Subject: rezoning application No 00492

I am writing a letter in regards to the **rezoning application No.00492 for property known as 2972 Doncaster Drive Zoning Regulation Bylaw, Amendment Bylaw (No.1060 – 16-007)**. I live across the street by two houses at 2919 Doncaster and I just want to recommend or argue, or even beg about not chopping the trees down on 2972 Doncaster. I imagine some will have to come down, but **PLEASE do not take the two huge trees down on the corner of Oakland and Doncaster**. They have to be cleaned up with all the bush under and around them, but please tell me they are not coming down. We never see such huge beautiful trees like this especially the very big one on the corner. It is absolutely beautiful and it would break my heart to lose it. There has to be another way around it if this is the plan. We need housing I know, but we also need trees for our own breathing and a healthy environment, not to mention the serenity that we feel when they are all around us. This is the only complaint or worry I have about this project going ahead. I just couldn't bear losing these trees. Thank you for listening.
