea level rise impacts for Gorge View Industrial Land

16. Implementation

This section contains the following:

- **Neighbourhood Improvement Priorities:** a summary of the key improvements desired for the Burnside Gorge neighbourhood, based on extensive engagement with the community. These improvements should be prioritized in allocating amenity contributions as development occurs in the neighbourhood.
- **Action Plan:** a high-level list which suggests time frames in which to seek to accomplish the actions identified in this plan. This list should inform future improvements associated with private sector development, capital planning, senior government funding, grants, and partnerships with community organizations or other government entities. Implementation of this plan must be balanced with available resources and other City priorities.

The improvements in this section are aspirational and may be accomplished through a combination of funding sources including City capital programming, amenity contributions from development, senior government grants, and partnerships with other public, non-profit or private entities.

Plan Monitoring

16.1. The action plan is to be used as a working document and should be reviewed periodically (every 3-5 years) with the community as part of monitoring and adaptive management of the plan, in order to consider changing circumstances, desires and progress made.

Neighbourhood Improvement Priorities

The following list highlights the neighbourhood's priorities for public improvements and amenities, identified by sub-area. It should be noted that many improvements will require a combination of funding sources to be realized. Amenity contributions should support the following key improvements, and should not be used to replace regular funding for the City's core functions (e.g. Parks, Transportation, Infrastructure).

This section presents key priorities at a relatively high level. Further detail on specific improvements are found in the various chapters of this plan.

16.2. Gorge Residential Sub-Area and Selkirk and Cecelia Village Priorities

16.2.1. Waterfront Improvements: The top priority for the residential neighbourhood is enhancing waterfront access and activity through enhancing existing waterfront parks and open spaces, phased completion of a waterfront pathway, location of a small boat launch and/or swim access, and restoration and enhancement of waterfront ecosystems. In the long term, an additional park may be added dependent on redevelopment at the Gorge Road Hospital site. *See Policies 6.1.1 – 6.1.7, 12.8.3, 12.8.4, Map 10 (p. 58), and 12.13.1.*

16.2.2. Key Bicycle and Pedestrian Connections:

Completion of a continuous all ages and abilities bicycle route linking the neighbourhood to the downtown, to the emerging Selkirk and Cecelia village, and to other destinations east and west is

also a City priority. Specific improvements include the Doric Street Connector, and an all ages and abilities route along Gorge Road and Government streets consistent with the Bicycle Master Plan priority network. *See Policies 5.1, 5.3, Map 10 (p. 58), Gorge Road Interim Improvements (policies 12.12.1 and 12.13.2).*

16.2.3. Additional Bicycle and Pedestrian Mobility Enhancements: This plan identifies and prioritizes a number of enhancements to crossings, arterial roads, and desired enhancements to the Capital Regional District's Galloping Goose Trail. These improvements, considered together with the Pedestrian Master Plan (2008) and the upcoming Bicycle Master Plan, will make the neighbourhood more comfortable for pedestrians and cyclists. *See Map 10 (p.58), Map 12 (p. 69), Map 14 (p. 80), and Map 17 (p. 93).*

16.2.4. New and Enhanced Parks: In addition to the waterfront enhancements identified above, this plan identifies improvements to Cecelia Ravine Park and the opportunity to explore the need for and location of additional parks in the residential and the employment areas of the neighbourhood as part of the upcoming Parks Master Plan. *See Policies 6.1.1 – 6.1.7, 12.13.1, 12.13.2, 13.7.1, 13.8.1, 14.7.6, 14.11.1, 15.12.1, and 15.12.2.*

16.2.5. Burnside School Site Heritage Conservation and Open Space: As part of any revitalization of the Burnside School site, conservation of the heritage building is encouraged, along with creation of a public green space serving Cecelia village. Possibilities for affordable housing should be encouraged. *See Policy 13.4.*

16.2.6. **Community Garden:** Planning for an additional community garden, accessible to residents of multi-unit housing, should be undertaken jointly by the community and the City based on the City's Community Gardens policy (2016). *See Policy 6.1.6.*

16.3. Rock Bay Area Priorities

16.3.1. **Bridge Street Improvements:** Complete pedestrian improvements and enhance sense of place (e.g. through street furniture, landscape, and design elements such as banners). *See Rock Bay Placemaking and Public Realm, policy 15.7.*

16.3.2. **Pedestrian and Public Realm Improvements:** The Rock Bay area is envisioned as a more vibrant industrial business district which feels safe, comfortable and pleasant for the many employees and visitors, with an enhanced tree canopy. Locations for improved sidewalks, crossings, and landscape are identified in this plan. *See Rock Bay Placemaking and Public Realm, policy 15.7, and Walking and Cycling Improvements, policy 15.9.*

16.3.4. **Gathering or Green Space:** As part of the Parks Master Plan process, a gathering space (e.g. a park, plaza or enhanced streetscape) which serves the many employees in this area should be identified. *See Policy 15.12.2.*

16.3.5. **Festival Street:** Discovery Street should be transformed into a "Festival Street" – a street which is designed to function as a plaza when closed to traffic – in order to support the many events and performances that are held in the district. *See Rock Bay Placemaking and Public Realm, policy 15.7.*

16.3.6. **Rock Bay and Barclay Point Crossing and Special Place:** Green space and a bicycle and pedestrian connection linking the Harbour Pathway and Barclay Point to Bay Street would be developed as part of redevelopment of the lands around Rock Bay, dependent on compatibility with industrial use. *See Policies 15.8.2, 15.8.4, 15.9.10, 15.9.11, 15.12.1, 15.13.1.*

16.3.7. **Waterfront Enhancements:** Habitat enhancement and a possible waterfront path are desired between Bay Street and Selkirk Village, providing enhanced habitat, views from the water, and improved water quality. These enhancements may start at the City-owned land north of Bay Street (linking to Point Ellice House); further enhancements would depend on redevelopment of private lands, and compatibility of public access with industrial use. *See Policies 15.8.7, 15.14.1, and 15.14.3, as well as map 17 on p. 93.*

Douglas Corridor Priorities

16.3.8. **East-West Pedestrian and Bicycle Crossings:** Connectivity for pedestrians and cyclists across the Douglas and Blanshard corridor is a high priority, linking Burnside Gorge with the rest of the city and with area amenities. *See Walking and Cycling Improvements policy 14.8.*

16.3.9. **Douglas Corridor Frequent Transit Improvements and Placemaking:** Douglas Corridor has been identified as a future rapid transit corridor. In the meantime, improvements to the corridor should focus on enhancing transit to a Frequent Transit level of service (described in BC Transit's Transit

Future Plan (2010) through improvements such as improved shelters, street furnishings, landscape, real-time information, and bicycle facilities. At the same time, streetscapes should be enhanced to develop pedestrian comfort and placemaking through street furniture, landscape, attractive surface treatments, and design elements. *See Douglas Corridor Placemaking and Public Realm (policy 14.5) and Douglas Street Interim Improvements (policy 14.10.3).*

16.3.10. **Humber Green Gathering Place and Enhancements:** As the Humber Green area redevelops, improved conditions are needed for employees, residents and visitors. A gathering space near King's Road and Ross Lane, pedestrian-friendly internal streets, and added street trees are desired, along with a crossing at King's Road as part of the Bicycle Master Plan priority network. *See Policies 14.8.1 and 14.11.1 as well as map 14 on p. 80.*

Action Plan: Timetable, Lead Entities and Funding

16.4. Action Plan

The action plan provides a more detailed list of actions identified in this Plan, and suggests a timeframe, potential funding sources, and potential partners for achieving these objectives.

Action items include:

- Updates to City regulations and procedures
- Implementation of City programs
- Design for key improvements
- Capital improvements which may be undertaken through a combination of funding sources (City capital funding, developer amenity contributions, senior government funding or grants, and partnerships with other government, non-profit or private entities).
- Improvements which would occur as a result of development of private lands

The action plan must be used as a working document that is reviewed on a regular basis to take account of changing circumstances and progress.

16.5. Recommended Timeframe

The Burnside Gorge Neighbourhood Plan covers the period from 2017 to 2041. Some of its proposals are complex and long term, while others are simpler and can be delivered more quickly. The pace of improvements will be influenced by the pace of development, availability of funding and partnerships, and must be balanced with needs in other areas of the City.

The Action Plan below suggests timeframes for public improvements included in this Plan. The following timeframes are considered estimates:

- **Short-Term (0-3 Years):** These items may be completed as part of the current three-year capital plan;
- **Operational Items:** These items may be completed over time as part of ongoing City operations.
- **Medium-Term (3-10 Years):** These items would be recommended for funding in the future. They may be recommended for future capital budgets, may be advanced if triggered by redevelopment projects, or if funding (amenity contributions, grants, etc.) become available;
- **Long-Term (10+ Years):** These items represent longer-term objectives without specific funding strategies or allocations.

16.6. Priority:

Each item has been assigned a community priority (very high, high, medium or lower) based on extensive engagement carried out in the creation of this Plan. The community priority rating does not necessarily correspond to the timeframe, as some items are complex or expensive and require funding, land acquisition, or private redevelopment.

Short Term (0-3 year) Actions

These items may be completed as part of the current three-year capital plan.

Action	Description	Priority
1. Update Land Use Regulations	Update zoning in Rock Bay to support economic development and other areas of the neighbourhood to facilitate a variety of housing forms.	High
2. Update Future Street Designs	Amend the Streets and Traffic bylaw to reflect desired rights of way for key streets in Burnside Gorge, including the rights-of-way needed to support rapid transit.	High
3. Initiate Bridge Street Improvements	Complete a pedestrian crossing at the intersection of Bridge Street and Hillside Avenue. Consider feasibility of initial placemaking improvements (e.g. banners, street furnishings) on Bridge Street in the Industrial Arts area.	High
4. Complete Burnside Road Interim Improvements	Complete interim improvements for Burnside Road identified in this plan, as property is available (with Saanich).	High
5. Initiate Galloping Goose Regional Trail Improvements and Wayfinding	Partner with the CRD to improve connections between the Galloping Goose Trail and Alpha Street, Burnside Road, and Cecelia Road; and provide wayfinding signage between the trail, Jutland Road and Gorge Road. Work with the CRD to consider enhancements to the trail itself which make it more comfortable for all users (Short- to Medium-Term).	High
6. Complete Bicycle and Pedestrian Improvements	<p>Prioritize improvements identified at the following locations as resources and city-wide priorities allow:</p> <ul style="list-style-type: none"> • Enhancement of pedestrian crossings at Burnside Road-Washington Avenue and Gorge Road-Balfour Avenue • Completion of missing bicycle lane segment on Finlayson Street east of Douglas Street • Enhancement of pedestrian connectivity along Washington Avenue between Gorge Road and Arbutus Park, and along the south side of Gorge Road between Balfour Avenue and Washington Avenue • Signalized crossings at Douglas Street-Speed Street and Finlayson Street-Nanaimo Street intersections (dependent on redevelopment) 	High
7. Complete Parks Planning and Design	Complete park planning for Arbutus Park and Cecelia Ravine Park. Through the Parks Master Plan, consider additional opportunities for water access, and the need and opportunities for new parks in the residential and employment areas.	High

8. Evaluate Truck Routes	Consider changing the designation of Jutland Road and Burnside Road when the City's truck route policy is reviewed.	High
9. Amend Official Community Plan	Update the OCP for alignment with the Burnside Gorge Neighbourhood Plan, including adjustments to land use designations, a new Heritage Conservation Area and expanded Development Permit Areas.	Medium
10. Support Artists' Spaces	Through the Arts and Culture Master Plan, explore partnerships for the creation of non-profit, affordable spaces for artists and arts organizations in Burnside Gorge. Consider affordable artists' housing in the city.	Medium
11. Explore Heritage Incentives	Consider extending the Heritage Tax Incentive program for heritage properties throughout Rock Bay.	Medium
12. Encourage Energy Efficient Buildings	As part of the Greenhouse Gas Emissions reduction strategy, consider means to support the creation or retrofit of energy efficient commercial and industrial buildings.	Lower
13. Create Public Art	Initiate at least one public art program for the Rock Bay Area (e.g. placement of murals in Rock Bay area).	Lower

Ongoing Actions (Operational)

These items may be completed over time as part of ongoing City operations

Action	Description	Priority
13. Complete Minor Bicycle and Pedestrian Improvements	Continue program of completing bicycle and pedestrian improvements as resources allow and as streets are resurfaced, considering city-wide needs and the prioritization in this plan.	High
14. Infrastructure Upgrades	Continue underground infrastructure upgrades consistent with City Master Plans.	High
15. Encourage Industrial Users to Be Good Neighbours	Develop guidelines and encourage best practices for heavy industrial uses to mitigate impacts on the surrounding Rock Bay business district	Medium
16. Encourage Heritage Conservation	Work with owners of eligible properties to encourage listing of properties on the Heritage Register. Consider Heritage Designation during rezoning application processes involving heritage resources. Work with the community to identify further citizen-initiated heritage conservation areas.	Medium
17. Create Public Art	Integrate public art into the development of streetscapes, parks and waterfront pathways in the neighbourhood, in collaboration with the community and through existing public arts programs.	Lower
18. Promote Rock Bay Area for Business	Work with the business community to brand and promote the Rock Bay area and to tell the stories of business in Rock Bay through the City's Business Hub.	Lower

Medium Term (3-10 years) Actions

These items would be recommended for funding in the future. They may be recommended for future capital budgets, may be advanced if triggered by redevelopment projects, or if funding (amenity contributions, grants, etc.) become available.

Action	Description	Priority
19. Complete Waterfront Pathway Phase 1	Complete a pedestrian and bicycle connection from the Galloping Goose Regional Trail to Arbutus Park.	Very High
20. Complete Doric Street Connector	Acquire easements or rights of way and complete the pedestrian and bicycle connection between Maddock Avenue, Cecelia Road and the Galloping Goose Regional Trail.	Very High

21. Develop Bicycle Master Plan Priority Network	Complete an All Ages and Abilities bicycle route on Government Street as far north as Bay Street, and a crossing of Blanshard Street at King's Road, as part of Phase 2 of the Bicycle Master Plan priority network. Complete an All Ages and Abilities bicycle route on Government Street and Gorge Road consistent with Phase 4 of the Bicycle Master Plan priority network.	High
22. Encourage Business-Ready Light Industrial Spaces	Explore means (e.g. further regulatory changes or incentives) to further support the creation of light industrial spaces for start-up, attraction and expansion of businesses in the Rock Bay area.	High
23. Encourage Urban Village Commercial Uses	Explore means (e.g. further regulatory changes, incentives, or streetscape improvements to Jutland Road) to further support the creation of urban village commercial uses within walking distance of the neighbourhood's primary residential areas.	High
24. Develop Public Realm Strategy	Expand the Public Realm strategy to include development of streetscape design guidance for emerging urban villages and industrial arts areas in Burnside Gorge neighbourhood, to be implemented as these areas redevelop or as part of streets maintenance.	High
25. Enhance Existing Parks	Undertake improvements to Arbutus Park and Cecelia Ravine Park as identified in Parks Management Plans.	High
26. Enhance Harriet Road Waterfront	Create a parks design and implement improvements (with Saanich).	Medium
27. Develop an Additional Water Access	Develop an additional water access (e.g. small boat launch, swimming access) as identified in the Parks Master Plan.	Medium
28. Complete Rock Bay Parking Management Strategy	Complete a Public Parking Management Strategy to support the evolution of the Rock Bay area as a successful urban industrial business district.	Medium
29. Initiate Douglas Street Frequent Transit Improvements and Begin Planning for Rapid Transit	Work with BC Transit to support improvements to Douglas Street to move towards a frequent transit level of service as described in the 2010 Transit Future Plan (e.g. enhanced stations; signal prioritization) as a first step towards developing Rapid Transit.	Medium
30. Develop a Festival Street	Enhance Discovery Street as a festival street.	Medium
31. Placemaking Program	Design and implement placemaking improvements (e.g. street furnishings, banners, event programming) focused on urban villages and the industrial arts areas once these areas become established.	Lower
31. Develop a Community Garden	Locate and develop an additional community garden in the western part of the neighbourhood.	Lower
32. Plan for Sea Level Rise and Tsunami Hazard	Determine how to protect parts of the Rock Bay area susceptible to sea level rise (e.g. through improved infrastructure and/or regulations for new development).	Lower

Long Term (10+ years) or as redevelopment occurs

These items represent longer-term objectives without specific funding strategies or allocations.

Action	Description	Priority
33. Waterfront Pathway Phase 2	Complete a waterfront pathway from Arbutus Park to Lotus Street	Very High
34. Rock Bay Area Shoreline Improvements (South of Bay Street)	As part of redevelopment, seek improvements at Barclay Point and around Rock Bay (water body) connecting to the Harbour Pathway as identified in this plan	Medium
35. Humber Green Intersection Redesign	Through a transportation study, develop a new design for the Humber Green intersection which improves pedestrian conditions and sense of place, and supports redevelopment.	Medium
36. Rock Bay Area Shoreline Improvements (North of Bay Street)	Improve habitat on City-owned lands and consider a pathway linking Bay Street to Point Ellice House. As redevelopment permits, consider extension of improvements north to Selkirk Village.	Lower
37. New Waterfront Park	Dependent on redevelopment of the Gorge Road Hospital Site, develop an additional waterfront park as described in this plan.	Lower

Appendix A: Glossary of Terms

Affordable Housing: Housing that falls within the financial means of a household living in either market or non-market dwellings. Total costs for rent or mortgage plus taxes (including a 10% down payment), insurance and utilities should equal 30 percent or less of a household's gross annual income. Housing affordability is influenced by household income, and cost and supply of housing.

Apartment: A dwelling located in a multi-story, multi-unit building that accesses the ground via shared corridors, entrances and exits.

Attached Dwelling: A building used or designed as three or more self-contained dwelling units, each having direct access to the outside at grade level, where no dwelling unit is wholly or partly above another dwelling unit.

Attached Housing: Any form of housing where more than two individual dwellings are structurally attached including duplexes, townhouses, row-houses, and apartments regardless of tenure.

Complete Streets: Transportation facilities that are designed and operated to enable safe access for all users – pedestrians, cyclists, public transit passengers and vehicles, commercial vehicles and automobiles. Users of all ages and abilities must be able to safely move along and across a Complete Street.

Cohousing: is an intentional community of private homes clustered around shared space. Each attached or single family home has traditional amenities, including a private kitchen. Shared spaces typically feature a common house, which may include a large kitchen and dining area, laundry, and recreational spaces.

Cooperative Housing: Housing owned by a non-profit cooperative association, where residents have a share

of ownership and often pay a monthly housing charge.

Cottage housing: is a grouping of small, single family dwelling units clustered around a common area and developed with a coherent plan for the entire site.

Density: The number of dwelling units on a site expressed in dwelling units per acre (u.p.a) or units per hectare (u.p.ha) or Floor Space Ratio (FSR)

Development Permit: A document that includes approved site and building development plans illustrating land use, landscaping, built form, intensity of use, and appearance of the site and buildings, as well as conditions of development approval.

Development Permit Area: Under the Local Government Act (LGA), local governments may designate areas of land known as a development permit areas (DPA) for one or more purposes.

District Energy System: The provision of heating, cooling or electricity through the production of steam, hot water or chilled water at a central plant that is then distributed through piping to individual buildings in a larger neighbourhood or community.

Duplex: A two family dwelling.

Dwelling Unit: Any room or suite of rooms, intended for use by one household exclusively as a place of residence.

Employment Uses: A mix and range of office, industrial, warehousing, transportation and logistics, construction, communication, technology, commercial and financial services, retail and wholesale, institutional, research, education, public service and similar or related land uses and activities.

Fee Simple: Private ownership of property with no strata-title ownership or obligations.

Floor Space Ratio: The ratio of the total floor area of a building to the area of the lot on which it is situated.

Frequent Transit: Transit service that provides medium to high density land use corridors with a convenient, reliable, and frequent (15 minutes or better) transit service all day long. The goal of the Frequent Transit network is to allow people to spontaneously travel without having to consult a transit schedule and is characterized by transit priority, right-of-way improvements, a high level of transit stop amenities, and corridor branding.

General Employment: consists of primarily employment generating uses and accessory mixed-uses including light industrial, commercial, and institutional uses contained within a wide range of low to medium-rise building forms, including those with large floor plates on lots with space suitable for vehicle circulation, shipping and delivery.

Ground-Oriented Dwelling: A residential unit that has individual and direct access to the ground, whether detached or attached, including single-detached dwellings, duplexes, rowhouses and townhouses, as well as the principal unit and secondary suite in single-detached dwelling.

Harbour Pathway: A currently incomplete public multi-purpose pathway running along the Victoria Harbour south and east shore between Ogden Point and Rock Bay.

Heritage Character: Overall effect produced by traits or features which give heritage property or an area a distinctive appearance or quality.

Heritage Conservation: Includes, in relation to heritage, any activity undertaken to protect, preserve or enhance the heritage value or heritage character (including but not limited to character-defining elements) of heritage property or an area.

Heritage Designation: Bylaw to protect a heritage property that is formally recognized for its heritage value from exterior alterations, removal or demolition without the approval of City Council.

Heritage Property: A structure, building, group of buildings, district, landscape, archaeological site or other place in Canada that has been formally recognized for its heritage value.

Heritage Register: A list of property that is formally recognized by the local government to have heritage value or heritage character.

Heritage Value: The historic, cultural, aesthetic, scientific or educational worth or usefulness of (heritage) property or an area. The heritage value of a heritage resource is embodied in its heritage character.

Industrial: consists of industrial uses including primary processing, manufacturing, shipping, warehousing and accessory office uses, occupying a wide range of low to mid-rise building forms including those with large floor plates on lots with outdoor space suitable for vehicle circulation, storage as appropriate, and materials handling.

Intensification: The development of a property, site or area at a higher density than currently exists through: a) redevelopment, b) the development of vacant and/or underutilized lots within previously developed areas; c) infill development; and, d) the expansion or conversion of existing buildings.

Large Urban Village: consists of low to mid-rise mixed-use buildings that accommodate ground-level commercial, offices, community services, visitor accommodation, and multi-unit residential apartments, with a public realm characterized by wide sidewalks, regularly spaced street tree planting and buildings set

close to the street frontage, anchored by a full service grocery store or equivalent combination of food retail uses, serving either as a local, rapid or frequent transit service hub.

Low-Rise Building: A building four storeys or less in height.

Mixed Use: Different uses in relatively close proximity either in the same building (apartments above a store) or on the same or site or, when referring to an area or district, on an adjacent site (light industry adjacent to an office building).

Multi-unit: A building containing three or more dwelling units, also referred to as multi-family or a multiple dwelling.

Official Community Plan: An Official Community Plan (OCP) can be developed by both municipalities and regional districts. The OCP provides the longer term vision for the community. Under the Local Government Act section 875, an OCP is a statement of objectives and policies to guide decisions on planning and land use management, within the area covered by the plan, respecting the purposes of local government.

Open Space: Land that provides outdoor space for unstructured or structured leisure activities, recreation, ecological habitat, cultural events or aesthetic enjoyment that is generally publicly-accessible, and that is not a designated City of Victoria park. Open space includes private lands, public lands and City-held property.

Park: Land managed by the City of Victoria that provides outdoor space for unstructured or structured leisure activities, recreation, ecological habitat, cultural events, or aesthetic enjoyment, not including planted areas within street rights of way.

Placemaking: A holistic and community-based approach to the development and revitalization of cities and neighbourhoods, that creates unique places of lasting value that are compact, mixed-use, and pedestrian and transit oriented with a strong civic character.

Priority Frequent Transit: Transit service that provides medium to high density land use corridors with a convenient, reliable, and frequent (15 minutes or better) transit service all day long. Priority Frequent Transit differs from Frequent Transit, as it includes a semi-exclusive right of way on portions of the route for transit vehicles.

Public art: Works of art in any media that has been planned and executed with the specific intention of being sited or staged in the physical public domain, usually outside and accessible to all.

Rapid Transit: Transit service designed to move high volumes of passengers between major regional destinations along key transportation corridors. Services are very frequent (15 minutes or better) and stop less often than traditional transit services. To improve travel time and reliability Rapid Transit utilizes an exclusive or semi-exclusive right of way to eliminate or significantly reduce the impact of general traffic on transit vehicles. Rapid services use high capacity transit vehicle technologies such as light rail and bus rapid transit vehicles.

Row House: An attached dwelling on its own legal parcel with a formal street address.

Street Wall: A generally continuous edge of building facades that collectively define streets and sidewalks, and include portions of building facades above the ground.

Small Urban Village: consists of a mix of commercial and community services primarily serving the surrounding residential area, in low-rise, ground-oriented multi-unit residential and mixed-use buildings generally up to four storeys in height along arterial and secondary arterial roads and three storeys in height in other locations, serving as a local transit service hub.

Streetscape: All the elements that make up the physical environment of a street and define its character. This includes paving, trees, lighting, building type, style, setbacks, pedestrian amenities, street furniture, etc.

Town Centre: consists of mixed-use, mid-rise building types that accommodate ground-level commercial, offices, community services, visitor accommodation, and multi-unit residential apartments, with a well-defined public realm characterized by wide sidewalks, regularly spaced street tree planting and buildings set close to the street frontage, anchored by a full service grocery store or equivalent combination of food retail uses and destination retail, serving either as a frequent or rapid transit service hub.

Townhouse: A variety of 3 or more residential buildings where individual houses lining a street share adjacent walls in common under a strata title, with each dwelling unit having a separate entrance and yard area. Stacked townhouses are stacked on top of each other, each with its own front door and private outdoor space.

Transit oriented development: (TOD) is a mixed-use residential and commercial area designed to maximize access to public transport, and often incorporates features to encourage transit ridership while dissuading the ownership of automobiles.

Traditional Residential: consists primarily of residential and accessory uses in a wide range of primarily ground-oriented building forms including single, duplexes, townhouses and row-houses, house conversions, and low-rise multi-unit residential and mixed-use buildings up to three storeys in height located along arterial and secondary arterial roads.

Triplex: Three units sharing a dividing partition or common wall.

Two Family Dwelling: A building consisting of two self-contained dwelling units which share a common wall or an area that forms the floor of one unit and the ceiling of the other and are not linked by a trellis, deck, breezeway or similar connection.

Urban Design: Urban design is concerned with the human-made environment.

It is a discipline that is dedicated to the relationships among the fields of urban planning, architecture and landscape architecture. The concerns of urban design range from a broad level, such as the layout of entire cities, to particular aspects of designed environments such as architectural detailing, landscaping and street furniture.

Urban Residential: consists primarily of multi-unit residential in a wide range of detached and attached building forms, including townhouses and row-houses, low and mid-rise apartments, with a residential character public realm featuring landscaping and street tree planting, and mixed-uses located along arterial and secondary arterial roads. Urban Residential areas are generally located within 400 metres of the Urban Core, a Large Urban Village, Town Centre, or frequent transit route, or within 800 metres of a rapid transit station.
