- 

**5. Heritage Designation Application No. 00202 for 522 St. Charles Street**

Applicant Meeting Attendees: Hans and Vanessa Rodenburgh (Applicant)

Staff provided a brief description and presentation.

**Panel Questions and Comments**

- Owners would like clarification on the relationship between the current house and the new lot.
  - Heritage designation application was submitted with the DP and Rezoning application and the designation would be determined on whether the rezoning application was approved.
- Question for staff, you are looking for feedback on merits of designation, are you looking for feedback on the statement of significance?
  - No. but you are able to provide comments if you like.
- How do you remove window openings and how minimal is that intervention?
  - Just so you are aware we added windows when we purchased the house. That being said, the windows would have to be filled in and shingles replaced and filled as they once were.
- Is there also removal of some of the original windows?
  - No, not to my understanding only to the ones that were added.
- On the front porch of the original house the double posts were going to be reinstated. Is this correct?
  - I'm not aware, but we can look into that for you.

Motion:

That the Heritage Advisory Panel recommend that Council approve the heritage designation of Application No. 000202 for 522 St. Charles Street.

**Moved** by: John Boehme

**Seconded** by: Nikki Strong-Boag

**Carried Unanimously**

- Liberty Brears would like to see changes to statements of significance. Making sure the Statement of Significances aren't a statement of facts but should be following national practice. Would like to see the buildings named after the individual of most significance rather than the address itself.
