

Council Report For the Meeting of August 27, 2015

To:

Council

Date:

August 13, 2015

From:

Jonathan Tinney, Director, Sustainable Planning and Community Development

Subject:

Development Permit Application No. 000418 for 254 Belleville Street

RECOMMENDATION

Staff recommend that Council consider the following motion:

"That Council authorize the issuance of Development Permit Application No. 000418 for 254 Belleville Street, in accordance with:

- 1. Plans date stamped March 20, 2015.
- 2. Development meeting all Zoning Regulation Bylaw requirements.
- 3. The Development Permit lapsing two years from the date of this resolution."

EXECUTIVE SUMMARY

The purpose of this report is to present Council with a revised recommendation for consideration in relation to a Development Permit Application for the property located at 254 Belleville Street. The Application proposes an addition to the existing Victoria Clipper Ferry Terminal and the siting of a food truck.

On April 30, 2015, Council agreed to issue the Development Permit subject to:

A Section 219 Covenant, in a form satisfactory to the City Solicitor, being registered on title requiring that the food truck be removed from the property after a period of not more than five years or upon completion and occupancy of a new terminal building, whichever occurs first, to the satisfaction of the Assistant Director, Development Services Division, Sustainable Planning and Community Development.

The Victoria Clipper Ferry Terminal is located on Provincially-owned land and the BC Ministry of Transportation and Infrastructure have informed staff that they are unable to allow the Section 219 Covenant to be registered on the property. As an alternative, they have provided the City with a Letter of Undertaking stating that no food trucks will be operated on the land five years after the issuance of the Development Permit or, if a new consolidated ferry terminal is constructed on that site, whichever occurs first.

PURPOSE

The purpose of this report is to present Council with an alternative recommendation for consideration in relation to a Development Permit Application for the property located at 254 Belleville Street. The Application proposes an addition to the existing Victoria Clipper Ferry Terminal and the siting of a food truck.

BACKGROUND

On March 20, 2015, the City received a Development Permit Application for an addition to the existing Ferry Terminal and the siting of a food truck located at 254 Belleville Street. In their submission, the applicant stated that they were willing to register a Covenant on the title to the property to ensure that the building is removed from the site within five years or upon completion of a new ferry terminal building.

On April 30, 2015, Council made the following motion:

"That Council authorize the issuance of Development Permit Application No. 000418 for 254 Belleville Street, in accordance with:

- 1. Plans date stamped March 20, 2015.
- 2. Development meeting all Zoning Regulation Bylaw requirements.
- 3. A Section 219 Covenant, in a form satisfactory to the City Solicitor, being registered on title requiring that the food truck be removed from the property after a period of not more than five years or upon completion and occupancy of a new terminal building, whichever occurs first, to the satisfaction of the Assistant Director, Development Services Division, Sustainable Planning and Community Development.
- 4. The Development Permit lapsing two years from the date of this resolution."

ISSUES & ANALYSIS

The Victoria Clipper Ferry Terminal is located on Provincially-owned land and the BC Ministry of Transportation and Infrastructure have informed staff that they are unable to allow the Section 219 Covenant to be registered on their property. The reasons for this decision are outlined in correspondence to staff attached to this report.

As an alternative to the Section 219 Covenant, the BC Ministry of Transportation and Infrastructure have provided the City with a Letter of Undertaking (attached) stating that no food trucks will be operated on the land five years after the issuance of the Development Permit or, if a new consolidated ferry terminal is constructed on that site, whichever occurs first.

While it should be noted that the Letter of Undertaking is not a legally enforceable guarantee that the food truck will be removed from site after the specified period, in light of the above, staff recommend that Council consider approving the Development Permit and remove the condition that a Section 219 Covenant be first registed on title.

CONCLUSIONS

Staff recommend that Council consider approving the Development Permit and remove the condition that a Section 219 Covenant, relating to the removal of the food truck, be first registered on title.

Respectfully submitted,

Jim Handy, Senior Planner -Development Agreements, Development Services Division Alison Meyer, Assistant Director, Development Services Division Jonathan Tinney, Director Sustainable Planning and Community Development

Clipper Food Truck - Covenant Discussion

Follow Up Flag:

Flag Status:

Follow up

Flagged

Hi Jim – Here is a summary of the Province's position on granting a Sec.219 covenant. Hopefully it clarifies to Council our decision-making approach.

The Province and the Province's agents are immune from the application of municipal bylaws or municipal regulatory powers that would bind or affect the Province or the Province's agents in the use or development of land. In particular, section 14(2) of the Interpretation Act provides that "...an enactment that would bind or affect the government in the use or development of land...does not bind or effect the government".

The Province may, in rare situations voluntarily comply with municipal land regulation bylaws despite this section in order to protect a significant municipal interest, provided the municipal requirement aligns with the provincial objectives regarding the interests of the Province as a whole. This would generally occur when there exists no other practical means for that significant municipal interest to be protected.

In the current situation the intent of the s.219 restrictive covenant is to limit the duration that a food truck can exist on this property. The Ministry respects and understands the intent of this limitation but we feel it can be similarly addressed using other mechanisms that do not involve binding the Province to municipal requirements. As a result, the Ministry has drafted a license of occupation for the food truck that includes a 5 year term limit (unless a consolidated terminal is constructed before that). Assuming that the position of the City of Victoria does not change in 5 years' time, the food truck will be required to vacate the property and return the site to its original condition.

I hope that this mutual compromise is acceptable to Council and trust that we can move forward in enhancing the Belleville Terminal experience.

Regards,

Kevin House (M.PL)

Mayor and Council City of Victoria 1 Centennial Square Victoria BC V8W 1P6

Re: Letter of Undertaking – Clipper Ferry Terminal Food Vendor License of Occupation

The BC Transportation Financing Authority (BCTFA), owner of 254 Belleville Street, in Victoria (PID: 028-307-259), will be entering into a license of occupation with Songhees Seafood & Steam to permit them to establish and operate a food truck on our land. This food truck license is intended to be temporary in nature. Therefore, the BCTFA agrees that the license will terminate, and no food trucks will be operated on the land, 5 years after the issuance of development permit 000418, or if a new consolidated ferry terminal is constructed on that site, whichever occurs first.

During the term of this license the food truck vendor is accountable for meeting the conditions of this development permit and any other municipal by-laws specific to its operation on this parcel.

If you wish to discuss this matter further, please do not hesitate to contact me at (250)387-6048.

Yours truly,

Kevin House

Planning and Land Use Committee Report For the Meeting of April 30, 2015

To:

Planning and Land Use Committee

Date:

April 16, 2015

From:

Jim Handy, Senior Planner - Development Agreements

Subject:

Development Permit Application No. 000418 for 254 Belleville Street

RECOMMENDATION

Staff recommend that Committee forward this report to Council and that Council consider the following motion:

"That Council authorize the issuance of Development Permit Application No. 000418 for 254 Belleville Street, in accordance with:

Plans date stamped March 20, 2015.

Development meeting all Zoning Regulation Bylaw requirements.

3. A Section 219 Covenant, in a form satisfactory to the City Solicitor, being registered on title requiring that the food truck be removed from the property after a period of not more than five years or upon completion and occupancy of a new terminal building, whichever occurs first, to the satisfaction of the Assistant Director, Development Services Division, Sustainable Planning and Community Development.

4. The Development Permit lapsing two years from the date of this resolution."

LEGISLATIVE AUTHORITY

In accordance with Section 920(2) of the Local Government Act, Council may issue a Development Permit in accordance with the applicable guidelines specified in the Official Community Plan, 2012. A Development Permit may vary or supplement the Zoning Regulation Bylaw but may not vary the use or density of the land from that specified in the Bylaw.

Pursuant to Section 920(8) of the *Local Government Act*, where the purpose of the designation is the revitalization of an area in which a commercial use is permitted, a Development Permit may include requirements respecting the character of the development, including landscaping, siting, form, exterior design and finish of buildings and other structures.

Pursuant to Section 920(8) of the Local Government Act, where the purpose of the designation is the establishment of objectives for the form and character of commercial, industrial and multifamily residential development, a Development Permit may include requirements respecting the character of the development including landscaping, siting, form, exterior design and finish of

buildings and other structures.

EXECUTIVE SUMMARY

The purpose of this report is to present Council with information, analysis and recommendations for a Development Permit Application for the property located at 254 Belleville Street. The Application proposes an addition to the existing Victoria Clipper Ferry Terminal and the siting of a food truck.

The following points were considered in assessing this Application:

- The proposal is consistent with the Official Community Plan, 2012 and the applicable Design Guidelines.
- The applicant is willing to register a Covenant on the title to the property to ensure that
 the building is removed from the site within five years or upon completion of a new ferry
 terminal building.

BACKGROUND

Description of Proposal

The proposal is to add 134m² to the existing Victoria Clipper Ferry Terminal in order to accommodate a customer waiting area and washroom facilities and to add a food truck to the site. Specific details include:

- The finishing materials associated with the building addition are consistent with the existing terminal and include corrugated metal siding, wood trellis and awnings.
- The food truck would be in the form of a double-decker bus and would primarily provide services for customers of the Victoria Clipper Ferry.
- The applicant indicates that the ferry operators are in the process of investing in capital
 upgrades to their vessels and terminal facilities and are committed to the development of
 a new Belleville International Terminal within the next five to six years. It is anticipated
 that the new terminal will provide a range of facilities for customers and, at that time, the
 temporary food service buildings will be removed from the site.

Sustainability Features

The applicant has not identified any sustainability features associated with this proposal.

Active Transportation Impacts

The applicant has not identified any active transportation impacts associated with this application.

Existing Site Development and Development Potential

The site is presently in the existing IHT3 Zone, Inner Harbour Commercial District, which allows for a range of uses including docks for ferries and aircraft, accessory facilities for marine related transportation (i.e. parking, ticket offices etc.), retail, offices, restaurants and outdoor storage.

Data Table

The following data table compares the proposal with the existing IHT3 Zone, Inner Harbour Commercial District. There are no variances required to accommodate this proposal.

Zoning Criteria	Proposal	Zone Standard
Site area (m²) - minimum	11,880	n/a
Density (Floor Space Ratio) - maximum	0.1:1	0.5:1
Total floor area (m²) - maximum	1,289	5,940
Floor area – rentals and restaurants (m²) - maximum	38 (restaurant)	100 (if no public washrooms are provided) 300 (if public washrooms are provided)
Height (m) – maximum	(from grade - the highest point of the building is below the grade of Belleville Street)	0.8 (above Belleville Street)
Site coverage % - maximum	11	n/a
Setbacks (m) - minimum Front (Belleville Street) Rear (Waterfront) Side (west) Side (east)	9.8 34.9 54 5.2	n/a n/a n/a n/a
Parking - minimum	35	24
Bicycle parking stalls (minimum)	Nil	n/a

Community Consultation

The Application does not propose any variances and, therefore, in accordance with the Community Association Land Use Committee (CALUC) Procedures, has not been referred to the James Bay Neighbourhood Association Land Use Committee.

ANALYSIS

Development Permit Area and Design Guidelines

The Official Community Plan, 2012 (OCP) identifies this property within Development Permit Area (DPA) 9 (HC): Inner Harbour. The following Design Guidelines are applicable to the application site:

- Downtown Core Area Plan
- Advisory Design Guidelines for Buildings, Signs and Awnings
- The Belleville International Terminal Design Guidelines
- Victoria Harbour Plan
- Standards and Guidelines for the Conservation of Historic Places in Canada.

The proposal is consistent with the aforementioned Guidelines on the following basis:

- The proposed development supports the use of the site as an international transportation terminal for ferries.
- The design of the proposed building addition is consistent with the existing terminal building.
- The proposed food truck is temporary in nature and will be removed from the site after a period of no more than five years.

CONCLUSIONS

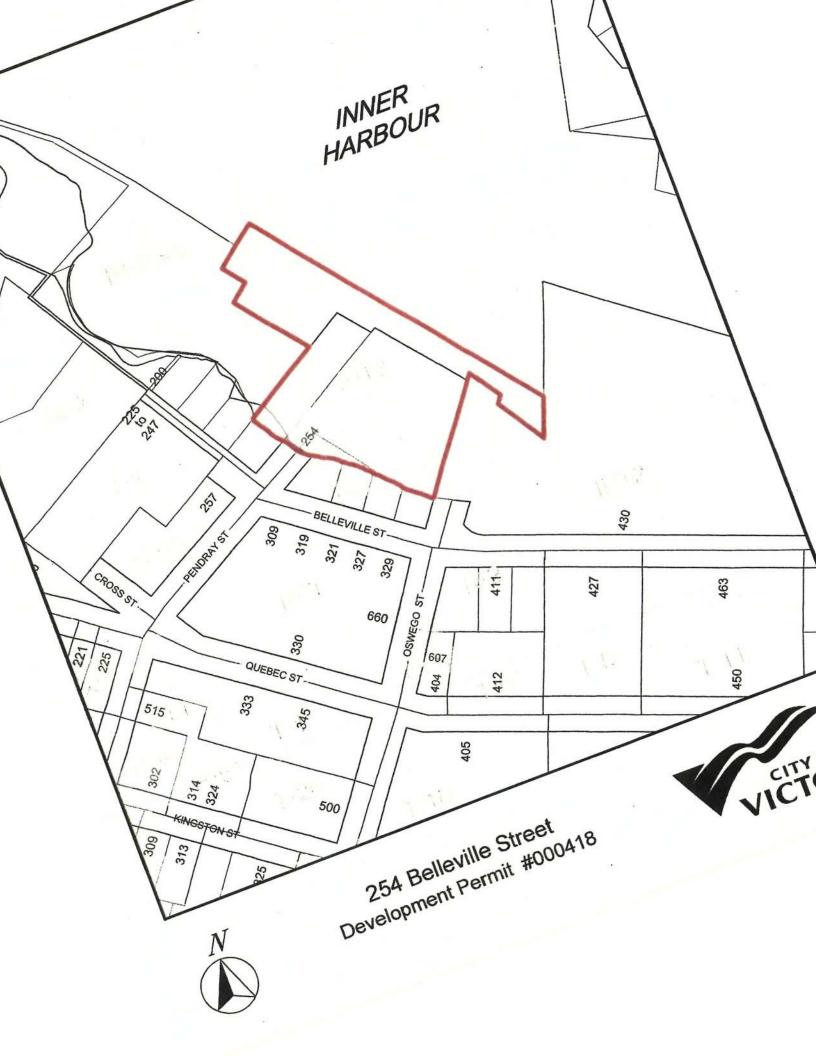

The Application is to construct a relatively small addition to the existing Victoria Clipper Ferry Terminal and to locate a food truck on site for a temporary period. The proposal is consistent with the *Official Community Plan* and the applicable Design Guidelines.

ALTERNATE MOTION

That Council decline Development Permit Application No. 000418 for the property located at 254 Belleville Street.

254 Belleville Street
Development Permit #000418

Mayor Helps and Council City of Victoria 1 Centennial Sq Victoria, BC V8W 1P6

Re: Development Permit Application for Victoria Clipper - 254 Belleville Street, Victoria

Dear Mayor Helps and Council,

Enclosed please find a completed application form, application fee, and plans showing the proposed short-term improvements to the Victoria Clipper terminal at 254 Belleville Street.

Background

The current terminal consists primarily of attached modular units. It is proposed to add two more modular units, connected to the existing terminal, and provide more space to accommodate passengers waiting in the Pre-Inspection Area prior to passing US customs for passengers departing for Seattle. In addition, the Clipper wishes to install a "food truck" to give waiting customers an opportunity to obtain a light food services.

These initiatives are aimed at improving departing passenger experience and customer satisfaction, as this is the last impression visiting passengers experience before leaving Victoria. Clipper Navigation Inc. has undertaken exit surveys of its customers, asking them to rate their experience while visiting Victoria and the service they received. For the most part, responses were very favourable, however, the terminal facility receives the least satisfactory comments. This negative feedback shows that something must be done in the short term to meet the reasonable customer expectations. It is recognized that the proposed improvements are only an interim measure and that a new common-use international marine transportation terminal is the ultimate objective.

Description Of Additional Waiting Area And Washrooms

Currently, the terminal only has enough inside space to accommodate approximately 100 passengers waiting in the pre-inspection area for customs clearance. There are many times during the season when there are more than 300 (people) waiting to clear US customs. The additional modular units will provide space for at least another 100 passengers and will be a big improvement. It still means there will be times when some passengers may have to wait outside before clearing customs.

CitySpaces Consulting Ltd. 5th Floor 844 Courtney St. Victoria BC V8W 1C4 250.383.0304 Tel 866.383.0304 Toll-free 250.383.7273 Fax

0

m

LA

Two modular units will be attached to the existing terminal space and will add approximately1440 ft.² of additional passenger waiting area and 250 ft.² of relocated washrooms.

The new modular units will connect to and match the existing modular units. Windows will be re-used and located in similar places to where they currently found, along the exterior wall assembly. The feature blue awning will be installed around the perimeter. The relocated washrooms will be connected to the west side of the units and provide articulation in the west wall line. The "bump-out" washroom unit will be further softened by adding ornamental cedar lattice work mirroring the lattice elements on the US Customs trailer. The intention is to place decorative signage on one exterior wall. The plans attached show a placeholder for the new sign that will be designed as an architectural feature and indirectly lit from above. The intention is to engage a local First Nations artist to participate in the design and carving of the sign.

Food Services

The other deficiency most commonly identified by customers is the lack of any confectionery service. There are often times when ticketed passengers have some time before clearing US customs but insufficient (time) to go off-site. To address this lack of service, a double decker food "bus" is planned to be installed and located near the entrance of the Clipper terminal. The existing traffic bollards will be moved slightly to provide safe separation between foot passengers and passenger drop-off points.

The food "bus" will allow for light meals to be purchased from a kiosk area on the north side of the "bus". The upper level of the double-decker bus will provide limited space for passengers to sit and eat, or purchased goods can be consumed elsewhere while waiting to clear customs. There is no room to accommodate a canteen of any sort within the current or expanded terminal.

Timing

The buildings are modular trailer units have no foundation and can be installed relatively easily. The intention has been to install them prior to the 2015 summer season. However, given the coordination with US Customs and related mechanical adjustments, timing for doing the work will likely get pushed back to the Fall 2015. It is strongly desired to have the food "bus" up and running for late Spring 2015. The ability to move this through the Development Permit Process to meet the summer season would be greatly appreciated.

Longer Terra Vision

Clipper Navigation is entering a new phase in its 28-year history. They are in the process of investing in capital upgrades to their vessels and terminal facilities along with other aspects of the operations, with an emphasis on passenger convenience and satisfaction.

The proposed terminal improvements are an important and necessary short-term measure, which will improve service to its customers; however, it is an interim measure. The Clipper, along with Black Ball Ferry Line, are committed to the development of a new Belleville International Terminal.

While a new terminal has been long discussed, the Clipper has renewed anticipation that with: a commitment from the ferry operators; the positive responses received from the City; the Province placing management of the property under the Ministry of Transport and Infrastructure; and the endorsement and support from other groups ad agencies; that a new common-use terminal can come to fruition within the next five or six years.

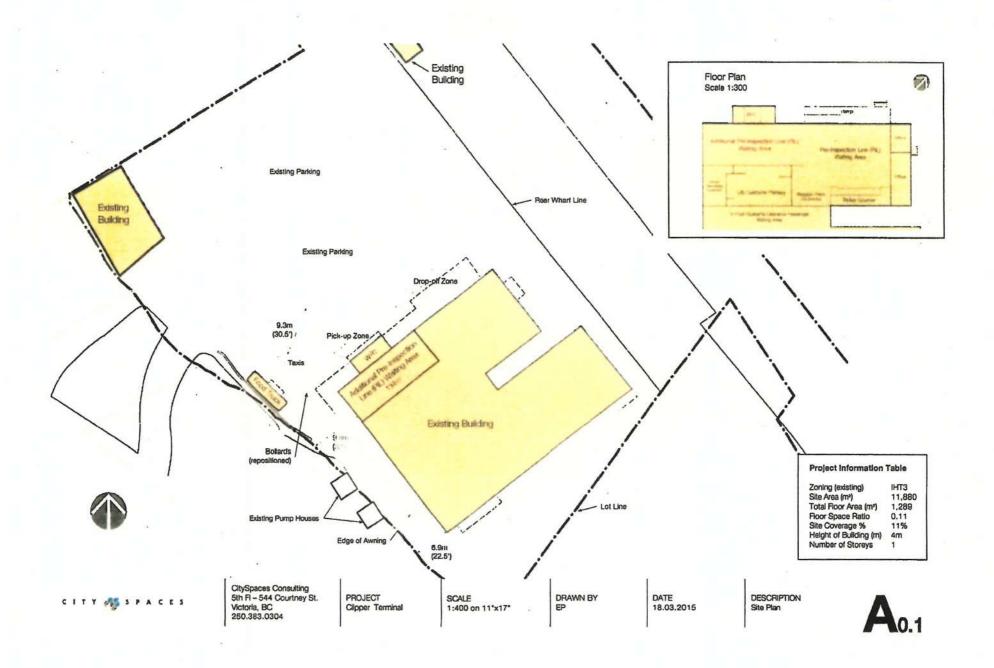

Thank you for your timely consideration of this Development Permit Application. Please feel free to contact the undersigned should you have any questions.

Sincerely, July Land Longth
