

Petition for a GE* Free Zone in Victoria (*GE denotes genetically-engineered)

WHEREAS genetically engineered (GE) foods have not been adequately tested by any federal agency for long-term impacts on human and environmental health, with public agencies relying on data presented by corporations that hold GE patents; AND WHEREAS the precautionary principle is an approach to risk management that has been developed in circumstances of scientific uncertainty, reflecting the need to take prudent action in the face of potentially serious risk;

WE, THE UNDERSIGNED, call on Victoria City Council to demonstrate leadership by placing itself on record opposing the cultivation of genetically engineered crops, plants and trees within the City of Victoria, and calling for action by the Federal and Provincial governments to introduce mandatory labelling of products containing genetically engineered organisms and to place restrictions on further genetically engineered products being brought to market in the absence of scientific testing of long-term impacts on human and environmental health.
